China's Foreign Aid and Investment Diplomacy, Volume II John F. Copper, 2016-04-29 Today by many accounts China is the world's foremost purveyor of foreign aid and foreign investment to developing countries This is the product of China's miracle economic growth over a period of more than three decades together with China's drive to become a major player in world affairs and accomplish this through economic rather than military means This three volume work is the first comprehensive study of China's aid and investment strategy to trace how it has evolved since Beijing launched its foreign aid diplomacy at the time of the founding of the People's Republic of China in 1949 Volume II provides an analysis of China's

foreign aid and investment to countries and regional organizations on the Asian continent covering all of its major sub regions during the period from 1950 to the present day Copper considers motivating factors such as the Korean War the Vietnam War and China's desire to challenge the West and later the Soviet Union Also important to China and driving its aid and investment was China's pursuit of Communist Bloc solidarity a search for secure borders and competition with India for influence in the Third World Securing its imports of energy and raw materials and markets for its products came later Marginalizing Taiwan and defeating it diplomatically constituted another goal of China's foreign aid and foreign investment analyzed here

Contested Waters Amit Ranjan, 2020-09-02 This book examines India's transboundary river water disputes with its South Asian riparian neighbours Pakistan Bangladesh Nepal and Bhutan It explores the history of disputes and cooperation over the transboundary river water in this region as well as discusses current disputes and future concerns It analyses how and why existing transboundary river water sharing treaties between India and its South Asian riparian neighbours are confronted with challenges The book indicates that India's transboundary river water disputes with its South Asian riparian neighbours are likely to escalate in coming years due to the widening of the demand supply gap in the respective countries It further shows the impact of bilateral relations on the resolution of transboundary river water disputes even as cordial relationships do not always guarantee the absence of river water disputes between riparian states The book looks at some key questions How political are India's transboundary rivers water disputes in South Asia Why do the roots of India's river water disputes with Bangladesh and Pakistan lie in the partition of the British India in 1947 Why are there reservations against India's hydroelectricity projects or allegations of water theft Is it possible to resolve transboundary river water disputes among these South Asian countries This book will greatly interest scholars and researchers working in the areas of river management environmental politics transnationalism water resources politics and international relations security studies peace and conflict studies geopolitics development studies governance and public administration and South Asian studies in addition to policymakers and journalists

The Right to Be Counted Sanjeev Routray, 2022-07-12 In the last 30 years Delhi the capital of India has displaced over 1.5 million poor people Resettlement and welfare services are available but exclusively so as the city deems much of the population ineligible for civic benefits The Right to Be Counted examines how Delhi's urban poor in an effort to gain visibility from the local state incrementally stake their claims to a house and life in the city Contributing to debates about the contradictions of state governmentality and the citizenship projects of the poor in Delhi this book explores social suffering logistics and the logic of political mobilizations that emanate from processes of displacement and resettlement Sanjeev Routray draws upon fieldwork conducted in various low income neighborhoods throughout the 2010s to describe the process of claims making as an attempt by the political community of the poor to assert its existence and numerical strength and demonstrates how this struggle to be counted constitutes the systematic protracted and incremental political process by which the poor claim their substantive entitlements and become

entrenched in the city Analyzing various social political and economic relationships as well as kinship networks and solidarity linkages across the political and social spectrum this book traces the ways the poor work to gain a foothold in Delhi and establish agency for themselves Contested Knowledges Esha Shah,Rutgerd Boelens,Bert Bruins,2019-05-20 Water acquisition storage allocation and distribution are intensely contested in our society whether for instance such issues pertain to a conflict between upstream and downstream farmers located on a small stream or to a large dam located on the border of two nations Water conflicts are mostly studied as disputes around access to water resources or the formulation of water laws and governance rules However explicitly or not water conflicts nearly always also involve disputes among different philosophical views The contributions to this edited volume have looked at the politics of contested knowledge as manifested in the conceptualisation design development implementation and governance of large dams and mega hydraulic infrastructure projects in various parts of the world The special issue has explored the following core questions Which philosophies and claims on mega hydraulic projects are encountered and how are they shaped validated negotiated and contested in concrete contexts Whose knowledge counts and whose knowledge is downplayed in water development conflict situations and how have different epistemic communities and cultural political identities shaped practices of design planning and construction of dams and mega hydraulic projects The contributions have also scrutinised how these epistemic communities interactively shape norms rules beliefs and values about water problems and solutions including notions of justice citizenship and progress that are subsequently to become embedded in material artefacts *Ethnographies of Power* Tristan Loloum,Simone Abram,Nathalie Ortar,2021-04-01 Energy related infrastructures are crucial to political organization They shape the contours of states and international bodies as well as corporations and communities framing their material existence and their fears and idealisations of the future *Ethnographies of Power* brings together ethnographic studies of contemporary entanglements of energy and political power Revisiting classic anthropological notions of power it asks how changing energy related infrastructures are implicated in the consolidation extension or subversion of contemporary political regimes and discovers what they tell us about politics today Protecting the Third Pole Simon Marsden,2019 This highly topical book considers the important question of how best to protect the environment of the Third Pole the area comprising the Hindu Kush Himalayas and Tibetan Plateau using the tool of international law Following detailed analysis of the weaknesses in the current legal protections according to comparative legal theory Simon Marsden recommends three potential options for implementation by policy and lawmakers **Return to Winter** Douglas E. Schoen,Melik Kaylan,2015-12-01 The United States is a nation in crisis While Washington s ability to address our most pressing challenges has been rendered nearly impotent by ongoing partisan warfare we face an array of foreign policy crises for which we seem increasingly unprepared Among these none is more formidable than the unprecedented partnership developing between Russia and China suspicious neighbors for centuries and fellow Communist antagonists during the Cold War The two

longtime foes have drawn increasingly close together because of a confluence of geostrategic political and economic interests all of which have a common theme of diminishing subverting or displacing American power While America s influence around the world recedes in its military and diplomatic power in its political leverage in its economic might and perhaps most dangerously in the power and appeal of its ideas Russia and China have seen their influence increase From their support for rogue regimes such as those in Iran North Korea and Syria to their military and nuclear buildups to their aggressive use of cyber warfare and intelligence theft Moscow and Beijing are playing the game for keeps Meanwhile America pledged to leading from behind no longer does much leading at all In Return to Winter Douglas E Schoen and Melik Kaylan systematically chronicle the growing threat from the Russian Chinese Axis and they argue that only a rebirth of American global leadership can counter the corrosive impact of this antidemocratic alliance which may soon threaten the peace and security of the world

Eurasia on the Edge Richard Sakwa,2018-10-15 Eurasia wherever one draws the boundaries is very much at the centre of discussions about today s world Security across Eurasia is a global concern and has been subject to a range of discussions and debate However the current tensions over security and world order with the growing challenges from Eurasia and Asia require more intense scrutiny The goals of the book are to explore the challenges facing the region and to assess how to achieve economic social and political stability in the Eurasian core The book s chapters are written by prominent experts in the field and together contribute to the continuing debate by providing policy advice for managing crises in the region Conflicts inevitably arise in the Eurasian space as global powers regional powers and individual states jockey for positions and influence These conflicts need not reach a crisis state provided the foundations of conflict and the surrounding frameworks can be better understood To do this it is necessary to examine the issue of security in Eurasia from a multi dimensional perspective that challenges any and all assumptions about Eurasia and global order This volume has two overarching goals The first is to come to a better understanding of key security threats in the Eurasian region from a multi dimensional social political economic and institutional perspective The second is to discuss policies directed to increase mutual security in and around the Eurasian core Although the crisis of security affects the whole

continent the area covered by the former Soviet Union and its neighborhood is at the epicenter of the current crisis On the one side the Atlantic community is consolidating and extending On the other various greater Asia ideas are in the making All of Eurasia is in danger of becoming an extended shatter zone a vast new shaky borderland trapped between two great systems of power and world order
