Nice Ancient Glass Interdisciplinary Julian Henderson:

Ancient Glass Julian Henderson, 2013-02-11 A detailed interdisciplinary exploration of ancient glass examining why and how glass was invented and various contexts of its subsequent development and use **Ancient Glass** Julian Henderson, 2016-02-04 This book is an interdisciplinary exploration of archaeological glass in which technological historical geological chemical and cultural aspects of the study of ancient glass are combined The book examines why and how this unique material was invented some 4 500 years ago and considers the ritual social economic and political contexts of its development The book also provides an in depth consideration of glass as a material the raw materials used to make it and its wide range of chemical compositions in both the East and the West from its invention to the seventeenth century AD Julian Henderson focuses on three contrasting archaeological and scientific case studies Late Bronze Age glass late Hellenistic early Roman glass and Islamic glass in the Middle East He considers in detail the provenances of ancient glass using scientific techniques and discusses a range of vessels and their uses in ancient societies *Reimagining the Silk Roads* Julian Henderson, Stephen L. Morgan, Matteo Salonia, 2024-12-17 This book brings together scholars from many disciplines to shed light on the long history of the silk roads to redefine it and to demonstrate its vitality and importance *Reimagining the Silk Roads* illuminates economic spiritual and political networks bridging different chronologies and geographies Richly illustrated it explores fascinating topics including archaeological discoveries oceanic explorations the movement and impact of ideas and the ways in which the silk roads broadly defined contributed to processes of globalization Reconciling the study of land and sea routes and paying attention to themes such as material culture environment trade and the role of religious faiths the authors offer complex yet accessible studies of the history of interactions and perceptions across Eurasia over the last 3 000 years The editors critically respond to the recent politicisation of the silk roads and reflect on their polycentric character The book challenges and revives silk roads studies and it will be relevant not only to researchers in archaeology history heritage and related fields but also to the general reader The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4 0 license *Recent Advances In The Scientific Research On Ancient Glass And Glaze* Qinghui Li, Julian Henderson, 2016-02-26 The aim of the book is to report the recent research development of ancient glass and glazing technology and the historical cultural exchange of the East and West along the Silk and Steppe Roads The contents of this book are dedicated to promote the exchanges between researchers in both social and scientific fields The scope of this book includes the new archaeological findings of ancient glass and faience in the world the relationship of glassmaking with glazing technology the development and application of modern techniques used for the characterization of ancient glass and glaze compound colorants opacifiers among ancient glass the early exchanges of culture and techniques used between China and elsewhere along the Silk and Steppe Roads and so on **Monumental cares** Mechtild Widrich, 2023-01-31 Monumental

cares rethinks monument debates site specificity and art activism in light of problems that strike us as monumental or overwhelming such as war migration and the climate crisis The book shows how artists address these issues from Chicago and Berlin to Oslo Bucharest and Hong Kong in media ranging from marble and glass to postcards graffiti and re enactment A multidirectional theory of site does justice to specific places but also to how far away audiences see them What emerges is a new ethics of care in public art combined with a passionate engagement with reality harking back to the realist aesthetics of the nineteenth century Familiar questions can be answered anew what to do with monuments particularly when they are the products of terror and require removal modification or recontextualisation And can art address the monumental concerns of our present

Excavations at the Seila Pyramid and Fag el-Gamous Cemetery Kerry Muhlestein, Bethany Jensen, Krystal V.L. Pierce, 2019-12-02 In *Excavations at the Seila Pyramid and Fag el Gamous Cemetery* the excavation team provides crucial information about the Old Kingdom and Graeco Roman Egypt While both periods have been heavily studied Kerry Muhlestein and his contributors provide new archaeological information that will help shape thinking about these eras The construction and ritual features of the early Fourth Dynasty Seila Pyramid represents innovations that would influence royal funerary cult for hundreds of years Similarly as one of the largest excavated cemeteries of Egypt Fag el Gamous helps paint a picture of multi cultural life in the Fayoum of Egypt during the Ptolemaic and Roman periods Excavations there provide a statistically impactful understanding of funerary customs under the influence of new cultures and religion

Working in the Suburbs Anna K. Hodgkinson, 2025-04-01 A century ago Charles Leonard Woolley directed the first excavations at Amarna site M50 14 16 identifying it as a workshop for glass and faience However the archaeological record and its publication in *The City of Akhenaten I* were somewhat superficial New excavations conducted by the Amarna Project in 2014 and 2017 yielded extensive evidence of glass faience stone and metalworking reaffirming the site's role as a workshop These investigations also illuminated its domestic character uncovering valuable data on houses and other structural remains This volume presents a near complete record of the site offering a comprehensive archaeological and architectural evaluation alongside in depth analyses of material culture including archaeobotany charcoal animal bones ceramics and other artefacts The individual chapters reconstruct the chaines operatoires of various craft production activities Additionally the organisation of production and the concept of cross craft interaction are explored as the site is situated within the broader industrial network of Amarna This volume furthermore provides an in depth examination of the inhabitants roles and daily lives enriching our understanding of this significant site

Materials and Sustainability Julia L Freer Goldstein, Paul Foulkes-Arellano, 2024-04-12 This book examines sustainable manufacturing from the extraction of materials to processing use and disposal and argues that significant changes in all of the above are needed for the world to progress toward a more circular economy Materials and processing methods are usually chosen with performance as the key metric Why has our society embraced plastics Because they work In most cases they are lighter easier to manufacture and less expensive than

the metal wood glass or stone they have replaced Why do industrial manufacturers use toxic chemicals Because they are effective but the unintended consequences may be severe By learning how various materials are made and what happens when they are recycled readers will better understand the value of materials and the challenges that manufacturers face when trying to make their facilities and products less toxic and less wasteful The three chapters in Part I provide essential background about materials in the circular economy chemicals and waste Part II delves into specific materials It includes chapters on plastics metals wood and paper products glass and novel materials Part III covers recycling and manufacturing processes and Part IV delves into practical considerations including the effect of regulations concluding with a chapter that helps readers translate the information presented into action Interviews with industry experts round out the chapters and offer valuable insights Materials and Sustainability is a must read for business professionals who are serious about making their companies as environmentally responsible as possible and for business and engineering students who want to begin their careers with practical knowledge about materials and their impacts

Technology and Urbanism in Late Bronze Age Egypt Anna K. Hodgkinson, 2018 This study examines the distribution of high status materials in addition to archaeological evidence of their production in the settlements known as royal cities during the New Kingdom in ancient Egypt c 1550 1069 BC The research focuses on the site sites of Amarna Gurob and Malqata but incorporates Qantir Pi Ramesse for comparison

Ennion: Master of Roman Glass Christopher S. Lightfoot, Zrinka Buljević, Yael Israeli, Karol B. Wight, Lisa Pilosi, Mark T. Wypyski, 2014-12-08 Among glass craftsmen active in the 1st century A D the most famous and gifted was Ennion who hailed from the coastal city of Sidon in modern Lebanon Ennion's glass stood out for its quality and popularity His products are distinguished by the fine detail and precision of their relief decoration which imitates designs found on contemporaneous silverware This compact but thorough volume examines the most innovative and elegant known examples of Roman mold blown glass providing a uniquely comprehensive up to date study of these exceptional works Included are some twenty six remarkably preserved examples of drinking cups bowls and jugs signed by Ennion himself as well as fifteen additional vessels that were clearly influenced by him The informative texts and illustrations effectively convey the lasting aesthetic appeal of Ennion's vessels and offer an accessible introduction to an ancient art form that reached its apogee in the early decades of the Roman Empire

Racialized Commodities Christopher Stedman Parmenter, 2024 Between c 700 300 BCE the ancient Greeks developed a vivid imaginary of the world's peoples Ranging from the light skinned gray eyed Thracians of the distant north to the dark skinned Ethiopians of the far south as the poet Xenophanes would describe around 540 BCE Greeks envisioned a world populated by human groups with distinct physiognomies Racialized Commodities traces how Greece's racial imaginary a confluence of thinking about cultural geography commodity production and human physiognomy emerged out of the context of cross cultural trade between Greece and its Mediterranean neighbors over the Archaic and Classical Periods For merchants the racial imaginary might be used to play up the exotic provenance of their goods to consumers it

might also circulate practical information about customs pricing navigation and doing business in foreign ports Archaic Greek attempts to explain foreign bodies were rarely pejorative But at in the early Classical Period as Achaemenid Persia loomed and as Greek cities became increasingly dependent on enslaved labor such images coalesced into the charged idea of the barbaros barbarian Drawing from the historiography of trade in the eighteenth century Atlantic world Racialized Commodities adopts the model of commodity biography to investigate the entanglement of cultures bodies and things in Archaic and Classical Greece Starting in the period c 700 450 BCE Part 1 focuses on the earliest images of African peoples described by Greeks as Egyptians or Ethiopians in Greek art Part 2 which concentrates on the period between 550 300 BCE seeks to explain how and why negative stereotypes of Thracians and Scythians were so widespread in ancient Greece

Transparency Daniel Jutte,2023-04-25 A wide ranging illustrated history of transparency as told through the evolution of the glass window Transparency is a mantra of our day It is key to the Western understanding of a liberal society We expect transparency from for instance political institutions corporations and the media But how did it become such a powerful and global idea From ancient glass to Apple s corporate headquarters this book is the first to probe how Western people have experienced conceptualized and evaluated transparency Daniel Jtte argues that the experience of transparency has been inextricably linked to one element of Western architecture the glass window Windows are meant to be unnoticed Yet a historical perspective reveals the role that glass has played in shaping how we see and interpret the world A seemingly pure material glass has been endowed throughout history with political social and cultural meaning in manifold and sometimes conflicting ways At the same time Jtte raises questions about the future of vitreous transparency its costs in terms of visual privacy but also its ecological price tag in an age of accelerating climate change *The Brain and the Spirit* Gena St.

David,2021-10-29 The Brain and the Spirit invites readers to embark on a practice of listening to the Christ story through the earpiece of neuroscience After many years steeped in brain science the author had an unexpected encounter with a theologian James Alison whose trust in God and forgiveness toward others appeared to defy neurobiological explanation How did his encounter with the Christ story produce in him the Christlike responses that it did This question launched the author on a thrilling quest to listen to the scriptures and take up questions of creation humanity sin Jesus salvation the Spirit and the body of Christ to hear what might get amplified by our ever expanding understanding of the human brain Readers are invited to eavesdrop on the twists and turns of the author s story and take up their own practice of listening to the Spirit scripture and theology through the earpiece of neuroscience and to become curious how the Christ story may spark trust which unlocks our brain s capacity to engage reality with relationality kindness creativity and access to joy **Isotopes in**

Vitreous Materials Patrick Degryse,Julian Henderson,Gregory Hodgins,2009 For all artifacts that are to serve as archaeological evidence the study of the provenance production technology and trade of raw materials must be based on archaeometry Currently these questions are addressed by the use of radiogenic isotope analysis The book captures the state

of the art in this rapidly advancing field It includes methodological papers on isotope analysis innovative applications of several isotope systems to current questions in glass and glaze research and advances in the knowledge of the economy of vitreous materials *Materials Science in Engineering: Understanding the Properties of Matter* Dr. Sanjay

Pandey,2024-12-19 *Materials Science in Engineering Understanding the Properties of Matter* offers a deep dive into the essential principles that govern the behavior of materials This book is designed to equip readers with the knowledge required to understand the intricate relationships between the atomic structure processing techniques and material properties Covering a broad range of materials including metals polymers ceramics and composites it highlights how their distinct characteristics such as strength ductility conductivity and thermal stability are influenced by their molecular makeup The book introduces critical topics like crystal structures bonding and defects exploring how these atomic level details translate into real world material behavior In addition it covers the impact of processing techniques like heat treatment alloying and surface modification on material performance Practical applications are woven throughout the text linking theoretical concepts with their use in industries such as aerospace electronics and construction By providing both a solid theoretical foundation and a practical understanding this book serves as an invaluable resource for students engineers and researchers looking to understand and apply the science of materials in engineering **Fundamentals of Materials Science:**

Properties, Processing, and Applications Dr. Subash Chandra Sahu,2024-08-24 The purpose of *Fundamentals of Materials Science Properties Processing and Applications* is to equip readers with a comprehensive comprehension of the principles that regulate the behaviour of materials The book explores critical subjects such as the classification of materials bonding crystallography and atomic theory including metals polymers ceramics and composites It also investigates the primary properties that influence material performance including optical thermal electrical and mechanical In addition the text delves into the fundamental processing techniques of casting forming and thermal treatment providing a comprehensive understanding of how materials can be engineered to satisfy specific application requirements The book emphasises the role of materials science in the advancement of modern technology across a variety of sectors including electronics nanotechnology and energy systems with a concentration on practical implementations It is a valuable resource for students engineers and professionals who are interested in enhancing their comprehension of the material properties their processing and the diverse range of applications that drive technological advancement and innovation Silk, Slaves, and Stupas Susan Whitfield,2018-03-13 Following her bestselling *Life Along the Silk Road* Susan Whitfield widens her exploration of the great cultural highway with a new captivating portrait focusing on material things *Silk Slaves and Stupas* tells the stories of ten very different objects considering their interaction with the peoples and cultures of the Silk Road those who made them carried them received them used them sold them worshipped them and in more recent times bought them conserved them and curated them From a delicate pair of earrings from a steppe tomb to a massive stupa deep in Central Asia a hoard of

Kushan coins stored in an Ethiopian monastery to a Hellenistic glass bowl from a southern Chinese tomb and a fragment of Byzantine silk wrapping the bones of a French saint to a Bactrian ewer depicting episodes from the Trojan War these objects show us something of the cultural diversity and interaction along these trading routes of Afro Eurasia Exploring the labor tools materials and rituals behind these various objects Whitfield infuses her narrative with delightful details as the objects journey through time space and meaning Silk Slaves and Stupas is a lively visual and tangible way to understand the Silk Road and the cultural economic and technical changes of the late antique and medieval worlds Byzantine Trade, 4th-12th Centuries Marlia Mundell Mango, 2016-12-05 The 28 papers examine questions relating to the extent and nature of Byzantine trade from Late Antiquity into the Middle Ages The Byzantine state was the only political entity of the Mediterranean to survive Antiquity and thus offers a theoretical standard against which to measure diachronic and regional changes in trading practices within the area and beyond To complement previous extensive work on late antique long distance trade within the Mediterranean based on the grain supply amphorae and fine ware circulation the papers concentrate on local and international trade The emphasis is on recently uncovered or studied archaeological evidence relating to key topics These include local retail organisation within the city some regional markets within the empire the production and or circulation patterns of particular goods metalware ivory and bone glass pottery and objects of international trade both exports such as wine and glass imports such as materia medica and the lack of importation of for example Sasanian pottery In particular new work relating to specific regions of Byzantium s international trade is highlighted in Britain the Levant the Red Sea the Black Sea and China Papers of the 38th Spring Symposium of Byzantine Studies held in 2004 at Oxford under the auspices of the Committee for Byzantine Studies South Asian Studies ,2000 Ceramic Abstracts American Ceramic Society,1991
