

4 Portable Programmer Operation

The Portable Programmer (PP) model PP32, works with OS600 or OS700 Onity safes and Onity door locks. The PP can open safes when the batteries are spent.

If OS700 safes are used with the HT24w, HT22, and OnPoint systems, it must be programmed through the PP. If the OS70C safes are used with the OnPortal system the PP or the tablet PP can be used. The safes must be added in the system locking plan using one of the front desk Onity systems. Use the PP to test, perform maintenance, initialize, update, and collect the audit data from the safes.

This option is used to establish the safe operation and provide a name to the safe. This is mostly used when installing the OS700 safe the very first time.

Note: The door must be open for the initialization.

3.	On the safe, remove the plastic plate that covers the PP connection jack.

11.	Align the plastic plate tabs with the tab slots and snap in position to replace the plate that was removed in step 3.
