money trading foreign exchange and steps you can take to better understand yourself and improve your trading psychology and discipline Written for currency traders of all skill levels international stock and bond investors corporate treasurers commodity traders and asset managers The Art of Currency Trading offers a comprehensive guide to foreign exchange trading written by a noted expert in the field [Access to Scientific Research](#) David J. Brown,2015-11-13 The debate about access to scientific research raises questions about the current effectiveness of scholarly communication processes This book explores from an independent point of view the current state of the STM publishing market new publishing technologies and business models as well as the information habit of researchers the politics of research funders and the demand for scientific research as a public good The book also investigates the democratisation of science including how the information needs of knowledge workers outside academia can be embraced in future **Changing Face of Information: Support Services for Scientific Research** David J. Brown,2020-01-20 The health of scientific enterprise has become a critical political and social issue as nation states tackle austerity diversity global challenges whilst simultaneously supporting a competitive and innovative national economy A key asset in achieving such ambitions is for a scholarly information system which enables the fruits of the research effort to be disseminated efficiently As the information support system struggles with adapting from a print based to a digital process the dysfunctionality current within STEM publishing in particular becomes evident New ways of supporting research are emerging which require a new approach to publishing an approach which takes on board the many demographic social technical and administrative changes taking place in both science itself and society A radical strategic assessment is required and this book tracks key aspects required for any new future strategy This book provides a catalogue of issues to which a future STEM information industry will need to adapt They range from the effects of technology on the neurological processes of research to the growing use of technology to speed up the exchange of information among groups and laboratories from considerations about quality control yet maintaining intellectual ownership from changing from an elitist STEM system favouring academics to a more democratic process with wider appeal There is the neglected non academic market and its need to share in the results of the research effort often through partnership and being part of a hive mind This is the large world of the unaffiliated knowledge workers of which academia is numerically but a small part The many changes taking place in scholarly information dictate that the future is unlikely to be a smooth and gradual evolution from the past Radical new approaches are required a revolution which takes on board the perfect storm of changes listed in this book Just as such changes have changed the face of industries such as music and retail in recent years so similar dramatic changes are likely to result in a restructuring of STEM into a more technologically focused industry within the next decade The implications for the current STEM stakeholders are profound **Black Enterprise** ,1986-01 BLACK ENTERPRISE is the ultimate source for wealth creation for African American professionals entrepreneurs and corporate executives Every month BLACK ENTERPRISE delivers timely useful information on careers small business and personal
