Yetman, Mark D. Hormann, 2016-05-20 *Neurology : PreTest Self-Assessment and Review, Sixth Edition* David J. Ansel, 2006-03-13 500 USMLE style questions and answers referenced to core textbooks and journal articles Complete explanations discuss right and wrong answer options All questions are reviewed by students who have recently passed the exams Essentials for Practice of Medicine in the Frontline Inyang Ukot, 2021-09-03 Essentials for practice of medicine in the frontline is an abridged synthesis of selected topics from family medicine internal medicine pediatrics obstetrics and gynecology pathology and psychiatry also ophthalmology otorhinolaryngology hematology and dermatology Each section covers ten salient and commonly encountered areas of practice by physicians Multiple choice questions and answers accompany each Section The setting of writing is a developing country The contents are relevant to doctors who practice in the medically advanced countries and those in the developing countries Medically the world has become an interesting place Air travel frequent movement and resettlement of people now mean that doctors in developed countries can no longer stay and practice within the clinical conditions that were typical in their practice settings Things have changed as they cannot be certain of what medical conditions that patients from various parts of the world will present to them Doctors also cannot be unequivocal that an emergency in a distant part of the globe may not require their attention This book therefore meets the needs of doctors irrespective of their length of practice or where they practice What applies to doctors certainly applies to medical students This book is an atypical book as it puts in its two volumes of less than 500 pages of 8 5 x 11 per volume material that any

doctor anywhere should keep on their office or consulting room bookshelf The e book version is also a veritable companion

Plantz,2004 A P **The Essential Revolution of Evolutionary Medicine** Giacinto Libertini,Graziamaria Corbi,Olga Shubernetskaya,Klara Komici,Nicola Ferrara,2025-02-24 This book proposes a way to radically renew medicine by extending to medicine the concepts of evolutionary biology The book considers diseases not as unpredictable harmful events but as logical consequences of evolutionary mechanisms In particular a large part of the most widespread diseases that afflict modern populations are

interpreted as the consequence of discordances mismatches between new living conditions and the adaptation of our species
 It discusses the basic concepts as well as diseases deriving from alterations of the genotype and general concepts about
 diseases deriving from alterations of the ecological niche It also describes diseases deriving from relations with other living
 beings especially when the ecological niche is altered diseases deriving from conditions beyond the adaptation range and
 physiological phenomena that cause troubles and suffering or even death A particular study is dedicated to the interpretation
 of aging and its consequences in normal or altered conditions of the ecological niche The final part of the book describes the
 implementation of evolutionary medicine This book complementing the Evolutionary Gerontology and Geriatrics book which
 is also published in this series provides a valuable read for scholars and students in the fields of medicine evolutionary
