Sustainable Energy for All David Ockwell, Rob Byrne, 2016-08-19 Despite decades of effort and billions of dollars spent two thirds of people in sub Saharan Africa still lack access to electricity a vital pre cursor to economic development and poverty reduction Ambitious international policy commitments seek to address this but scholarship has failed to keep pace with policy ambitions lacking both the empirical basis and the theoretical perspective to inform such transformative policy

aims Sustainable Energy for All aims to fill this gap Through detailed historical analysis of the Kenyan solar PV market the book demonstrates the value of a new theoretical perspective based on Socio Technical Innovation System Building Importantly the book goes beyond a purely academic critique to detail exactly how a Socio Technical Innovation System Building approach might be operationalized in practice facilitating both a detailed plan for future comparative research as well as a clear agenda for policy and practice Chapters 1 and 6 of this book are freely available as downloadable Open Access PDFs at <http://www.taylorfrancis.com> under a Creative Commons Attribution CC BY 4.0 license

Gentile, 2019-10-23 [Breaking the Silos for Planetary Health](#) Nicole de Paula, 2021-10-16 This book translates the latest theoretical perspectives on the emerging field of Planetary Health Studies into the practical reality of global political decision makers It builds on the scientific data on the impacts of environmental change on human health to propose practical methods for operationalizing planetary health The book maps opportunities for decision makers to break institutional silos and engage with bottom up approaches that can transform planetary health from a global idea into a local reality The analysis frames human health in the Anthropocene an era in which humans have become the most powerful force affecting global ecosystems and reveals new existential risks for humankind Departing from ongoing multilateral efforts to promote sustainability the author's analysis places the agenda of planetary health on the desk of political decision makers still underrepresented at planetary health gatherings Given the pressing need to implement sustainable development policies the book presents planetary health as an overarching framework for global policy targets notably the UN Sustainable Development Goals the Paris Agreement on Climate Change and the post 2020 biodiversity framework under the UN Convention on Biological Diversity The book is timely in offering a concrete road map for practitioners and researchers interested in transforming the concept of planetary health into reality With a collection of success stories the analysis dwells on tools for community engagement opportunities for health professionals training gender empowerment digital health and innovative ways to enhance human well being on a changing planet

The Circular Economy and the Global South Patrick Schröder, Manisha Anantharaman, Kartika Anggraeni, Timothy J. Foxon, 2019-04-12 The circular economy is a policy approach and business strategy that aims to improve resource productivity promote sustainable consumption and production and reduce environmental impacts This book examines the relevance of the circular economy in the context of developing countries something which to date is little understood This volume highlights examples of circular economy practices in developing country contexts in relation to small and medium enterprises SMEs informal sector recycling and national policy approaches It examines a broad range of case studies including Argentina Brazil China Colombia India Indonesia Kenya South Africa and Thailand and illustrates how the circular economy can be used as a new lens and possible solution to cross cutting development issues of pollution and waste employment health urbanisation and green industrialisation In addition to

more technical and policy oriented contributions the book also critically discusses existing narratives and pathways of the circular economy in the global North and South and how these differ or possibly even conflict with each other Finally the book critically examines under what conditions the circular economy will be able to reduce global inequalities and promote human development in the context of the Sustainable Development Goals Presenting a unique social sciences perspective on the circular economy discourse this book is relevant to students and scholars studying sustainability in economics business studies environmental politics and development studies

Agronomy for Development James Sumberg, 2017-07-06 Over the last decade there has been renewed interest in food security and the state of the global food system Population growth climate change and food price spikes have combined to focus new attention on the technologies and institutions that underpin the production and consumption of food that is varied nutritious and safe Knowledge politics within development oriented agronomy set the stage for some models of agricultural development to be favoured over others with very real implications for the food security and wellbeing of many millions of people Agronomy for Development demonstrates how the analysis of knowledge politics can shed valuable new light on current debates about agricultural development and food security Using bio physical and social sciences perspectives to address the political economy of the production and use of knowledge in development this edited collection reflects on the changing politics of knowledge within the field of agronomy and the ways in which these politics feed and reflect the interests of a broad set of actors This book is aimed at professionals working in agricultural research as well as students and practitioners of agricultural rural and international development

The Water-Food-Energy Nexus Jeremy Allouche, Carl Middleton, Dipak Gyawali, 2019-04-09 The world of development thinkers and practitioners is abuzz with a new lexicon the idea of the nexus between water food and energy which is intuitively compelling It promises better integration of multiple sectoral elements a better transition to greener economies and sustainable development However there appears to be little agreement on its precise meaning whether it only complements existing environmental governance approaches or how it can be enhanced in national contexts One current approach to the nexus treats it as a risk and security matter while another treats it within economic rationality addressing externalities across sector A third perspective acknowledges it as a fundamentally political process requiring negotiation amongst different actors with distinct perceptions interests and practices This perspective highlights the fact that technical solutions for improving coherence within the nexus may have unintended and negative impacts in other policy areas such as poverty alleviation and education The Water Food Energy Nexus Power Politics and Justice lays out the managerial technical definitions of the nexus and challenges these conceptions by bringing to the forefront the politics of the nexus around two key dimensions a dynamic understanding of water food energy systems and a normative positioning around nexus debates in particular around social justice The authors argue that a shift in nexus governance is required towards approaches where limits to control are acknowledged and more reflexive plural strategies adopted This book will be of interest to academic

researchers policy makers and practitioners in the fields of international development studies environmental politics and science and technology studies as well as international relations

Re-Creating Anthropology David N. Gellner,Dolores P. Martinez,2022-04-26

This book makes a notable contribution to discussions of what anthropology is and should be in the twenty first century through a reconsideration from diverse sub disciplinary and interdisciplinary perspectives of the interactions between sociality matter and the imagination It explores the imagination in its social contexts how it is put to work and how in its embodied and material forms it works in practice The chapters provide detailed case studies including film making in Egypt spirit possession exorcism in Italy Theosophy and

the production of knowledge about UFOs the role of mistakes or glitches in public performances humans varying relationships to the environment post coloniality time and crisis in anthropology and artistic creativity *Women and Wildlife Trafficking* Helen U. Agu, Meredith L. Gore, 2022-03-31 This volume examines women and wildlife trafficking via a collection of narratives case studies and theoretical syntheses from diverse voices and disciplines Wildlife trafficking has been documented in over 120 countries around the world While species extinction and animal abuse are major problems wildlife trafficking is also associated with corruption national insecurity spread of zoonotic disease undercutting sustainable development investments and erosion of cultural resources among others The role of women in wildlife trafficking has remained woefully under addressed with scientists and policymakers failing to consider the important causes and consequences of the gendered dimensions of wildlife trafficking Although the roles of women in wildlife trafficking are mostly unknown they are not unknowable This volume helps fill a lacuna by examining the roles and experiences of women with case studies drawn from across the world including Mexico Cameroon the Central African Republic South Africa and Norway Women can be wildlife trafficking preventors perpetrators and pawns their roles in facilitating wildlife trafficking are considered from both a supply and a demand viewpoint The first half of the book assesses the range of science offering four different perspectives on how women and wildlife trafficking can be studied or evaluated The second half of the book profiles diverse case studies from around the world offering context specific insight about on the ground activities associated with women and wildlife trafficking This book will be of great interest to students and scholars of wildlife crime environmental law human geography conservation gender studies and green criminology It will also be of interest to NGOs and policymakers working to improve efficacy of efforts targeting wildlife crime the illegal wildlife trade and conservation more broadly

Advancing the Science of Environmental Justice in the International Wildlife Trade Jamie K. Reaser, Nicholas King, Gunārs Hauff Platais, Ines Arroyo-Quiroz, Meredith L. Gore, Isla Kirkey, 2025-06-03

The Smithsonian Institution has offered to cover the publication costs of most if not all of the papers accepted for this Research Topic. There is a need to conceptualize an environmental justice framework that informs regulation of the international wildlife trade to minimize species endangerment and infectious disease risks while also affording environmental justice to communities, nations, species, and ecological systems entwined in the commerce pathway. This Research Topic is dedicated to advancing the science of environmental justice in the international wildlife trade from both problems and solutions perspectives. We welcome manuscripts relevant to legal and/or illegal aspects of the international wildlife trade. Submissions must be of a scholarly nature and framed from a social sciences perspective, although interdisciplinary work is encouraged. The international wildlife trade has been recognized as one of the greatest threats to biodiversity as well as a facilitator of zoonotic disease transmission with pandemic potential. This has led to increased calls for regulation of this megabillion-year industry, ranging from comprehensive bans to risk-based strategies that are species, product, and/or geography specific. Every aspect of wildlife commerce and every proposed risk mitigation measure has implications for environmental justice, yet environmental justice has not been mainstreamed in the scientific inquiry, policy, nor planning processes relative to the international wildlife trade. Because wildlife trade has diverse drivers and purposes as well as different levels of legality, social legitimacy, and enforcement, there is an urgent need to understand the environmental justice issues tied to consumer demand vs. supply provision along the trade chain, including how this is influenced by economic, cultural, and geographic biases. An understanding of environmental justice patterns and trends is necessary for the design and support of effective regulatory frameworks that manage risks in actuality rather than merely in concept. Determining where and how to permit and support legal and sustainable wildlife trade versus where it should be more tightly regulated or even cease requires at least as much understanding of the human animal as it does the wildlife species. A greater understanding of the political economy of the illegal aspects of the international wildlife trade from an environmental justice perspective can also open new vistas of green criminological inquiry. Ecological citizenship and environmental justice are central themes in green criminology, highly relevant to the wildlife trade. They recognize justice as central to the right to be protected from harm, whether that is one-on-one harm, institutionalized harm, or harm arising from human actions that affect climates and environments on a global scale. The recognition of such rights in trade regulation is scant and more likely overshadowed by a desire to protect the economic value of a good rather than the inherent value of the wild animal being consumed. We will prioritize papers that use social science approaches/tools to empirically investigate aspects of environmental justice in the international wildlife trade. Manuscripts should be framed so as to facilitate development of an environmental justice

framework that informs regulation of the international wildlife trade to minimize species endangerment and infectious disease risks while also affording environmental justice to communities nations and ecological systems entwined in the commerce pathway We welcome manuscripts relevant to legal and or illegal aspects of the international wildlife trade Submissions must be of a scholarly nature we will not accept advocacy documents The following manuscript types will also be considered if the contributions are sufficiently innovative transformative 1 Case studies of environmental justice problems resolutions in the international wildlife trade context 2 Models for advancing the science of environmental justice in the international wildlife trade context 3 Analyses of international wildlife trade law policy frameworks with a view toward integrating environmental justice issues as rooted in scholarly science All papers should emphasize conservation goals outcomes Direct inquiries about other manuscript themes types to Dr Jamie K Reaser at Reaserjk@si.edu This Research Topic was developed in collaboration with the IUCN Commission on Education and Communication <https://www.iucn.org/our-union/commissions/commission-education-and-communication> and the International Alliance Against Health Risks in the Wildlife Trade <https://alliance.health.wildlife.org>
