Online Recoverys Edge Ethnography Mental Health

Sara E. Lewis

Online Recovery's Edge Ethnography Mental Health:

Recovery's Edge Neely Laurenzo Myers, 2015-12-18 In 2003 the Bush Administration's New Freedom Commission asked mental health service providers to begin promoting recovery rather than churning out long term chronic mental health service users *Recovery's Edge* sends us to urban America to view the inner workings of a mental health clinic run in part by people who are themselves in recovery from mental illness In this provocative narrative Neely Myers sweeps us up in her own journey through three years of ethnographic research at this unusual site providing a nuanced account of different approaches to mental health care *Recovery's Edge* critically examines the high bar we set for people in recovery through intimate stories of people struggling to find meaningful work satisfying relationships and independent living This book is a recipient of the Norman L and Roselea J Goldberg Prize from Vanderbilt University Press for the best book in the area of medicine

The Anatomy of Loneliness Chikako Ozawa-de Silva, 2021-12-07 Introduction disconnected people and the lonely society Subjectivity and empathy Too lonely to die alone internet group suicide Connecting the disconnected suicide websites Meaning in life exploring the need to be needed among young Japanese Surviving 3 11 The anatomy of resilience What loneliness can teach us

Anthropological Perspectives on Global Challenges Emma Gilberthorpe, 2024-03-28 This volume offers a snapshot of anthropological perspectives on global challenges Whilst it could not hope to represent the full scope of anthropological perspectives those that are presented highlight some of the critical flaws embedded in such an all encompassing notion The contributors reveal the possibilities of reimagining the ways in which challenges are understood and addressed and demonstrate how a combination of deep understanding of the past and collaboration cooperation and inclusive dialogue about the future can improve the chances of positive action The collection thus not only shows us that perspectives must change but also how that change might be realised Whilst the chapters are authored solely by anthropologists this book is not solely for anthropologists The book is illustrative of the practical and theoretical insights that anthropology can offer those individuals teams and policy and decision makers engaged in research mitigation and or intervention practices in relation to the global challenges Beyond academia it contributes to broader understandings of the challenges we collectively face at this point in time and how we might collectively and effectively address them

Toxic Interactions and the Social Geography of Psychosis Hugh Middleton, 2023-10-10 *Toxic Interactions* is a review of quantitative research revealing how urban living trauma ethnicity stress and familial influence the risk of troubling psychotic experiences Each of these is reviewed in search of their social implications and a constructivist approach identifies their common threads The contributions of newer psychotherapeutic approaches such as Open Dialogue and Recovery programmes are considered and a consistent interpretation emerges that is not the observable features of disturbed mental state that deserve key attention but how these are generally understood by others and in particular the client's close associates *Toxic Interactions and the Social Geography of Psychosis* will be welcomed by all who find conventional

approaches to mental health difficulties unsatisfactory whether that is as a practitioner frustrated by the counter productive expectations of their institutional setting an academic exploring different perspectives a service user disappointed by not experiencing the care they feel is needed or as third party perplexed by the contradictions of contemporary psychiatry

Breaking Points Neely Laurenzo Myers,2024 A free ebook version of this title is available through Luminos University of California Press s Open Access publishing program Visit www.luminosoa.org to learn more Unprecedented numbers of young people are in crisis today and our health care systems are set up to fail them *Breaking Points* explores the stories of a diverse group of American young adults experiencing psychiatric hospitalization for psychotic symptoms for the first time and documents how patients and their families make decisions about treatment after their release Approximately half of young people refuse mental health care after their initial hospitalization even though we know that better outcomes depend on early support for youth and families In attempting to determine why this is the case Neely Laurenzo Myers identifies what matters most to young people in crisis passionately arguing that health care providers must attend not only to the medical and material dimensions of care but also to a patient s moral agency

Research Methods in Health Humanities Craig M. Klugman,Erin Gentry Lamb,2019-09-02 *Research Methods in Health Humanities* surveys the diverse and unique research methods used by scholars in the growing transdisciplinary field of health humanities Appropriate for advanced undergraduates but rich enough to engage more seasoned students and scholars this volume is an essential teaching and reference tool for health humanities teachers and scholars Health humanities is a field committed to social justice and to applying expertise to real world concerns creating research that translates to participants and communities in meaningful and useful ways The chapters in this field defining volume reflect these values by examining the human aspects of health and health care that are critical reflective textual contextual qualitative and quantitative Divided into four sections the volume demonstrates how to conduct research on texts contexts people and programs Readers will find research methods from traditional disciplines adapted to health humanities work such as close reading of diverse texts archival research ethnography interviews and surveys The book also features transdisciplinary methods unique to the health humanities such as health and social justice studies digital health humanities and community dialogues Each chapter provides learning objectives step by step instructions resources and exercises with illustrations of the method provided by the authors own research An invaluable tool in learning curricular development and research design this volume provides a grounding in the traditions of the humanities fine arts and social sciences for students considering health care careers but also provides useful tools of inquiry for everyone as we are all future patients and future caregivers of a loved one

Spacious Minds Sara E. Lewis,2020-02-15 *Spacious Minds* argues that resilience is not a mere absence of suffering Sara E Lewis s research reveals how those who cope most gracefully may indeed experience deep pain and loss Looking at the Tibetan diaspora she challenges perspectives that liken resilience to the hardness of physical materials suggesting people should bounce back

from adversity More broadly this ethnography calls into question the tendency to use trauma as an organizing principle for all studies of conflict where suffering is understood as an individual problem rooted in psychiatric illness Beyond simply articulating the ways that Tibetan categories of distress are different from biomedical ones Spacious Minds shows how Tibetan Buddhism frames new possibilities for understanding resilience Here the social and religious landscape encourages those exposed to violence to see past events as impermanent and illusory where debriefing working through or processing past events only solidifies suffering and may even cause illness Resilience in Dharamsala is understood as *sems pa chen po* a vast and spacious mind that does not fixate on individual problems but rather uses suffering as an opportunity to generate compassion for others in the endless cycle of samsara A big mind view helps to see suffering in life as ordinary And yet an intriguing paradox occurs As Lewis deftly demonstrates Tibetans in exile have learned that human rights campaigns are predicated on the creation and circulation of the trauma narrative in this way Tibetan activists utilize foreign trauma discourse not for psychological healing but as a political device and act of agency

Introducing Medical Anthropology Merrill Singer, Hans Baer, Debbi Long, Alex Pavlotski, 2019-03-20 The third edition of Introducing Medical Anthropology A Discipline in Action provides students with a first exposure to the growing field of medical and health anthropology The narrative is guided by unifying themes First health oriented anthropologists are very involved in the process of helping to varying degrees to change the world around them through their work in applied projects policy initiatives and advocacy Second the authors present the fundamental importance of culture and social relationships in health and illness by demonstrating that illness and disease involve complex biosocial processes and that resolving them requires attention to a range of factors beyond biology Third through an examination of the issue of health inequality this book underlines the need for an analysis that moves beyond cultural or even ecological models of health toward a comprehensive biosocial approach Such an approach integrates biological cultural and social factors in building unified theoretical understandings of the origin of ill health while contributing to the building of effective and equitable national health care systems NEW TO THIS EDITION All chapters have been updated or expanded NEW Chapter 8 The Biopolitics of Life Biotechnology Biocapital and Bioethics Revised text style for crisper language and livelier phrasing Added a brief signposting of chapter content at the beginning of each chapter and review questions about the key issues and concepts at the end of each chapter Expanded discussion of Zika Ebola gender and health PTSD and psychological anthropology geriatric health the contemporary vaccine controversy the internet and health and the health impacts of fracking and nuclear energy development Concluding chapter examines anthropologically informed strategies and visions for a healthier world

Introducing Health Anthropology Merrill Singer, Hans A. Baer, Debbi Long, Alex Pavlotski, 2025-03-12 With a new title that reflects the broad scope and primary concerns of the field Introducing Health Anthropology A Discipline in Action Fourth Edition provides students with a first look at the dynamic discipline of medical and health anthropology The narrative is guided by four unifying themes First

health anthropologists are heavily involved in the process of helping to better understand and change the world through their work in applied projects policy initiatives and advocacy Second the book presents the fundamental importance of culture and social relationships in health and sickness by demonstrating that experienced illness and diagnosed disease involve complex biosocial processes and that resolving them requires attention to a range of factors beyond biology Third through an examination of health inequality the book highlights the need for research and analyses that move beyond cultural or even ecological models of health toward comprehensive and holistic biosocial frameworks Finally the authors emphasize that physical and mental health are intimately related to the health of the environment on which humans depend for air food and the other resources that make life possible Introducing Health Anthropology gives students the tools to rethink how to achieve healthier populations effective and fully accessible healthcare systems and a sustainable world New to this Edition New Chapter 4 Human Evolution and Health examines the respective roles of genetics and sociocultural factors in health to navigate the welter of public misinformation on genetic determinism race and sex and gender minorities Significantly expanded discussion of reproductive health sex and gender and gender equity throughout the book reflects current and controversial issues in the U S Up to date examination of the relationship of climate change to health and social wellbeing offers students insights on how our physical world is changing and the causes of those changes Discussion of the global impact of COVID 19 throughout the text explores the enduring changes wrought by the pandemic on human societies

The Recovery Revolution Claire D. Clark, 2017-05-02 In the 1960s as illegal drug use grew from a fringe issue to a pervasive public concern a new industry arose to treat the addiction epidemic Over the next five decades the industry s leaders promised to rehabilitate the casualties of the drug culture even as incarceration rates for drug related offenses climbed In this history of addiction treatment Claire D Clark traces the political shift from the radical communitarianism of the 1960s to the conservatism of the Reagan era uncovering the forgotten origins of today s recovery movement Based on extensive interviews with drug rehabilitation professionals and archival research The Recovery Revolution locates the history of treatment activists influence on the development of American drug policy Synanon a controversial drug treatment program launched in California in 1958 emphasized a community based approach to rehabilitation Its associates helped develop the therapeutic community TC model which encouraged peer confrontation as a path to recovery As TC treatment pioneers made mutual aid profitable the model attracted powerful supporters and spread rapidly throughout the country The TC approach was supported as part of the Nixon administration s law and order policies favored in the Reagan administration s antidrug campaigns and remained relevant amid the turbulent drug policies of the late twentieth and early twenty first centuries While many contemporary critics characterize American drug policy as simply the expression of moralizing conservatism or a mask for racial oppression Clark recounts the complicated legacy of the ex addict activists who turned drug treatment into both a product and a political symbol that promoted the impossible dream of a drug free America **The Aesthetics of**

Self-Harm Zoe Alderton, 2018-05-11 The Aesthetics of Self Harm presents a new approach to understanding parasuicidal behaviour based upon an examination of online communities that promote performances of self harm in the pursuit of an idealised beauty The book considers how online communities provide a significant level of support for self harmers and focuses on relevant case studies to establish a new model for the comprehension of the online supportive community To do so Alderton explores discussions of self harm and disordered eating on social networks She examines aesthetic trends that contextualise harmful behavior and help people to perform feelings of sadness and vulnerability online Alderton argues that the traditional understanding of self violence through medical discourse is important but that it misses vital elements of human group activity and the motivating forces of visual imagery Covering psychiatry and psychology rhetoric and sociology this book provides essential reading for psychologists sociologists and anthropologists exploring group dynamics and ritual and rhetoricians who are concerned with the communicative powers of images It should also be of great interest to medical professionals dealing with self harming patients

Drug and Behavioral Addictions During Social-Distancing for the COVID-19 Pandemic Giuseppe Bersani, Fernando Barbosa, Ornella Corazza, Hironobu Fujiwara, 2022-02-21 [Resources in Education](#), 1998 *The Municipal Year Book*, 1996 City Management Intl, 1996-04 [The Municipal Year Book](#), 1934
