*The Pellucidar Series: Volumes 1 And 2* Edgar Rice Burroughs, 2014-09-14 Edgar Rice Burroughs September 1 1875 March 19 1950 has obtained lasting fame for his works about the jungle hero Tarzan and also for the heroic Mars adventurer John Carter but he was a voluminous writer who also wrote in many other genres as well Burroughs famously got started out of disdain for others writings noting if people were paid for writing rot such as I read in some of those magazines that I could write stories just as rotten As a matter of fact although I had never written a story I knew absolutely that I could write stories just as entertaining and probably a whole lot more so than any I chanced to read in those magazines The Pellucidar Series details the adventures of the hollow earth land of Pellucidar a theme that is taken for granted in today s science fiction community but was a novelty back when Burroughs wrote it The series consisted of the two stories At the Earth s Core and Pellucidar *Science Fiction and Fantasy Literature, Vol 1* R. Debus,2014-11-21 Over centuries discoveries of fossil bones spawned legends of monsters such as giants and dragons As the field of earth sciences matured during the 19th century early fossilists gained understanding of prehistoric creatures such as Tyrannosaurus Triceratops and Stegosaurus This historical study examines how these genuine beasts morphed in the public imagination into mythical powerful engines of destruction and harbingers of cataclysm taking their place in popular culture film and literature as symbols of lost worlds where time stands still     **Army of Darkness Vol. 4 #1** Cullen Bunn,2014-12-03 As the Chosen One Ash has seen some strange things and visited some strange times and places But nothing has prepared him for this Catapulted into the depths of space Ash must confront the Deadites in a place where no one can hear his screams or his chainsaw or his boomstick What do the forces of the evil dead want with the International Space Station Whatever it is Ash embarks on his most out of this world adventure in order to stop them     **Contesting Earth's History in Transatlantic Literary Culture, 1860-1935** Richard Fallon,2025-02-14 By the mid nineteenth century geologists and palaeontologists had reconstructed an authoritative narrative of Earth's deep history from the planet's molten origins to the rise of humanity Many figures in transatlantic science across subsequent decades however had problems with this narrative it was too secular

inhuman and evolutionary or controlled too exclusively by elite scientists Speaking from palaeoscience's unevenly professionalized and controversy-racked borders Christian fundamentalists, charismatic psychics and respected scholars alike voiced their objections Until now no study has brought their work together for detailed comparative analysis Spanning from the 1860s to the interwar decades *Contesting Earth's History* examines the fascinating stories of five significant examples of fringe or borderline palaeoscience: old and young earth creationism, hollow earth theory, clairvoyant time travel and sunken continent catastrophism Innovatively combining methods from literary studies with the history of science, this book attends not just to the conceptual content of these strange sciences but also to their proponents' communication of truth claims through diverse genres ranging from the scientific textbook and the technical monograph to the lost world romance and the epic poem By paying close attention to the hitherto overlooked textual forms and literary strategies of these works of pseudoscience, this volume throws into relief the variant conceptions of audience, evidence and method that jostled and competed in wider scientific culture during this period It also demonstrates that for all their diversity, authors of borderline palaeoscience shared the desire to shift the balance of power, creating textual spaces where exclusive hierarchies of scientific expertise could be levelled away These conjurors of lost worlds often captivated wide audiences and many of their bizarre, astonishing and iconoclastic ideas remain with us to this day Some even inspired early science fiction by the likes of H P Lovecraft and Edgar Rice Burroughs Hijacking geologists and palaeontologists' longstanding effort at making the prehistoric past visible, authors on the borderlines of palaeoscience asserted their right to scientific authority and encouraged readers to gaze into time's abyss with bold new eyes
