John Archibald,2014 We are in the midst of a revolution It is a scientific revolution built upon the tools of molecular biology with which we probe and prod the living world in ways unimaginable a few decades ago Need to track a bacterium at the root of a hospital outbreak No problem the offending germ s complete genetic profile can be obtained in 24 hours We insert human DNA into E coli bacteria to produce our insulin It is natural to look at biotechnology in the 21st century with a mix of wonder and fear But biotechnology is not as unnatural as one might think All living organisms use the same molecular processes to replicate their genetic material and the same basic code to read their genes The similarities can be seen in their DNA Here John Archibald shows how evolution has been plugging and playing with the subcellular components of life from the very beginning and continues to do so today For evidence we need look no further than the inner workings of our own cells Molecular biology has allowed us to gaze back more than three billion years revealing the microbial mergers and acquisitions that underpin the development of complex life One Plus One Equals One tells the story of how we have come to this realization and its implications **One Plus One**

Plus One is a captivating and unconventional romance from Jojo Moyes about two lost souls meeting in the most unlikely circumstances. Praise for Jojo Moyes: A deftly plotted narrative populated with likeable, engaging characters. A bittersweet story about love, learning, and letting go. It's a tremendous read and I loved it. Daily Mail: Moyes provokes tears that are redemptive, the opposite of gratuitous. Some situations she forces the reader to recognize really are worth crying over. New York Times: Truly beautiful. Made us laugh, smile, and sob like a baby; you simply have to read it. Closer: A triumph. Packs such an emotional punch you'll need a box of tissues. Elle

Art and Idea in the Novels of China Miéville Carl Freedman, 2015-09-07. This book offers in the first six chapters critical readings of six novels by China Miéville, which are followed in the seventh chapter by a theoretical meditation on some of the conceptual issues raised by and engaged in the Miéville oeuvre. There comes a moment in *The City* the City though it is not necessarily the same moment for every reader when you realise that Beszel and Ul Qoma are not separate realms but the same space divided. Likewise art and idea are often subject to absurd partition but then along comes an author such as China Miéville who shows them to be in truth indissoluble. So argues Freedman's inordinately readable and just as rigorous account of Miéville's major novels. Highly recommended. Mark Bould, University of the West of England. Freedman offers a compelling interpretation of Miéville's novels informed equally by an impressive range of literary influences and a carefully documented exploration of historical antecedents. Seeing Miéville's genre hybridity as an illustration of the power of dialectical thinking, Freedman illuminates the complex utopian project of Miéville's fiction. Freedman is one of our finest critical voices on Miéville, one of the most important speculative writers of the 21st century. Sherryl Vint, University of California, Riverside

Posthuman Capital and Biotechnology in Contemporary Novels Justin Omar Johnston, 2019-10-01 This book examines several distinctive literary figurations of posthuman embodiment as they proliferate across a range of internationally acclaimed contemporary novels clones in Kazuo Ishiguro's *Never Let Me Go* animal human hybrids in Margaret Atwood's *Oryx and Crake* toxic bodies in Indra Sinha's *Animal's People* and cyborgs in Jeanette Winterson's *The Stone Gods* While these works explore the transformational power of the biotech century they also foreground the key role human capital theory has played in framing human belonging as an aspirational category that is always and structurally just out of reach making contemporary subjects never human enough In these novels the dystopian character of human capital theory is linked to fantasies of apocalyptic release As such these novels help expose how two interconnected genres of futurity the dystopian and the apocalyptic work in tandem to propel each other forward so that fears of global disaster become alibis for dystopian control which in turn becomes the predicate for intensifying catastrophes In analyzing these novels Justin Omar Johnston draws attention to the entanglement of bodies in technological environments economic networks and deteriorating ecological settings
