Manual of Digital Earth Huadong Guo, Michael F. Goodchild, Alessandro Annoni, 2019-11-18 This open access book offers a summary of the development of Digital Earth over the past twenty years. By reviewing the initial vision of Digital Earth, the evolution of that vision, the relevant key technologies, and the role of Digital Earth in helping people respond to global challenges, this publication reveals how and why Digital Earth is becoming vital for acquiring, processing, analysing, and mining the rapidly growing volume of global data sets about the Earth. The main aspects of Digital Earth covered here include Digital Earth platforms, remote sensing and navigation satellites, processing and visualizing geospatial information, geospatial information infrastructures, big data and cloud computing, transformation and zooming, artificial intelligence, Internet of Things, and social media. Moreover, the book covers in detail the multi-layered, multi-faceted roles of Digital Earth in response to sustainable development goals, climate changes, and mitigating disasters. The applications of Digital Earth, such as digital city and digital heritage, the citizen science in support of Digital Earth, the economic value of Digital Earth, and so on. This book also reviews the regional and national development of Digital Earth around the world and discusses the role and effect of education and ethics. Lastly, it concludes with a summary of the challenges and forecasts the future trends of Digital Earth. By sharing case studies and a broad range of general and scientific insights into the science and technology of Digital Earth, this book offers an essential introduction for an ever-growing international audience.

Visioning Technologies Graham Cairns, 2016-12-08 *Visioning Technologies* brings together a collection of texts from leading theorists to examine how architecture has been and is reframed and restructured by the visual and theoretical frameworks introduced by different technologies of sight. Understood to include orthographic projection, perspective drawing, telescopic devices, photography, film, and computer visualization, amongst others, each chapter deals with its own area and historical period of expertise, organized sequentially to mark out and analyse the historical evolution of how architecture has been transformed by technologically induced shifts in human perception from the 15th century until today. This book underlines the way in which architectural forms and design processes have developed historically in conjunction with the systems of sight we manufacture, technologically, and suggests this continues today. Paradoxically, it is premised on the argument that these technological systems tend, in their initial formulations, to obtain ever greater realism in our visualizations of the physical world.

Smart and Sustainable Cities and Buildings Rob Roggema, Anouk Roggema, 2020-05-11 This book brings together the papers presented at the Smart and Sustainable Built Environments Conference 2018 SASBE. This latest research falls into two tracks: smart and sustainable design and planning cities, and the technicalities of smart and sustainable buildings. The growth of smart cities is evident but not always linked to sustainability. This book gives an overview of the latest academic developments in increasing the smartness and sustainability of our cities and buildings. Aspects such as inclusivity, smart cities, place and space, the resilient city, urbanity, and urban ecology are prominently featured in the design and planning part.

of the book while energy educational buildings comfort building design construction and performance form the sub themes of the technical part of the book This book will appeal to urban designers architects urban planners smart city designers and sustainable building experts *Making Cities Smarter* Martin Tomitsch,2018 This book provides a practical perspective on the rapidly growing field of smart cities from a user experience perspective More than half of the world s population is now living in cities and predictions suggest that this number will rise to two thirds by 2050 This means that more people than ever before will share the same urban infrastructure leading to a plethora of challenges In order to prepare for this governments around the world are heavily investing in smart city technologies At the same time thought leaders and scholars argue for a movement towards smart citizens and more participatory approaches to city making In *Making cities smarter* Martin Tomitsch focuses on an often overlooked aspect within the smart city discourse the design of the interface between citizens and smart city systems Page 4 de la couverture **From Intelligent to Smart Cities** Mark Deakin,Husam Al Waer,2012-07-05 The concept of smart cities offers a revolutionary vision of urban design for sustainability Utilizing the intelligent application of new technologies smart cities also incorporate considerations of social and environmental capital in order to transform the life and work of cities This book brings together papers from leading international experts on the transition to smart cities Drawing upon the experiences of cities in the USA Canada and Europe the authors describe the definitional components critical insights and institutional means by which we can achieve truly smart cities The resulting volume will be of interest to all involved in urban planning architecture and engineering as well as all interested in urban sustainability This book was published as a special issue of *Intelligent Buildings International* *Smart Cities and Smart Spaces: Concepts, Methodologies, Tools, and Applications* Management Association, Information Resources,2018-09-07 As populations have continued to grow and expand many people have made their homes in cities around the globe With this increase in city living it is becoming vital to create intelligent urban environments that efficiently support this growth and simultaneously provide friendly and progressive environments to both businesses and citizens alike *Smart Cities and Smart Spaces Concepts Methodologies Tools and Applications* is an innovative reference source that discusses social economic and environmental issues surrounding the evolution of smart cities Highlighting a range of topics such as smart destinations urban planning and intelligent communities this multi volume book is designed for engineers architects facility managers policymakers academicians and researchers interested in expanding their knowledge on the emerging trends and topics involving smart cities *Sixteen Shades of Smart: How Cities Can Shape Their Own Future* Christos Cabolis,Chan Heng Chee,Bruno Lanvin,2019-11-11 Smart cities are a fast growing species and a fascinating field for new experiments in a number of critical areas ranging from urban planning sustainable energy and transport strategies to social integration and talent attraction to name a few As leaders and citizens around the world continue to assess design implement and improve on ways to create better cities they often find themselves confronted with a multitude of decisions and a wide range of partial

solutions to specific problems such as traffic congestion waste management and crime Unfortunately they have precious few tools to enable them to define the strategies required and take advantage of the experience of other smart cities around the world In such a context metrics can play a significant and constructive role by quantifying efforts and results they increase the ability of decision makers to identify where their priorities should lie as well as the relative merits of various approaches

Smart Cities, Sustainable Buildings C. J. Lim, Richard Saul Wurman, 2007 **Smart Keys for Smart Eco-friendly Cities** Vimala Swamy, 2020-12-28 About the book Urbanization and industrialization have made cities more chaotic owing to heavy population concentration and heterogeneous activities Hence cities are at risk and face added environmental threats like loss of greenery water bodies open spaces and lack of infrastructure As a result cities are unable to provide better living conditions to its citizens Hence there is a need to modify city planning and design guidelines to make the cities better as per changing trends and requirements Then only cities can provide a better healthier and more comfortable living environment Citizens should enjoy their place of living and work only then will productivity increases The book explores how any city can be designed in a better way to make it smarter and eco friendly It also provides a set of key indicators to be considered in city planning and how best cities can be made more eco friendly based on their context About the Author Dr Vimala Swamy is an academician professional and researcher in architecture and urban planning She has experience in numerous facets of architecture urban planning landscape and interior design Apart from her teaching and professional work she has been doing research and has made presentations at various international and national conferences and has published more than thirty research papers in journals Her doctoral thesis emphasized Eco Friendly Cities which is an issue that is attracting attention worldwide Her areas of interest are modified land use patterns solar passive architecture eco friendly cities and smart cities Dr Swamy received a National Award in the Best Teachers category from A3 Foundation Chandigarh in 2016 and Professor Indira Parikh s 50 Women in Education Award from World Education Congress Mumbai on July 4 2019 **Urban Design** American Institute of Architects.
