

4 Ending the Game

Every chess game ends in one of three results: a win for White, a win for Black, or a draw.

There are 3 common ways to win a game of chess.

1. **Checkmate.** Your opponent's king has nowhere to run.
2. **Resignation.** Your opponent gives up.
3. **Flagging.** Your opponent runs out of time.

CHECKMATE

Checkmating your opponent is the most crucial goal in chess. A checkmate occurs when a king is placed in check and has no legal moves to escape. When a checkmate happens, the game ends immediately, and the player who delivered the checkmate wins.

There are several ways for the game to end in a draw:

Stalemate

Insufficient Material

DRAW BY AGREEMENT

Both players agree to end the game in a draw.

STALEMATE

When the player who has to move has no legal moves available, the game ends immediately in a tie by stalemate.

THREEFOLD REPETITION

If the same exact position is repeated three times (though not necessarily three times in a row) the game is drawn. A position is repeated if all pieces of the same kind and color are on identical squares, and all possible moves are the same.

INSUFFICIENT MATERIAL

If there are not enough pieces on the board to force a checkmate, i.e. only two kings left, or if one player runs out of time but the other does not have the pieces left to produce a checkmate, the game is drawn.

FIFTY MOVE RULE

If fifty consecutive moves (one move being when both players have taken a turn) have been played where neither player has moved a pawn or captured a piece, the game ends in a draw.
