**Non-diophantine Arithmetics In Mathematics, Physics And Psychology** Mark Burgin,Marek Czachor,2020-11-04 For a long time all thought there was only one geometry Euclidean geometry Nevertheless in the 19th century many non Euclidean geometries were discovered It took almost two millennia to do this This was the major mathematical discovery and advancement of the 19th century which changed understanding of mathematics and the work of

mathematicians providing innovative insights and tools for mathematical research and applications of mathematics A similar event happened in arithmetic in the 20th century Even longer than with geometry all thought there was only one conventional arithmetic of natural numbers the Diophantine arithmetic in which  $2^2 + 4^2 = 1^2 + 1^2 + 2^2$  It is natural to call the conventional arithmetic by the name Diophantine arithmetic due to the important contributions to arithmetic by Diophantus Nevertheless in the 20th century many non Diophantine arithmetics were discovered in some of which  $2^2 + 5^2 = 1^2 + 1^2 + 3^2$  It took more than two millennia to do this This discovery has even more implications than the discovery of new geometries because all people use arithmetic This book provides a detailed exposition of the theory of non Diophantine arithmetics and its various applications Reading this book the reader will see that on the one hand non Diophantine arithmetics continue the ancient tradition of operating with numbers while on the other hand they introduce extremely original and innovative ideas

**The Power of Ignorance** Dave Trott, 2021-02-09 The wise man knows he doesn't know The fool doesn't know he doesn't know Lao Tzu In the West they only respect experts But the expert mind is the closed mind Shunryu Suzuki What's the most important step in fixing a puncture It isn't jacking up the car or taking the wheel off or finding the puncture There's something more fundamental than any of those Something without which you can't even begin to fix a puncture The most important step is finding out you've got a puncture Without that you can't do anything Instead of saying It's just a bit bumpy must be the road and carrying on you must acknowledge that something has changed and you don't know what that is If you don't admit you don't know what's happening you can never find out If you don't find out you can never change it The most important step always is admitting you don't know That's the power of ignorance In this latest collection of real life stories Dave Trott provides lessons about problem solving and creative thinking that can be applied in advertising business and the wider world With his trademark wit wisdom and critical eye he shows how great problem solvers and creative thinkers are those who are not afraid to say I don't know
