K. Mohamed,Jaehwan Kim,Milanta Tom,2024-01-16 *Elastomeric Nanocellulose Composites* provides an in depth study of
recent developments in this fast evolving research field This book covers diverse aspects of materials engineering surface
treatments and fabrication of green nanocomposites It consolidates recent studies and qualitative findings on the
incorporation of a myriad of nanocellulose variants into various types of elastomer matrices with the main goal of enhancing
its mechanical integrity and potentially phasing out conventional elastomer fillers The current market is likewise discussed in
detail This book will provide an in depth study of current developments of nanocellulose incorporated elastomer composites
and their applications The book will be an essential reference resource for material scientists academic and industrial
researchers and technologists covering all aspects in the field Carbon black and silica are currently used as fillers in
elastomer based composites but the use of these reinforcing agents is not sustainable or eco friendly Therefore there is a
need to look for more sustainable filler materials for elastomers Assists readers in solving fundamental and application
related problems in the development of nanocellulose filled elastomers Discusses characterization techniques used for
analyzing elastomer nanocomposites Provides various attributes of nanocellulose its composites with different types of
elastomeric materials both natural and synthetic and its potential for advanced applications Includes comprehensive well
