collectively inquire into the nature of relationships between medicine and poetry. Importantly, these can be both productive and unproductive. How, for example, do poet doctors reconcile the outwardly antithetical approaches of bio scientific medicine and poetry in their daily work where typically the former draws on technical language and associated thinking and the latter on metaphors? How does non narrative lyrical poetry engage with narrative based medicine? How do poets writing about medicine identify as patients? Central to the volume is the critical investigation of the consequences of varieties of medical pedagogy for clinical practice. Presenting a vision of how poetic thinking might form a medical ontology, this thought provoking book affords an essential resource for scholars and practitioners from across medicine, health and social care, medical education, the medical and health humanities and literary studies. **The American Pressman**, 1909
