Timothy, 2015-11-19 Food is

one of the most fundamental elements of culture and a significant marker of regional and ethnic identity. It encompasses many other elements of cultural heritage beyond the physical ingredients required for its production. These include folklore, religion, language, familial bonds, social structures, environmental determinism, celebrations and ceremonies, landscapes, culinary routes, smells and tastes to name but a few. However, despite all that is known about foodways and cuisine from hospitality, gastronomic, supply chain and agricultural perspectives, there still remains a dearth of consolidated research on the wide diversity of food and its heritage attributes and contexts. This edited volume aims to fill this void by consolidating into a single volume what is known about cuisines and foodways from a heritage perspective and to examine and challenge the existing paradigms, concepts and practices related to gastronomic practices, intergenerational traditions, sustainable agriculture, indigenous rituals, immigrant stories and many more heritage elements as they pertain to comestible cuisines and practices. The book takes a global and thematic approach in examining heritage cuisines from a wide range of perspectives including agriculture, hunting and gathering, migration, ethnic identity and place, nationalism, sustainability, colonialism, food diversity, religion, place making, festivals and contemporary movements and trends. All chapters are rich in empirical examples but steady and sound in conceptual depth. This book offers new insight and understanding of the heritage implications of cuisines and foodways. The multidisciplinary nature of the content will appeal to a broad academic audience in the fields of tourism, gastronomy, geography, cultural studies, anthropology and sociology.

China reviews the history of China's astounding economic growth and geopolitical development over the past 30 years. It explores the economic, technological, and global development of China during this period, explores the political philosophy and praxis from imperial neo-Confucian times to the present socialist regime, the cultural and social development of China, and the role of the Chinese diaspora, and examines the prospects for a new international order with a major role for China. This book will fit comfortably into the required reading schedule for graduate class modules in Chinese and East Asian studies, political theory, economic development, and contemporary political history. Of particular interest will be the exploration of the role of the Chinese diaspora in modern China's development. The authors' focus on the contemporary conflict between the US and China will also be of wider interest to political commentators as well as academic researchers in Chinese studies. The Re-Emergence of China can provide a guiding narrative for academics, researchers, policymakers, industry leaders, and many other relevant professionals on how global society can be reshaped in the wake of China's re-emergence in the new global era. By focusing on China's integration with the economic and political world order in terms of both its advances and setbacks, in addition to the historical contexts, readers can navigate the book's succinct coverage and conclusions on the development of a China polity which has become increasingly connected to the world in some ways yet more disconnected in others.
