is lagging behind in the field of pharmaceutical development Written specifically for pharmaceutical practitioners Bayesian Analysis with R for Drug Development Concepts Algorithms and Case Studies describes a wide range of Bayesian applications to problems throughout pre clinical clinical and Chemistry Manufacturing and Control CMC development Authored by two seasoned statisticians in the pharmaceutical industry the book provides detailed Bayesian solutions to a broad array of pharmaceutical problems Features Provides a single source of information on Bayesian statistics for drug development Covers a wide spectrum of pre clinical clinical and CMC topics Demonstrates proper Bayesian applications using real life examples Includes easy to follow R code with Bayesian Markov Chain Monte Carlo performed in both JAGS and Stan Bayesian software platforms Offers sufficient background for each problem and detailed description of solutions suitable for practitioners with limited Bayesian knowledge Harry Yang Ph D is Senior Director and Head of Statistical Sciences at AstraZeneca He has 24 years of experience across all aspects of drug research and development and extensive global regulatory experiences He has published 6 statistical books 15 book chapters and over 90 peer reviewed papers on diverse scientific and statistical subjects including 15 joint statistical works with Dr Novick He is a frequent invited speaker at national and international conferences He also developed statistical courses and conducted training at the FDA and USP as well as Peking University Steven Novick Ph D is Director of Statistical Sciences at AstraZeneca He has extensively contributed statistical methods to the biopharmaceutical literature Novick is a skilled Bayesian computer programmer and is frequently invited to speak at conferences having developed and taught courses in several areas including drug combination analysis and Bayesian methods in clinical areas Novick served on IPAC RS and has chaired several national statistical conferences *Statistical Applications for Chemistry, Manufacturing and Controls (CMC) in the Pharmaceutical Industry* Richard K. Burdick, David J. LeBlond, Lori B. Pfahler, Jorge Quiroz, Leslie Sidor, Kimberly Vukovinsky, Lanju Zhang, 2017-02-14 This book examines statistical techniques that are critically important to Chemistry Manufacturing and Control CMC activities Statistical methods are presented with a focus on applications unique to the CMC in the pharmaceutical industry The target audience consists of statisticians and other scientists who are responsible for performing statistical analyses within a CMC environment Basic statistical concepts are addressed in Chapter 2 followed by applications to specific topics related to development and manufacturing The mathematical level assumes an elementary understanding of statistical methods The ability to use Excel or statistical packages such as Minitab JMP SAS or R will provide more value to the reader The motivation for this book came from an American Association of Pharmaceutical Scientists AAPS short course on statistical methods applied to CMC applications presented by four of the authors One of the course participants asked us for a good reference book and the only book recommended was written over 20 years ago by Chow and Liu 1995 We agreed that a more recent book would serve a need in our industry Since we began this project an edited book has been published on the same topic by Zhang 2016 The chapters in Zhang discuss statistical methods for CMC as well as drug discovery and

nonclinical development We believe our book complements Zhang by providing more detailed statistical analyses and examples
