## **Oncofertility Ethical Legal Social And Medical Perspectives Cancer Treatment And Research:**

**Oncofertility** Teresa K. Woodruff, Laurie Zoloth, Lisa Campo-Engelstein, Sarah Rodriguez, 2010-09-02 Oncofertility has emerged as a way to address potential lost or impaired fertility in cancer patients and survivors with active biomedical research that is developing new ways to help these individuals preserve their ability to have biological children In order to move beyond oncofertility as a science and medical technology and begin to address the ethical legal and social ramifications of this emerging field we must give voice to scholars from the humanities and social sciences to engage in a multidisciplinary discussion This book brings together a pool of experts from a variety of fields including communication economics ethics history law religion and sociology to examine the complex issues raised by recent developments in oncofertility and to offer advice from national and international perspectives as we create new technology Given the inherent interdisciplinary nature of oncofertility this book is not only valuable but also necessary to cultivate a deep understanding of new issues with the eventual aim of offering proposals for addressing them Indeed this book will be useful for people not only within the humanities and social sciences disciplines but also for those who are confronted with cancer and the possibility of impaired fertility and the medical practitioners within oncology and reproductive medicine who are at the front lines of this emerging field

Cristina Richie, 2024 In *Environmental Ethics and Medical Reproduction* Dr Cristina Richie uses the term medicalized reproduction MR to describe the impact of technology on human reproduction including from pre conception gamete retrieval in vitro fertilization IVF and birthing suites Unlike other areas of high carbon health care such as organ transplantation or chemotherapy medicalized reproduction does not treat cure or prevent disease It is supported by an economized medical industry and as such is open for ethical scrutiny This book considers how technology has fundamentally changed the discussion on biomedical ethics environmental ethics and reproductive ethics *Family-making* Françoise Baylis, Carolyn McLeod, 2014 This volume explores the ethics of making or expanding families through adoption or technologically assisted reproduction For many people these methods are separate and distinct they can choose either adoption or assisted reproduction But for others these options blend together For example in some jurisdictions the path of assisted reproduction for same sex couples is complicated by the need for the partner who is not genetically related to the resulting child to adopt this child if she wants to become the child's legal parent The essays in this volume critically examine moral choices to pursue adoption assisted reproduction or both and highlight the social norms that can distort decision making Among these norms are those that favour people having biologically related children bionormativity or that privilege a traditional understanding of family as a heterosexual unit with one or more children where both parents are the genetic biological legal and social parents of these children As a whole the book looks at how adoption and assisted reproduction are morally distinct from one another but also emphasizes how the two are morally similar Choosing one the other or both of these approaches to family making can be complex in some respects but ought to be simple in others provided that one's main goal is to become a parent *Third-Party Reproduction* James M. Goldfarb, 2013-10-07 The first IVF conceived birth in 1978 resulted in a significant growth of third party reproductive options which continue to raise ethical legal and psychological questions Third party reproduction procedures can involve as many as five people sperm donor egg donor gestational carrier and intended parents Third Party Reproduction A Comprehensive Guide utilizes experts in the field to address the medical psychological ethical and legal aspects of sperm donation egg donation embryo donation and the use of gestational carriers In addition there are chapters on the medical and ethical aspects of posthumous reproduction religious aspects of third party reproduction and how to avoid pitfalls of third party reproduction Aimed at physicians trainees psychologists nurses and social workers whose practices may include patients considering third party reproduction the intent of this book is to provide a comprehensive and practical overview of the many aspects of third party reproduction to help all those involved to better understand them Patients considering third party reproduction may also find value in this book *Fertilitätserhalt in der Gynäkoonkologie* Tanja N. **Oncofertility Medical Practice** Clarisa Gracia, Teresa K.

Woodruff, 2012-07-12 Oncofertility is a specialty that bridges the disciplines of reproductive endocrinology and infertility and oncology with the goal of expanding the reproductive options of cancer patients. Given fertility risks associated with specific cancer treatments as well as the improved long term survival made possible by these therapies, there has been growing interest in expanding reproductive options for cancer patients. Indeed, both cancer survivors and the medical community have acknowledged the importance of patient counseling and the pursuit of fertility preservation options prior to starting cancer treatment. Oncofertility Medical Practice: Clinical Issues and Implementation is the third in a series of timely and indispensable books on fertility preservation for cancer patients: the first one focused on advances in basic science research and the second one offered ethical, legal, and social perspectives on the theme. This book elucidates the latest practices and emerging treatments in oncofertility and provides necessary information on the successes, risks, and limitations of fertility preserving technologies. Authoritative and insightful, written by an impressive multi-disciplinary cadre of specialists, this book is a valuable up-to-date resource for all those practicing in this demanding field. This excellent text is an invaluable resource and a must-read for clinicians and researchers interested in Oncofertility. The editors and authors need to be congratulated for their fine work. Roger A. Lobo, MD, Professor of Obstetrics and Gynecology, Columbia University and Past President of the American Society for Reproductive Medicine. **Oncofertility**, 2011-04-11

**Textbook of Oncofertility Research and Practice** Teresa K. Woodruff, Divya K. Shah, Wendy S. Vitek, 2019-04-23 Bringing together more than a decade of dedicated investigation and clinical work, this unique textbook is a unified comprehensive source for oncofertility research and medical practice that is both authoritative and up-to-date. It will serve as the primary oncofertility reference for the various medical disciplines that must be coordinated to provide care for young cancer patients. Moreover, it contains case studies that are prismatic for new entrants into the field. The book is organized around the major themes of the discipline and includes current research, clinical practice, emerging technologies, and didactic questions and is divided into six thematic sections: Fertility implications in both oncologic and non-oncologic settings; Options for fertility preservation, both male and female; Care of the oncofertility patient, including contraception and pregnancy considerations; Oncofertility in clinical practice, from setting up a new program to genetic counseling and communication; Ethical and legal considerations; Advances in the basic science of oncofertility. In each chapter, bulleted key learning points and review study questions bookend the text. Six additional sections, comprised exclusively of clinical case studies illustrating the management of both oncologic and non-oncologic conditions, add to the pedagogical value of the text. Timely and utilizing the best current evidence, **Textbook of Oncofertility Research and Practice: A Multidisciplinary Approach** will be an invaluable resource for students, residents, fellows, and professionals in reproductive endocrinology, pediatric endocrinology, adult and pediatric oncology, adult and pediatric urology, breast surgery, radiation oncology, and allied professions where iatrogenic treatments or genetic conditions
