**Whole Earth** John Markoff, 2022-03-22 Told by one of our greatest chroniclers of technology and society the definitive biography of iconic serial visionary Stewart Brand from the Merry Pranksters and the generation defining Whole Earth Catalog to the marriage of environmental consciousness and hacker capitalism and the rise of a new planetary culture the story behind so many other stories Stewart Brand has long been famous if you know who he is but for many people outside the counterculture early computing or the environmental movement he is perhaps best known for his famous mantra Stay Hungry Stay Foolish Steve Jobs's endorsement of these words as his code to live by is fitting Brand has played many roles but one of the most important is as a model for how to live The contradictions are striking A blond haired WASP with a modest family inheritance Brand went to Exeter and Stanford and was an army veteran but in California in the 1960s he became an artist and a photographer in the thick of the LSD revolution While tripping on acid on the roof of his building he envisioned how valuable it would be for humans to see a photograph of the planet they shared from space an image that in the end landed on the cover of his Whole Earth Catalog the defining publication of the counterculture He married a Native American woman and was committed to protecting indigenous culture which connected to a broader environmentalist mission that has been a through line of his life At the same time he has outraged purists because of his pragmatic embrace of useful technologies including nuclear power in the fight against climate change The famous tagline promise of his catalog was Access to Tools with rare exceptions he rejected politics for a focus on direct power It was no wonder then that he was early to the promise of the computer revolution and helped define it for the wider world Brand's life can be hard to fit onto one screen John Markoff also a great chronicler of tech culture has done something extraordinary in unfolding the rich twisting story of Brand's life against its proper landscape As Markoff makes marvelously

clear the streams of individualism respect for science environmentalism and Eastern and indigenous thought that flow through Brand's entire life form a powerful gestalt a California state of mind that has a hegemonic power to this day His way of thinking embraces a true planetary consciousness that may be the best hope we humans collectively have
