Time, Language, and Ontology M. Joshua Mozersky, 2015-01-29 This book brings together in a novel way an account of the structure of time with an account of our language and thought about time Joshua Mozersky argues that it is possible to reconcile the human experience of time which is centred on the present with the objective conception of time according to which all moments are intrinsically alike He defends a temporally centreless ontology along with a tenseless semantics that is compatible with and indeed helps to explain the need for tensed language and thought This theory of time

also it is argued helps to elucidate the nature of change and temporal passage neither of which need be denied nor relegated to the realm of subjective experience only The book addresses a variety of topics including whether the past and future are real whether temporal passage is a genuine phenomenon or merely a subjective illusion how the asymmetry of time is to be understood the nature of representation how something can change its properties yet retain its identity and whether objects are three dimensional or four dimensional It is a wide ranging examination of recent issues in metaphysics philosophy of language and the philosophy of science and presents a compelling picture of the relationship of human beings to the spatiotemporal world

Minority Student Retention Alan Seidman, 2019-05-23 Student retention continues to be a vexing problem for all colleges and universities In spite of the money spent on creating programs and services to help retain students until they achieve their academic and personal goals and graduate the figures have not improved over time This is particularly true for minority students who have a greater attrition rate than majority students Demographic information shows that the minority population in the United States is growing at a faster rate than the majority It is imperative that educational institutions find ways to help improve retention rates for all students but particularly minority students Retention rates should not differ appreciably among different racial ethnic groups The Journal of College Student Retention Research Theory and Practice is the only scholarly peer reviewed journal devoted solely to college student retention It has published many articles on minority student retention and this topic continues to garner much attention This book is a compilation of the very best of these articles selected on the basis of reviews by a cadre of experts in the education field The articles discuss African American Latino Latina Asian and Asian Pacific Native American and biracial students and institutional commitments to retaining a diverse student population For those interested in this vital area the collection will teach and inspire them to achieve greater heights and pay additional attention to retaining minority students in our colleges and universities

Eliminativism, Objects, and Persons Jiri Benovsky, 2018-09-03 In Eliminativism Objects and Persons Jiri Benovsky defends the view that he doesn't exist In this book he also defends the view that this book itself doesn't exist But this did not prevent him to write the book and although in Benovsky's view you don't exist either this does not prevent you to read it Benovsky defends a brand of non exceptionalist eliminativism Some eliminativists typically focusing on ordinary material objects such as chairs and hammers make exceptions for instance for blue whales that is living beings or for persons that is conscious organisms Benovsky takes one by one all types of allegedly existing objects like chairs whales and persons and shows that from the metaphysical point of view they are more trouble than they are worth we are much better off without them He thus defends an eliminativist view about ordinary objects as well as the no Self view where he explores connections between metaphysics phenomenology and Buddhist thought He then also considers the case of aesthetic objects focusing on musical works and photographs and shows that the claim of their non existence solves the many problems that arise when one tries to find an appropriate ontological category for them and that such an eliminativist view is more natural than what

we might have thought The arguments provided here are always topic specific each type of entity is given its own type of treatment thus proving a varied and solid foundation for a generalized non exceptionalist full blown eliminativist worldview

The Gospel according to Mark Camille Focant,2012-07-06 The world to which the Gospel of Mark introduces its reader is a world of conflicts and suspense enigmas and secrets questions and overturning of evidence irony and surprise Its principal actor Jesus is perplexing in the extreme He is evidently so for the religious authorities who oppose him but also for his disciples who shift from incomprehension to opposition and flight Questions of meaning life and death good and evil are continually broached This narrative is a subtle invitation to enter into a new world that of the coming Reign of God in which the first are last and whoever wants to save his life must lose it This commentary on the Gospel of Mark has been enthusiastically reviewed in the French edition as one of the best current commentaries on Mark As a narrative critical commentary it favors an interpretation of the Gospel that tries to grasp the dynamic of the text taken as a whole Even if the technical vocabulary of narrative analysis is not used and the main results of the historical critical criticism particularly those of redaction criticism are not neglected as the notes will reveal it is narrative criticism that guides the proceedings *Scope of Soviet Activity in the United States* United States.
