

hole in the same column. When you complete the first column, go to the next column. Follow the same procedure till you fill up all the holes. Always you should be standing at the centre of the table* [Left hand subject has to begin from right end column.]

Turning Series: (To the right handed participants) - "You have to pick up the block from the hole with right hand, twist the wrist, until the blue face is facing toward the left hand and grasp it in the left hand; and put it back in the same hole blue stop. Start from the left side with the block nearest to you, proceed column wise towards the top. Continue same procedure for all the blocks.

- Precautions:**
1. Demonstration should be given in both placing and turning series.
 2. Subject should stand only at the centre of the table and is not allowed to move either way.
 3. Time should be recorded accurately.

- Analysis of results:**
1. Consider the time taken in the last four trials for analysis. First trial is a practice trial.
 2. Take the total of placing and turning series separately.
 3. Refer total time score in seconds and locate the percentile point. (Norms are different for Men and Women).

- Points for discussion:**
1. Generally persons with good dexterity for manual job will take less time to fit the blocks into holes and the speed of turning over the blocks is also high.
 2. Compare the percentile point in the two series.
 3. Discuss the individual differences present with regard to speed of turning and placing.

INTERPRETATION

Below 20	_____	Poor
21 — 40	_____	Fair
41 — 60	_____	Average
61 — 80	_____	Good
81 — 100	_____	Very Good
