One World The Interaction Of Science And Theology:

One World John C. Polkinghorne, 2010-06-30 Both science and religion explore aspects of reality providing a basis for their mutual interaction as they present their different perspectives onto the one world of existent reality Polkinghorne argues In *One World* he develops his thesis through an examination of the nature of science the nature of the physical world the character of theology and the modes of thought in science and theology He identifies points of interaction and points of potential conflict between science and religion Along the way he discusses creation determinism prayer miracles and future life and he explains his rejection of scientific reductionism and his defense of natural theology One World J. Polkinghorne, 1986 One World Michael Foreman, 1992 **The Anglican Imagination** Robert Boak Slocum, 2016-03-03

The variety and depth of Anglican theology is best engaged through personal encounter with its many sources the theologians and theological witnesses themselves Anglican theology is often worked out in personal terms that provide a synthesis between reflection on the truths of faith and the particular contexts of culture and life This book presents modern Anglican theology through a unique gallery This theological gallery includes a portrait or sketch of ten Anglican writers DuBose Farrer Stringfellow Brooks Kemper DeKoven McCord Adams Polkinghorne Gore and Macquarrie Theological description interpretation and application are included for each with the presentations differing as widely as the theologians and theological witnesses themselves Drawing together understandings and experiences of faith this will be an invaluable resource for students of Anglican theology and anyone who seeks to understand the distinctive perspectives and contributions of Anglicanism relative to living faith and daily life Seeing the World and Knowing God Paul S.

Fiddes, 2013-07-25 This book aims to create a Christian theology of wisdom for the present day in discussion with two sets of conversation partners The first are writers of the wisdom literature in ancient Israel and the Jewish community in Alexandria Here special attention is given to the biblical books of Proverbs Job and Ecclesiastes The second conversation partners are philosophers and thinkers of the late modern age among them Jacques Derrida Emmanuel Levinas Julia Kristeva Paul Ricoeur and Hannah Arendt In the late modern period there has been a reaction against an inherited conception of the conscious and rational self as mastering and even subjugating the world around and there has been an attempt to overcome the consequent split between the subject and objects of observation Paul S Fiddes enters into dialogue with these late modern concerns about the relation between the self and the world proposing that the wisdom which is indicated by the ancient Hebraic concept of *okmah* integrates a practical wisdom of handling daily experience with the kind of wisdom which is attunement to the world and ultimately to God as creator and sustainer of all Fiddes brings detailed exegesis of texts from the ancient wisdom literature into interaction with an account of the subject in late modern thought in order to form a theology in which seeing the world is knowing a God whose transcendent reality is always immanent in the signs and bodies of the world He thus argues that participation in a triune relational God shapes a wisdom that addresses problems of a dominating self and

Religion and Cultural Freedom Elie Maynard Adams, 1993

Citing his personal quest to reconcile the contradictions among biblical religion democratic liberalism and modern science E M Adams explores the foundations of religion and its role in the culture He asks What would constitute a responsible religion in our time And he determines that for a religion to be credible its tents must be reconcilable with scientific beliefs the historical record the accepted worldview and the creative spiritual and ethical dimensions of human experience In Religion and Cultural Freedom Adams focuses on Judeo-Christian religion in Western civilization and draws on literary historical ethical and philosophical examples Maintaining that religion is logically accountable in its belief system to the culture of which it is a part he illustrates how at different points in history

religious beliefs have been altered or reinterpreted in response to cultural tensions and conflicts This interplay between religion and culture is an essential part of Adams s definition of a responsible religion While he does not think that religion needs to yield to conflicting sectors in the culture he insists that it has a responsibility to work for coherence and intellectual respectability within a free culture During his discussion Adams offers a realistic theory of the language of the humanities and lived experience especially the language of value and meaning and on the basis of this theory he reconstructs the intellectual enterprise and interprets meaning and truth in religious discourse Interested in what he takes to be a negative turn in religious consciousness and the fate of religion in modern Western civilization Adams concludes that the time may be ripe for a humanistic revolution that would create a fully accountable and intellectually credible religion Author note E M Adams is Kenan Professor of Philosophy Emeritus at the University of North Carolina at Chapel Hill He has published ten previous books including *The Metaphysics of Self and World* Temple

Christianity and Ecological Theology E. M.

Conradie,2006-10-01 There has been a proliferation of publications in the field of Christian ecological theology over the last three decades or so These include a number of recent edited volumes each covering a range of topics and consolidating many of the emerging insights in ecological theology The call for Christian churches to respond to the environmental crisis has been reiterated numerous times in this vast corpus of literature also in South Africa *From Eden to Interstellar Space* Sarah Anne Beattie,2025-01-23 This book is a response to two questions The first concerns how we can do better as human beings in addressing the broken relationships between humankind the environment in which we live and the other species with which we coexist in an increasingly fragile world The second concerns whether secular humanism can provide the answer or if there is an important contribution that Christian faith can offer to an understanding of the human condition that will empower effective transformational action The book explores the possibility of developing an interpretive approach to biblical narrative that allows a biblical perspective of reality to provide an important complementary rather than competing supplement to developing scientific perspectives of reality These are perspectives emerging from quantum mechanics and astrophysics that challenge both our conceptual ability and the limits of language in articulating mystery that in resisting physical explanation appears to demand new or different ways of thinking about ourselves and the world in which we live

Between Cross and Resurrection Alan E. Lewis,2003-06-20 For much of Christian history the church has given no place to Holy Saturday in its liturgy or worship Yet the space dividing Calvary and the Garden may be the best place from which to reflect on the meaning of Christ s death and resurrection This superb work by the late Alan Lewis develops on a grand scale and in great detail a theology of Holy Saturday The first comprehensive theology of Holy Saturday ever written *Between Cross and Resurrection* shows that at the center of the biblical story and the church s creed lies a three day narrative Lewis explores the meaning of Holy Saturday the restless day of burial and waiting from the perspectives of narrative hearing the story doctrine thinking the story and ethics living the story Along the way he visits as many spiritual

themes as possible in order to demonstrate the range of topics that take on fresh meaning when viewed from the vantage point of Holy Saturday Between Cross and Resurrection is not only incisive and elegantly written but it is also a uniquely moving work deeply rooted in Christian experience While writing this book Lewis experienced his own Holy Saturday in suffering from and finally succumbing to cancer He considered Between Cross and Resurrection to be the culmination of his life s work

The Trinity, Creation and Pastoral Ministry Graham Buxton,2007-01-01 In this book the author proposes a three way conversation between theology science and pastoral ministry His approach draws on a Trinitarian understanding of God as a relational being of love whose life spills over into all created reality human and nonhuman By locating human meaning and purpose within God s creation community this book offers the possibility of a transforming engagement between those in pastoral ministry and the scientific community

Modality, Logical Probability, and the Trinity Vlastimil Vohánka,2022-10-18 This book in the epistemology of religion discusses a wide spectrum of sources in analytic scholastic and apologetic philosophy and theology in order to argue non deductively for the following thesis Apart from religious experience it cannot be evident in a defined sense of psychological impossibility that the Trinity doctrine is logically possible Hence this conclusion is drawn deductively Apart from religious experience it cannot be evident that Christianity or the Trinity doctrine have non minimal logical probability As the author points out however they still may be justified well argued plausibly logically probable and probable in other than the logical sense The book will be of interest to philosophers of religion analytic theologians and researchers in analytic scholasticism

Christian Faith Peter Crafts Hodgson,2001-01-01 Addresses three issues including the struggle for justice cultural and religious pluralism and ecological and cosmological awareness arguing for the necessity of revising Christian faith in order to handle changing circumstances Original

Scientific Models for Religious Knowledge Andrew Ralls Woodward,2018-08-14 Most comparisons of science and religion are really comparisons of science and Christianity or science and Islam and so forth In *Scientific Models for Religious Knowledge* the author aims to get outside typical polarized debates between traditional a priori theism and radical scientistic naturalism Instead a new science and religion compatibility system between a scientific study of religion and a religious epistemology is our new elusive problem Moreover we shall look at a comparison and contrast of modern science with the simple deference of the human mind to the actions of culturally postulated superhuman agents This book pays critical attention to the contributions of scholars in the philosophy of religion the philosophy of science and the scientific study of religion *Scientific Models for Religious Knowledge* is useful for readers looking to expand their learning in the philosophies of science and religion as these subjects are taught and analyzed in modern research universities

Dew Jr.,2011-01-17 Alister McGrath's work on the relationship between Science and Theology makes the most notable contribution to the subject written by an evangelical in recent history McGrath holds earned doctorates in both science and theology and his three volume set *A Scientific Theology* is the culmination of three decades of his work on the subject In this book James K Dew explores McGrath's contribution to the issue and highlights the benefits of adopting a critical realist perspective such as his own In particular Dew argues that McGrath's approach helps establish a unified theory of knowledge and holds significant advantages for scientists and theologians alike [Turning to the Heavens and the Earth](#) Julia Brumbaugh,Natalia Imperatori-Lee,2016-05-16 The Earth needs our attention the best of our intellectual ethical and spiritual wisdom and action In this collection written in honor of Elizabeth A Johnson scholars from the United States and around the world contribute their insights on how theology today can and must turn to the world in new ways in light of contemporary science and our ecological crisis The essays in this collection advance theological visions for the human task of healing our destructive relationship with the earth and envision hope for our planet's future Contributors Kevin Glauber Ahern Erin Lothes Biviano Lisa Sowle Cahill Colleen Mary Carpenter David Cloutier Kathy Coffey Carol J Dempsey OP Denis Edwards William French Ivone Gebara John F Haught Mary Catherine Hilker OP Sallie McFague Eric Daryl Meyer Richard W Miller Jürgen Moltmann Jeannette Rodriguez Michele Saracino *God's Action in the World* Marek Slomka,2021-04-22 The problem of God's action in the world is at the heart of debates today on the relationship between science and religion By analysing the issue through the lens of analytic philosophy Marek Slomka reveals how philosophy can successfully bridge science and theology to bring greater clarity to divine action This book identifies essential aspects from various branches of theism starting with traditional Thomistic approaches through to their modified forms such as Molinism and contemporary varieties such as free will theism and probabilistic theism Analysing crucial elements of God's nature including omnipotence omniscience his relation to time and the tension between immanence and transcendence Slomka reveals the difficulties in proposing a single conception of God through one theistic tradition Instead of simplistically juxtaposing particular theistic trends he highlights the value of pluralistic insights that also draw on important scientific theories including Darwin's evolution quantum mechanics and cosmology By taking a renewed stance on theism that takes into account modern scientific knowledge Slomka argues for a new presentation of the problem of God's action in the world **The New Apologetics** Ian S. Markham,2020-03-27 Skepticism about Christianity abounds Building on the work of Charles Taylor Ian S Markham argues that contemporary skepticism is more a mood than an intellectual repudiation of Christian theology In its attempt to accommodate science the church too often opts for deistic responses that take the spiritual out of the material Against this response Markham argues for a rich imaginative account of the world that is grounded in Christian revelation and affirms

spiritual causation angels and the reality of the saints It is a clarion call for the Western church to learn from the church in the Global South and create a rich theology that lives up to its professed values as a genuinely inclusive church
