**Citizenship Education around the World** John Petrovic,Aaron Kuntz,2014-04-24 Though certainly not a new idea citizenship education manifests in unique and often unpredictable ways in our contemporary neoliberal era The question of what it means to be a productive and recognized citizen must now be understood simultaneously along both global and local lines This edited volume offers an international perspective on citizenship education enacted in specific socio political contexts Each chapter includes a pointed conceptualization of citizenship education a philosophical framework that is then applied to specific national cases across Europe Asia Canada and more Chapters emphasize how such frameworks are implemented within local contexts encouraging particular pedagogical curricular practices even as they constrain others Chapters conclude with suggestions for productive change and how educators might usefully engage contemporary contexts through citizenship education

**Investigative Strategies for Lead-Source Attribution at Superfund Sites Associated with Mining Activities** National Academies of Sciences, Engineering, and Medicine,Division on Earth and Life Studies,Board on Environmental Studies and Toxicology,Committee on Sources of Lead Contamination at or near Superfund Sites,2017-10-31 The Superfund program of the US Environmental Protection Agency EPA was created in the 1980s to address human health and environmental risks posed by abandoned or uncontrolled hazardous waste sites Identification of Superfund sites and their remediation is an expensive multistep process As part of this process EPA attempts to identify parties that are responsible for the contamination and thus financially responsible for remediation Identification of potentially responsible parties is complicated because Superfund sites can have a long history of use and involve contaminants that can have many sources Such is often the case for mining sites that involve metal contamination metals

occur naturally in the environment they can be contaminants in the wastes generated at or released from the sites and they can be used in consumer products which can degrade and release the metals back to the environment This report examines the extent to which various sources contribute to environmental lead contamination at Superfund sites that are near lead mining areas and focuses on sources that contribute to lead contamination at sites near the Southeast Missouri Lead Mining District It recommends potential improvements in approaches used for assessing sources of lead contamination at or near Superfund sites
