Digitized Institutions Jessie Daniels, Karen Gregory, Tressie McMillan Cottom, 2016-11-18 A key sociological insight is that institutions whether education the economy politics or the media shape the contours of individual life and drive inequality In this Byte the contributions take up the way that digitally mediated social processes are transforming institutions The writing here examines the interconnectedness of institutions and considers digitization across schooling work and media with an eye toward how inequality works Together these selections yield important insights into critical features of the institutions that mediate our digitized society arguing that digital sociology s greatest challenge is measuring inequalities that are produced by society s datalogical turn [The New College Classroom](#)

Cathy N. Davidson, Christina Katopodis, 2022-08-30 College still looks like it did a century ago with instructors delivering

lectures to silent rows of students Yet research shows unambiguously that active learning is more effective and inclusive The New College Classroom translates the evidence into hands on guidance for teachers in every discipline and institution so all students can excel

Can Democracy and Capitalism Be Reconciled? Sidney M. Milkis, White Burkett Miller Professor of Politics Sidney M Milkis, 2025 In *Can Capitalism and Democracy Be Reconciled* Sidney M Milkis and Scott C Miller have gathered a truly eminent cast of contributors to provide a multidisciplinary examination of the intersection of capitalist economic systems and democratic societies across time and space Featuring twenty four essays from scholars across nine different academic fields the volume interrogates the ideas history and policy behind these two principal elements of liberal society The volume begins with an introduction that explores the vibrant historical debate over whether democracy and capitalism can and should coexist in America and further analyzes the places where democracy and capitalism thrive and diverge and the systemic adjustments needed to sustain democratic capitalism in the future

The University Unfettered Ian F. McNeely, 2025-05-13 The public university as we once knew it is gone and never coming back After generations of fickle state support public universities behave more and more like their private counterparts charging what the market will bear offering what consumers demand competing

relentlessly with peers and managing their own priorities But looking back on how we got here offers surprising reassurance U S public universities emerged largely intact after a decade of disruption bookended by a financial crisis and a pandemic Resisting widespread calls for corporate reinvention or disruptive innovation they hewed to their core missions If anything exposure to the rigors of competition only enhanced their longstanding commitments to the public good The University Unfettered tells the story of a single public research university that was a generation ahead of its peers in repositioning itself for an independent future It answers eight fundamental questions about how any contemporary university balances competing missions questions about how money is spent how education and knowledge are pursued and how decisions get made Each chapter blends deeply informed reconstruction of strategic decisions at one university with concise analyses of the entire sector An unparalleled account of how a typical public university really works this book makes a timely and distinctive case for the nonelite institutions that educate the vast majority of America s college students Rebutting critiques from both left and right it offers a refreshingly optimistic outlook on higher education today **The New Education** Cathy N. Davidson, 2017-09-05 A leading educational thinker argues that the American university is stuck in the past and shows how we can revolutionize it for our era of constant change Our current system of higher education dates to the period from 1865 to 1925 It was in those decades that the nation s new universities created grades and departments majors and minors all in an attempt to prepare young people for a world transformed by the telegraph and the Model T As Cathy N Davidson argues in **The New Education** this approach to education is wholly unsuited to the era of the gig economy From the Ivy League to community colleges she introduces us to innovators who are remaking college for our own time by emphasizing student centered learning that values creativity in the face of change above all **The New Education** ultimately shows how we can teach students not only to survive but to thrive amid the challenges to come **Degrees of Inequality** Suzanne Mettler, 2014-03-11 America s higher education system is failing its students In the space of a generation we have gone from being the best educated society in the world to one surpassed by eleven other nations in college graduation rates Higher education is evolving into a caste system with separate and unequal tiers that take in students from different socio economic backgrounds and leave them more unequal than when they first enrolled Until the 1970s the United States had a proud history of promoting higher education for its citizens The Morrill Act the G I Bill and Pell Grants enabled Americans from across the income spectrum to attend college and the nation led the world in the percentage of young adults with baccalaureate degrees Yet since 1980 progress has stalled Young adults from low to middle income families are not much more likely to graduate from college than four decades ago When less advantaged students do attend they are largely sequestered into inferior and often profit driven institutions from which many emerge without degrees and shouldering crushing levels of debt In **Degrees of Inequality** acclaimed political scientist Suzanne Mettler explains why the system has gone so horribly wrong and why the American Dream is increasingly out of reach for so many In her eye opening account she

illuminates how political partisanship has overshadowed America's commitment to equal access to higher education. As politicians capitulate to corporate interests, owners of for-profit colleges benefit, but for far too many students, higher education leaves them with little besides crippling student loan debt. Meanwhile, the nation's public universities have shifted the burden of rising costs onto students. In an era when a college degree is more linked than ever before to individual and societal well-being, these pressures conspire to make it increasingly difficult for students to stay in school long enough to graduate. By abandoning their commitment to students, politicians are imperiling our highest ideals as a nation.

Degrees of Inequality offers an impassioned call to reform a higher education system that has come to exacerbate rather than mitigate socioeconomic inequality in America. — *A Dream Defaulted* Jason N. Houle, Fenaba R. Addo, 2022-08-16

A Dream Defaulted explores how the student loan crisis disproportionately affects Black borrowers and why rising student debt is both a cause and consequence of social inequality in the United States. Jason N. Houle and Fenaba R. Addo offer a deft analysis of the growing financial crisis in education, examining its sources and its impacts. Based on more than five years of ongoing qualitative and quantitative research, this incisive work illustrates how the student loan system has not benefited all students equally. The authors tell the story of how first-generation college students, low-income students, and students of color are disadvantaged in two opposing phases of the process: debt accumulation and debt repayment. They further demonstrate that policies intended to mitigate financial burden and prevent default have failed to assist the people who most need help. Houle and Addo present these social and racial disparities within a broader context, tracing how centuries of institutionalized racism have contributed to social and economic inequities, perpetuating the racial wealth gap and leading to intergenerational inequality. Through interviews with borrowers, they illuminate the ways in which racial disparities affect who has college access, how and why people take on debt, and who has the ability to repay student loan debt after leaving college. Recognizing that the affordability crisis cannot be solved by higher education reform alone, Houle and Addo consider solutions. They argue that policy must extend beyond debt reduction and financial aid to address entrenched patterns of racial inequality and racial discrimination, both inside and outside institutions of higher education. — *Back in School* A. Fiona Pearson, 2019-07-12

Fifty years ago, students who were parents were a rarity in college classrooms, but by the beginning of the twenty-first century, over a quarter of all undergraduate students were parents. In *Back in School*, A. Fiona Pearson explores how these student parents navigate cultural norms and institutional resources, forging pathways as they journey to become better parents and successful students. *Back in School* examines how policy makers, professors, college administrators, counselors, and social workers provide or deny access to child care, tutoring, financial aid, or other campus or community-based resources. Pearson further explores how social norms and governmental and organizational policies influence access to these resources and student parents' experiences on campus and at home. — *The Post-Pandemic Liberal Arts College* Steve Volk, Beth Benedix, 2020-12-08

A succinct and impassioned call to reimagine and revive the small liberal arts college by two veteran

educators Private liberal arts colleges have struggled for decades now as the COVID 19 pandemic widens cracks latent in many American institutions they are facing a possibly mortal crisis In *The Post Pandemic Liberal Arts College A Manifesto for Reinvention* Steven Volk and Beth Benedix call for small colleges to seize this moment and reinvent themselves With the rise of rankings that set peer institutions against each other tuition that outpaces income creeping pre professionalism and a race to build student customers the splashiest new amenities many private liberal arts colleges have strayed from their founders missions If they could shed the mantle of exclusivity reduce costs facilitate true social mobility and collaborate with each other the authors argue they might both survive and again become just equitable accessible institutions able to offer the transformative and visionary education that is their hallmark Educators students parents and anyone invested in the future of higher education should read this book

Like Nobody's Business Andrew C. Comrie, 2021-02-23 How do university finances really work From flagship public research universities to small private liberal arts colleges there are few aspects of these institutions associated with more confusion myths or lack of understanding than how they fund themselves and function in the business of higher education Using simple approachable explanations supported by clear illustrations this book takes the reader on an engaging and enlightening tour of how the money flows How does the university really pay for itself Why do tuition and fees rise so fast Why do universities lose money on research Do most donations go to athletics Grounded in hard data original analyses and the practical experience of a seasoned administrator this book provides refreshingly clear answers and comprehensive insights for anyone on or off campus who is interested in the business of the university how it earns its money how it spends it and how it all works

Higher Education, Stratification, and Workforce Development Sheila Slaughter, Barrett Jay Taylor, 2015-11-17 This work analyses how political economic shifts contribute to competition within higher education systems in the US EU and Canada The authors highlight competition for prestige and public and private

subsidies exploring the consequences of these processes through theoretical and empirical analyses Accordingly the work highlights topics that will be of interest to a wide range of audiences Concepts addressed include stratification privatization of formerly public subsidies preference for high tech academic fields and the vocationalization of the curriculum i e Science Technology Engineering and Mathematics STEM fields selected professions and business rather than the liberal arts or the Humboldtian vision of the university Across national contexts and analytic methods authors analyze the growth of national policies that see universities as a sub set of economic development casting universities as corporate research laboratories and education as central to job creation Throughout the volume the authors make the case that national and regional approaches to politics and markets result in different experiences of consequences of academic capitalism While these shifts serve the interests of some institutions others find themselves struggling to meet ever greater expectations with stagnant or shrinking resource bases
