## **Pediatric Nephrology In The Icu:**

*Pediatric Nephrology in the ICU* Stefan G. Kiessling, Jens Goebel, Michael J.G. Somers, 2008-11-16 The responsibilities of the Pediatric Nephrologist in the Nephrologist and other involved specialists in critical care setting are multifaceted. Management of each individual child with acute renal failure with and without renal replacement therapy is vital. In this first edition of the book we have included chapters focused on general topics in pediatric nephrology. Nephrology emergencies are only some of the major clinical topics that are most germane to the care of the critically ill child. We have tried to look at the clinical situations where the renal specialist is involved in the care of children admitted to the Pediatric Intensive Care Unit from the aspect of both the Pediatric Intensivist and the Care Unit. Due to the complex and specialized care of the renal specialist, we hope that this book will supply the required critical care nephrology. It could even be considered a separate entity compared to the clinical challenges faced in practicing Pediatric Intensive Care. It is treated in the outpatient setting or on the inpatient Nephrology pediatric ward. Critical Care Pediatric Nephrology and Dialysis: A Practical Handbook Sidharth Kumar Sethi, Rupesh Raina, Mignon McCulloch, Timothy E. Bunchman, 2019-02-01 This book covers all key aspects of critical care in pediatric nephrology including acute dialysis in sick children. It also provides detailed protocols for managing fluid and electrolyte balance and dialysis in children in intensive care. In addition, this quick guide discusses innovations in pediatric renal replacement therapy technologies such as plasma exchange, CARPEDIEM, NIDUS, and Aquadex. This is a go-to book for intensivists, physicians, and trainees working in pediatric intensive care units. **Advances in Critical Care Pediatric Nephrology** Sidharth Kumar Sethi, Rupesh Raina, Mignon McCulloch, Timothy E. Bunchman, 2021-02-24 The book covers advances in critical care pediatric nephrology including care of sick children with acute kidney injury. The book contains detailed guidance on point-of-care ultrasound in children with acute kidney injury and use of biomarkers in critically sick children. This is an annual theme-based book with the current theme of point-of-care ultrasound in critical care pediatric nephrology and newer diagnostics in acute kidney injury. This is the first book of the set of books to be published annually with a different theme related to critical care pediatric nephrology each year with the collaboration of the Pediatric Continuous Renal Replacement Therapy (PCRT) Foundation and International Collaboration of Nephrologists/Intensivists for Critical Care in Children (ICONIC). This annual updates book contains 20 chapters written and edited by leading experts in pediatric intensive care, pediatric nephrology, and nephrologists specializing in point-of-care ultrasound from across the globe. It includes top studies in the last few years in critical care pediatric nephrology on point-of-care ultrasound and diagnostics. Chapters cover scientifically updated information by international experts on each topic. It offers assistance to pediatricians, pediatric nephrologists, pediatric intensivists, and residents.
