Peacekeeping From Below Un Missions And Local People:

Peace Operations Seen from Below Béatrice Pouligny, 2006 In Peace Operations Seen from Below Beatrice Pouligny argues that much of what is being rebuilt in societies emerging from war or in some cases what is continuing to be destroyed often lies in the ordinary daily lives of both local populations and the staff of UN missions These on the ground realities are often overlooked by outsiders yet they may prove to be as important as political negotiations at the center debates in the UN Security Council or hearings before an International Criminal Court Central to Pouligny s study is the key role played by local interlocutors Her close analysis of several UN interventions based on first hand observation of how local people intermingle with UN soldiery and civilians sheds light on a neglected but crucial dimension of international peace enforcement BOOK JACKET

UN Peace Operations and International Policing Charles T. Hunt, 2014-09-15 This book addresses the important question of how the United Nations UN should monitor and evaluate the impact of police in its peace operations UN peace operations are a vital component of international conflict management Since the end of the Cold War one of the foremost developments has been the rise of UN policing UNPOL Instances of UNPOL action have increased dramatically in number and have evolved from passive observation to participation in frontline law enforcement activities Attempts to ascertain the impact of UNPOL activities have proven inadequate This book seeks to redress this lacuna by investigating the ways in which the effects of peace operations and UNPOL in particular are monitored and evaluated Furthermore it aims to develop a framework tested through field research in Liberia for Monitoring and Evaluation M E that enables more effective impact assessment By enhancing the relationship between field level M E and organisational learning this research aims to make an important contribution to the pursuit of more professional and effective UN peace operations This book will be of much interest to students of peace operations conflict management policing security studies and IR in general

Peacekeeping Under Fire Robert A. Rubinstein, 2015-11-17 The international community increasingly responds to civil wars humanitarian crises and other intrastate conflicts through the instrument of UN peacekeeping Nearly all of these interventions take place in non Western areas and involve interactions among militaries and nongovernmental organizations from all around the globe In this wide ranging book Rubinstein draws on decades of his own research on peacekeeping and on other current and historical cases to develop a broad understanding of the roles that culture plays in peacekeeping s success or failure Peacekeeping under Fire shows that cultural considerations are key elements at all levels of peacekeeping operations Culture influences what happens between peacekeepers and local populations how military and nongovernmental organizations interact and even how missions are planned and authorized Peacekeeping under Fire analyzes how political symbolism and ritual are critical to peacekeeping and demonstrates how questions of power identity and political perception emerge from the cultural context of peacekeeping

The EU, the UN and Collective Security Joachim Krause, Natalino Ronzitti, 2012 This book examines the effectiveness of multilateralism in ensuring collective security and in particular the EU

s role in this process In 1992 shortly after the end of the Cold War a Security Council Summit in New York reaffirmed the salience of the system of collective security and stated the determination of the Heads of State to maintain it as the prime international instrument for preserving peace Twenty years later however the record of collective security as well as of multilateralism has not been very encouraging The system of collective security as enshrined in the United Nations UN Charter failed repeatedly to accomplish its mandate in the 1990s and has led to controversial debates in the United States and Europe that reached a climax during the Iraq crisis in 2002 03 The volume draws upon both theoretical and empirical research to answer the following core questions What are the reasons that have made multilateralism either effective or ineffective in the field of peacekeeping peace preservation and peacebuilding How can multilateralism be made more effective How can attempts made by Europe to render UN multilateralism in the security area more efficient be assessed This book will be of much interest to students of peacebuilding peacekeeping EU policy the UN security studies and IR in general

Regulation of Sexual Conduct in UN Peacekeeping Operations Olivera Simic, 2012-05-25 This book critically examines the response of the United Nations UN to the problem of sexual exploitation in UN Peace Support Operations It assesses the Secretary General's Bulletin on Special Protection from Sexual Exploitation and Sexual Abuse 2003 SGB and its definition of sexual exploitation which includes sexual relationships and prostitution With reference to people affected by the policy using the example of Bosnian women and UN peacekeepers and taking account of both radical and sex positive feminist perspectives the book finds that the inclusion of consensual sexual relationships and prostitution in the definition of sexual exploitation is not tenable The book argues that the SGB is overprotective relies on negative gender and imperial stereotypes and is out of step with international human rights norms and gender equality It concludes that the SGB must be revised in consultation with those affected by it namely local women and peacekeepers and must fully respect their human rights and freedoms particularly the right to privacy and sexuality rights

Sex in Peace Operations Gabrielle Simm, 2013-04-25 This book critically re evaluates the problem of sex between international personnel and local people and offers regulatory solutions to legal problems

African Peacekeeping Training Centres Anne Flaspöler, 2018-10-26 Peacekeeping training centres play a crucial role in preparing peacekeepers for their deployment However despite their popularity within the international community as a tool for achieving international security development and state building objectives they have not received a great deal of analysis or academic attention This book provides an in depth analysis of peacekeeping training in Africa tracing how centres have adapted to the operational and normative changes of peace operations over time and raising questions about the expectations attached to these training efforts and their impact The book examines training content and methods in detail exploring the potential of peacekeeping training centres as sites for socialisation and diffusing international norms in an effort to change and shape peacekeepers behaviour The analysis is based on two contrasting case studies selected to show the spectrum of training centres operating in Africa namely the Kofi Annan International

Peacekeeping Training Centre KAIPTC in Accra Ghana and the African Centre for the Constructive Resolution of Disputes ACCORD in Durban South Africa At a time when impact is being determined by the number of course attendees this book provides an important critical assessment of training efforts and what they are supposed to achieve It will be of interest to scholars and practitioners within the fields of international security peacekeeping and African development **The End of Peacekeeping** Marsha Henry,2024-03-12 In *The End of Peacekeeping* Marsha Henry makes use of feminist postcolonial and anti militarist frameworks to expose peacekeeping as an epistemic power project in need of abolition Drawing on critical concepts from Black feminist thought and from postcolonial and critical race theories Henry shows how contemporary peacekeeping produces gender and racial inequalities through increasingly militarized strategies The book s intersectional analysis of peacekeeping is based on data amassed through more than fifteen years of ethnographic fieldwork on peacekeeping missions and training centers around the world including interviews with UN peacekeepers humanitarian aid personnel and local populations Henry demonstrates how focus on the policy and practice of peacekeeping has obscured the geopolitical knowledge project at peacekeeping s root allowing its harms to persist unquestioned by mainstream scholarship Arguing that we must recover critical theoretical contributions that have been sidelined within the field she brings the insights of feminist and postcolonial scholarship to bear on peacekeeping studies whose production of empirical data and evidence continues to provide the justification and foundation for policy and global governance actions Revealing that peacekeeping is not the benign apolitical project it is often purported to be this book encourages readers to imagine and enact alternative futures to peacekeeping **Handbook on Peacekeeping and International Relations** Han Dorussen,2022-12-06 Integrating comparative empirical studies with cutting edge theory this dynamic Handbook provides a comprehensive overview of the study and practice of peacekeeping Han Dorussen brings together a diverse range of contributions which represent the most recent generation of peacekeeping research embodying notable shifts in the kinds of questions asked as well as the data and methods employed **Sexual Exploitation and Abuse in UN Peacekeeping** Kelly Neudorfer,2014-12-31 While serving in United Nations peacekeeping missions some peacekeepers sexually exploit and abuse the local population a fact which erupted into a scandal published by many media outlets in 2005 and 2006 This book analyzes factors which may increase the risk of such behavior as well as measures the UN has taken which may have decreased the number of incidents Using a mixed methods design the book argues that previous analyses have been largely undertheorized with the exception of gender theories and turns to criminology to look at the phenomenon of so called Sexual Exploitation and Abuse SEA in a new light The three risk factors found to increase the likelihood of SEAs are an environment of sexual violence in the mission s host country the presence of internally displaced persons close to the mission and a lack of supervised or regulated contact with the local population In turn the presence of an office whose purpose is to collect reports and investigate allegations training on preventing SEAs for the incoming peacekeepers and campaigns to empower the local

population on these issues all seem to reduce the risk of sexual exploitation and abuse occurring. By using a statistical analysis followed by case studies of the UN peacekeeping missions in the Democratic Republic of the Congo, Liberia and the Golan Heights, the author demonstrates the importance these factors have in the peacekeepers' behavior on the mission, providing a solid basis upon which future policy recommendations can be made.

The Oxford Handbook of Women, Peace and Security Sara E. Davies, Jacqui True, 2019. Passed in 2000, the United Nations Security Council Resolution 1325 and subsequent seven Resolutions make up the Women, Peace and Security (WPS) agenda. This agenda is an international policy framework addressing the gender-specific impacts of conflict on women and girls, including protection against sexual and gender-based violence, promotion of women's participation in peace and security processes, and support for women's roles as peace builders in the prevention of conflict and rebuilding of societies after conflict. The handbook addresses the concepts and early history behind WPS, international institutions involved with the WPS agenda, the implementation of WPS in conflict prevention, and connections between WPS and other UN resolutions and agendas.

Modern War and the Utility of Force Isabelle Duyvesteyn, Jan Angstrom, 2010-04-05. This book investigates the use and utility of military force in modern war. After the Cold War, Western armed forces have increasingly been called upon to intervene in internal conflicts in the former Third World. These forces have been called upon to carry out missions that they traditionally have not been trained and equipped for in environments that they often have not been prepared for. A number of these new types of operations in allegedly new wars stand out, such as peace enforcement, state building, counterinsurgency, humanitarian aid, and not the least, counterterrorism. The success rate of these missions has, however, been mixed, providing fuel for an increasingly loud debate on the utility of force in modern war. This edited volume poses as its central question: what is in fact the utility of force? Is force useful for anything other than a complete conventional defeat of a regular opponent who is confronted in the open field? This book will be of much interest to students of strategic studies, war and conflict studies, counterinsurgency, security studies, and IR. Isabelle Duyvesteyn is an Associate Professor at the Department of History of International Relations, Utrecht University in the Netherlands. Jan Angstrom is a researcher at the Swedish National Defence College.

Military Cultures in Peace and Stability Operations Chiara Ruffa, 2018-05-11. As of September 2017, the United Nations alone deployed 110,000 uniformed personnel from 122 countries in fifteen peacekeeping operations worldwide. Soldiers in these missions are important actors who not only have considerable responsibility for implementing peace and stability operations but also have a concomitant influence on their goals and impact. Yet we know surprisingly little about the factors that prompt soldiers' behavior. Despite being deployed on the same mission under similar conditions, various national contingents display significant systematic differences in their actions on the ground. In *Military Cultures in Peace and Stability Operations*, Chiara Ruffa challenges the widely held assumption that military contingents, regardless of their origins, implement mandates in a similar manner. She argues instead that military culture—the set of attitudes, values, and beliefs instilled into an army and

transmitted across generations of those in uniform influences how soldiers behave at the tactical level When soldiers are abroad they are usually deployed as units and when a military unit deploys its military culture goes with it By investigating where military culture comes from Ruffa demonstrates why military units conduct themselves the way they do Between 2007 and 2014 Ruffa was embedded in French and Italian units deployed under comparable circumstances in two different kinds of peace and stability operations the United Nations Interim Force in Lebanon and the NATO mission in Afghanistan Based on hundreds of interviews she finds that while French units prioritized patrolling and the display of high levels of protection and force such as body armor and weaponry Italian units placed greater emphasis on delivering humanitarian aid She concludes that civil military relations and societal beliefs about the use of force in the units home country have an impact on the military culture overseas soldiers perceptions and behavior and ultimately consequences for their ability to keep the peace

The Ashgate Research Companion to Military Ethics James Turner Johnson, Eric D. Patterson, 2016-03-23 This Companion provides scholars and graduates serving and retired military professionals members of the diplomatic and policy communities concerned with security affairs and legal professionals who deal with military law and with international law on armed conflicts with a comprehensive and authoritative state of the art review of current research in the area of military ethics Topics in this volume reflect both perennial and pressing contemporary issues in the ethics of the use of military force and are written by established professionals and respected commentators Subjects are organized by three major perspectives on the use of military force the decision whether to use military force in a given context the matter of right conduct in the use of such force and ethical responsibilities beyond the end of an armed conflict Treatment of issues in each of these sections takes account of both present day moral challenges and new approaches to these and the historical tradition of just war Military ethics as it has developed has been a particularly Western concern and this volume reflects that reality However in a globalized world awareness of similarities and differences between Western approaches and those of other major cultures is essential For this reason the volume concludes with chapters on ethics and war in the Islamic Chinese and Indian traditions with the aim of integrating reflection on these approaches into the broad consideration of military ethics provided by this volume

Eyewitness to Chaos Walter E. Kretchik, 2016-12-01 Haitian culture and military power Preventive diplomacy and military intervention Planning a military intervention Conducting a military intervention Intervention under the Blue Beret Aftermath Appendix Oral history interviewees

How Peace Operations Work Jeni Whalan, 2013-12 When powerful states and international organizations decide to respond to violent conflict around the world their preferred policy instrument is to deploy peace operations institutions that must serve both the international politics of their creation as well as the fractured local societies they aim to transform But while their international face has been widely analysed we know less about how peace operations function on the ground In *How Peace Operations Work* Jeni Whalan addresses this critical dimension of peacekeeping She analyses the effectiveness of peace operations through a local lens asking new questions

about how they work and generating new insights about how they might be made to work better What emerges is the overriding importance of local legitimacy the perception among local actors that a peace operation its personnel and its objectives are right fair and appropriate How Peace Operations Work demonstrates that when local actors perceive a peace operation to be legitimate they are more likely to help the operation achieve its goals This book combines novel theoretical progress with rich empirical work drawing on in depth case studies of the United Nations Transitional Authority in Cambodia UNTAC and the Regional Assistance Mission to Solomon Islands RAMSI to propose a new approach to studying the effectiveness of peace operations and a set of practical recommendations that challenge key elements of prevailing peace operations policy

Peacekeeping, Policing, and the Rule of Law after Civil War Robert A. Blair, 2020-11-05 The rule of law is indispensable for sustained peace good governance and economic growth especially in countries recovering from civil war Yet despite its importance we know surprisingly little about how to restore the rule of law in the wake of conflict In this book Robert A Blair proposes a new theory to explain how the international community can help establish the rule of law in the world's weakest and most war torn states focusing on the crucial but often underappreciated role of the United Nations Blair tests the theory by drawing on original household surveys in Liberia highly disaggregated data on UN personnel and activities across Africa and hundreds of interviews with UN officials local leaders citizens and government and civil society representatives The book demonstrates that UN intervention can have a deeper more lasting and more positive effect on the rule of law than skeptics typically believe

Global South to the Rescue Paul Amar, 2014-02-25 This book provides the first comprehensive analysis of an epochal shift in global order the fact that global south countries have taken up leadership roles in peacekeeping missions humanitarian interventions and transnational military industries Brazil has taken charge of the UN military mission in Haiti Nigeria has deployed peacekeeping troops throughout West Africa Indonesians have assumed crucial roles in UN Afghanistan operations Fijians South Africans and Chileans have become essential actors in global mercenary firms Venezuela and its Bolivarian allies have established a framework for revolutionary humanitarian interventions and Turkey India Kenya and Egypt are asserting themselves in bold new ways on the global stage In this context this collection sheds critical light on intersections between imperialism and humanitarianism between neoliberal globalization and rescue industry transnationalism and between patterns of geopolitical hegemony and trajectories of peacekeeping internationalism These case studies are grouped into three clusters I Globalizing Peacekeeper Identities II Assertive Regional Internationalisms and III Emergent Alternative Paradigms Together these articulate a new research agenda and offer significant contributions to fields of global studies transnational gender and race studies critical security studies and peace studies comparative politics police and military sociology Third World diplomatic history and international relations This book was published as a special issue of Globalizations

The Oxford Handbook of International Organizations Jacob Katz Cogan, Ian Hurd, Ian Johnstone, 2016-11-24 Virtually every important question of public policy today

involves an international organization From trade to intellectual property to health policy and beyond governments interact with international organizations in almost everything they do Increasingly individual citizens are directly affected by the work of international organizations Aimed at academics students practitioners and lawyers this book gives a comprehensive overview of the world of international organizations today It emphasizes both the practical aspects of their organization and operation and the conceptual issues that arise at the junctures between nation states and international authority and between law and politics While the focus is on inter governmental organizations the book also encompasses non governmental organizations and public policy networks With essays by the leading scholars and practitioners the book first considers the main international organizations and the kinds of problems they address This includes chapters on the organizations that relate to trade humanitarian aid peace operations and more as well as chapters on the history of international organizations The book then looks at the constituent parts and internal functioning of international organizations This addresses the internal management of the organization and includes chapters on the distribution of decision making power within the organizations the structure of their assemblies the role of Secretaries General and other heads budgets and finance and other elements of complex bureaucracies at the international level This book is essential reading for scholars practitioners and students alike

Sociology and Military Studies Joseph Soeters, 2018-03-14 This book examines the connection between sociology and the challenges faced by the modern military Military sociology has received little attention in the broader academic world and is mostly focused on civil military relations This book seeks to address this gap and combines ideas theories and insights from sociology's founding authors with each chapter focusing on a specific thinker There are chapters on Max Weber Emile Durkheim Karl Marx Georg Simmel Jane Addams W E B Du Bois Erving Goffman Michel Foucault Morris Janowitz Norbert Elias Cornelis Lammers Arlie Russell Hochschild Cynthia Enloe and Bruno Latour and each essay discusses their ideas and theories in relation to topics that are of concern in and around the military today Military studies are taken in a broad sense here so the volume encompasses a wide range of issues including civil military relations military political affairs performance and outcomes of military operations and organizational arrangements including technology and the composition performance and well being of personnel The book intends to provide views and insights that will help the military to innovate their organizations and practices not necessarily in the usual functional way of innovating i.e. faster more precise etc but in a broader way This book will be of great interest to students of sociology military studies civil military relations war and conflict studies and IR in general
