Learning Bradley R. Staats, 2018-05-15 Keep learning or risk becoming irrelevant. It's a truism in today's economy: the only constant is change. Technological automation is making jobs less routine and more cognitively challenging. Globalization means you're competing with workers around the world. Simultaneously, the internet and other communication technologies have radically increased the potential impact of individual knowledge. The relentless dynamism of these forces shaping our lives has created a new imperative: we must strive to become dynamic learners. In every industry and sector, dynamic learners outperform their peers and realize higher impact and fulfillment by learning continuously and by leveraging that learning to build yet more knowledge. In *Never Stop Learning*, behavioral scientist and operations expert Bradley R. Staats describes the

principles and practices that comprise dynamic learning and outlines a framework to help you become more effective as a lifelong learner The steps include Valuing failure Focusing on process not outcome and on questions not answers Making time for reflection Learning to be true to yourself by playing to your strengths Pairing specialization with variety Treating others as learning partners Replete with the most recent research about how we learn as well as engaging stories that show how real learning happens Never Stop Learning will become the operating manual for leaders managers and anyone who wants to keep thriving in the new world of work Focus On: 100 Most Popular United States National Medal of Arts Recipients Wikipedia contributors, Braille Books Library of Congress. correspondence write their own autobiographies and appoint family or friends to protect their reputations as official biographers Thomas Hardy went so far as to compose his own life story to be published after his death while falsely assigning authorship to his widow After a brief background sketch of the history of biography from Greco Roman times to the present Donaldson recounts his experiences in writing biographies of a broad range of twentieth century American writers Ernest Hemingway F Scott Fitzgerald John Cheever Archibald MacLeish Edwin Arlington Robinson Winfield Townley Scott and Charlie Fenton Donaldson provides readers with a highly readable insiders introduction to literary biography He suggests how to conduct interviews and what not to do during the process He offers sound advice about how closely biographers should identify with their subjects He examines the ethical obligations of the biographer who must aim for the truth without unduly or unnecessarily causing discomfort or worse to survivors He shows us why and how misinformation comes into existence and tends to persist over time He describes the mythical ideal biographer an imaginary creature of universal intelligence and myriad talents beyond the reach of any single human being And he suggests how its very impossibility makes the goal of writing a biography that captures the personality of an author a challenge well worth pursuing
