Hepato-Pancreato-Biliary Malignancies Cataldo Doria, Jason N. Rogart, 2022-09-30 Hepato Pancreato Biliary cancers are increasing in incidence with pancreatic cancer now accounting for the third most cancer deaths in the United States Typically these malignancies as a group are managed by the same key providers comprising a multidisciplinary team This book is intended to provide a comprehensive review of the current knowledge in the field of hepato pancreato biliary malignancies focusing on the practical and clinical care of patients We take the approach of combining the collective expertise of an interventional gastroenterologist and a hepato pancreato biliary surgeon to provide the readers with accurate succinct and pragmatic information needed to formulate the most appropriate treatment plan for their patients with the aim of the best possible outcome Managing patients with these cancers continues to be challenging because of continued dismal survival rates Each section in this text is written by experts in their respective field summarizing the most state of the art contemporary diagnostic and therapeutic tools available in the field We believe this book will prove to be an invaluable comprehensive resource for all members of the multidisciplinary team caring for patients with hepato pancreato biliary malignancies

Diagnostic Endosonography Klaus Gottlieb, Gustavo Marino, 2013-10-12 The available textbooks on endoscopic ultrasound EUS typically focus on technique and interpretation of commonly observed images and scenarios and are aimed primarily at trainees However independent practitioners of EUS are often challenged by unusual cases which they are expected to handle competently despite the absence of authoritative guidance The Diagnostic Endosonography aims to fill this gap by presenting carefully selected cases that will expand the practitioner s knowledge base and cover important clinical challenges The case material is organized principally according to anatomic site Approximately 170 case reports are included each of which is accompanied by an average of three to five high quality EUS images in addition CT and PET scans are shown when appropriate For each case the case description is followed by helpful teaching points as well as up to date literature references and suggestions for future research

Abdominal and Pelvic Imaging Cases Mukesh G. Harisinghani, 2024-11-01 This book offers a practical evidence based casebook on abdominal imaging As imaging is increasingly being used for most clinical scenarios referring physicians rely on radiologists to provide evidence based interpretation for the incidental and indication related findings seen on the imaging studies While imagers are trained in identifying the findings what makes a report more clinically relevant is the accurate assessment and a more focused differential based on knowing the pertinent evidence based data that supports one diagnosis over the other or favors benign over malignant etiology Imagers typically don't have this information readily available to them to provide and make a more informed impression of the findings seen For example if a hyperdense renal lesion with attenuation of 80 HU is seen on the noncontrast stone protocol CT it is important to know what is the likelihood this lesion is worrisome and if any further investigation is needed While this information is available it is scattered and one needs to acquire synthesize and collate this

from the web This casebook overcomes this void by providing this information in a simplified case based template that any reader can then quickly reference and use in their day to day work In addition template language for dictation where relevant will be provided Cases are organized around major abdominal areas including bowel genitourinary tract and pancreas Each case also includes a table of pearls and pitfalls to be learned and applied to everyday practice This is an ideal guide for residents fellows and staff from radiology as a day to day resource or board review book Given the lack of a comprehensive text this will be useful to all cadres of radiologists
