Technical Automation in Classical Antiquity Maria Gerolemou, 2022-12-15 Technical automation the ability of man made or god made objects to move and act autonomously is not just the province of engineering or science fiction In this book Maria Gerolemou by taking as her starting point the close semantic and linguistic relevance of technical automation to natural automatism demonstrates how ancient literature performance and engineering were often concerned with the way

nature and artifice interacted Moving across epic didactic tragedy comedy philosophy and ancient science this is a brilliant assembly of evidence for the power of automatic theatre in ancient literature Gerolemou starts with the earliest Greek literature of Homer and Hesiod where Hephaestus self moving artefacts in the Iliad reflect natural forces of motion and the manufactured Pandora becomes an autonomous woman Her second chapter looks at Greek drama where technical automation is used to augment and undermine nature not only through staging and costume but also in plot devices where statues come to life and humans behave as automatic devices In the third chapter Gerolemou considers how the philosophers of the 4th century BCE and the engineers of the Hellenistic period with their mechanical devices contributed to a growing dialogue around technical automation and how it could help its audience glance and marvel at the hidden mechanisms of self motion Finally the book explores the ways technical automation is employed as an ekphrastic technique in late antiquity and early Byzantium

Oral Tradition in Ancient Israel Robert D. Miller, 2011-09-08 Providing a comprehensive study of oral tradition in Israel this volume unpacks the nature of oral tradition the form it would have taken in ancient Israel and the remains of it in the narrative books of the Hebrew Bible The author presents cases of oral written interaction that provide the best ethnographic analogies for ancient Israel and insights from these suggest a model of transmission in oral written societies valid for ancient Israel Miller reconstructs what ancient Israelite oral literature would have been and considers criteria for identifying orally derived material in the narrative books of the Old Testament marking several passages as highly probable oral derivations Using ethnographic data and ancient Near Eastern examples he proposes performance settings for this material The epilogue treats the contentious topic of historicity and shows that orally derived texts are not more historically reliable than other texts in the Bible

The Oxford History of the Archaic Greek World Paul Cartledge, Paul Christesen, 2025-05-16 The ancient Greek world consisted of approximately 1 000 autonomous polities scattered across the Mediterranean basin and each one developed its own unique set of socio political institutions and social practices The Oxford History of the Archaic Greek World offers twenty two detailed studies of key sites from across the Greek world between c 750 and c 480 BCE a crucial period when much of what is now seen as distinctive about Greek culture emerged All the studies in

this seven volume series use the same structure and methodology so that readers can easily compare a wide range of Greek communities The series thus offers a new and unique resource for the study of ancient Greece that will transform how we study and think about a crucial era in ancient Greek history Volume VI contains detailed and up to date studies of Rhodes Sicyon Syracuse Thebes and Western Sicily *Play Among Books* Miro Roman,Alice_ch3n81,2021-12-06 How does coding change the way we think about architecture This question opens up an important research perspective In this book Miro Roman and his AI Alice_ch3n81 develop a playful scenario in which they propose coding as the new literacy of information They convey knowledge in the form of a project model that links the fields of architecture and information through two interwoven narrative strands in an infinite flow of real books Focusing on the intersection of information technology and architectural formulation the authors create an evolving intellectual reflection on digital architecture and computer science

Heythrop Journal ,2004 **James among the Classicists** Sigurvin Lárus Jónsson,2021-06-07 This book gives attention to the language and style of the letter of James with a hypothesis about its rhetorical purpose in mind It focuses on what we can learn about the author of James by reading the text in light of a guiding research question How does the author establish and assert authority The letter builds literary authority for a number of purposes one of which is to address socioeconomic disparity a major concern for the author The author of James presents a speech in character in the shape of a letter to establish his ethos Ch 2 employing vocabulary and style to signal his education implicitly Ch 3 4 and includes himself in the categories of sage teacher and exegete explicitly Ch 5 From this standpoint the author can address the rich as equals rebuke them and admonish both rich and poor to receive God s wisdom Ch 6 The comparison with ancient literary criticism shows that the categories at play are the same The insight that language and ethos are inseparable categories in antiquity provides us with renewed ways to interpret the literary production of early Christianity Both James and the Classicists present a competing epic in the context of the early imperium the former with an Israelite piety that is superior to contemporary economic and moral categories and the latter with the supremacy of Greek culture as a foundation for Rome The letter of James emerges as a document that builds educational ethos as a balance against the rich and powerful a strategy that calls for a revision of both its rhetoric and socio economic situation *The Babylonian Talmud and Late Antique Book Culture* Monika Amsler,2023-04-06 A new theory of the Talmud s formation based on comparison with late antique intellectual and material standards of book production *Ancient Near Eastern Iconography and the Bible* Hans Ulrich Steymans,2024-10-31 Examines the dilemma of whether ancient Near Eastern images while providing unique aspects of the world views of the cultures from which the Bible arose can be interpreted in a way that traceably relates them to the biblical text To avoid the danger of using images merely as illustrations for concepts found in the Bible one first needs to behold the image with its own right to been seen The essays within this volume describe the methods developed by Othmar Keel for bringing imagery into a dialogue with texts from the ancient Orient and their own interpretation including previously

unpublished material from Keel The contributions begin with an overview of the scholarly work of Keel and the development of his aims and methods including a revision of an article dealing with semiology in the interpretation of art The book proceeds to address the research history of iconology in art history presenting the methodology of Erwin Panofsky and one of his influential predecessors Charles Clermont Ganneau in contrast with Keel s three methodological steps leading from iconographic analysis to iconology Contributors then present two case studies of how Keel s method can be applied to interpret Egyptian and Mesopotamian images allowing insights into the worldview of an ancient culture and the aim of iconology The book concludes with a report about how iconographic analysis and iconology is taught on University level

The Fullness of Time in a Flat World Scott Waalkes,2010-01-01 Best selling author Thomas Friedman says that globalization has made the world flat and that we cannot stop the process But while it is right to say that globalization tends to flatten our world it is wrong to say that there are no alternatives to current patterns of economic ecological political and cultural integration This book argues that the Christian liturgical calendar provides a constructive alternative to the globalization of economics ecologies politics and cultures It does so by incorporating the church into the fullness of time in the gospel narrative thereby helping us escape from the dead end of Friedman s flat world so that we can improvise healthier ways of being globally integrated
