Academic Libraries and Collaborative Research Services Carrie Forbes, 2022-08-16 Higher education institutions in the United States and across the globe are realizing the importance of enabling internal and external collaborative work e g interdisciplinary research and community partnerships In recent years researchers have documented the benefits of

organizational collaboration for research including greater efficiency effectiveness and enhanced research reputation In addition accreditors foundations business and government agencies have been espousing the value of collaboration for knowledge creation and research and improved organizational functioning As a result of both the external pressures and the known benefits many forms of internal and external research collaborations have begun to emerge in higher education At the heart of this change academic libraries who have long been models for collaborative work are increasingly participating in the research process by providing a widening range of research services beyond traditional reference services Innovative library services in areas such as bibliometric analysis research data management and data repositories are evolving in response to changes in education funding and policies These funding and policy changes have also coincided with technological developments to create opportunities for academic librarians to find new roles within their institutions and the research community There is a growing body of literature examining these changing academic library roles but few volumes have concentrated on how the nature of collaborative work in libraries is helping to reshape institutional research practices Academic Libraries and Collaborative Research Services fills that void by providing academic librarians and administrators with case studies and guidance on how academic libraries are establishing their place in this new collaborative research arena in the areas of emerging liaison roles research data services open access and scholarly publishing and professional development programming The book will also be useful to higher education administrators and institutional research officers looking for information on how to partner with libraries to increase the effectiveness of collaborative research

We, the Data Wendy H. Wong, 2023-10-10 A rallying call for extending human rights beyond our physical selves and why we need to reboot rights in our data intensive world Winner of the 2024 Balsillie Prize for Public Policy Shortlisted 2024 Lionel Gelber Prize Our data intensive world is here to stay but does that come at the cost of our humanity in terms of autonomy community dignity and equality In We the Data Wendy H Wong argues that we cannot allow that to happen Exploring the pervasiveness of data collection and tracking Wong reminds us that we are all stakeholders in this digital world who are currently being left out of the most pressing conversations around technology ethics and policy This book clarifies the nature of datafication and calls for an extension of human rights to recognize how data complicate what it means to safeguard and encourage human potential As we go about our lives we are co creating data through what we do We must embrace that these data are a part of who we are Wong explains even as current policies do not yet reflect the extent to which human experiences have changed This means we are more than mere subjects or sources of data by products that can be harvested and used by technology companies and governments By exploring data rights facial recognition technology our posthumous rights and our need for a right to data literacy Wong has crafted a compelling case for engaging as stakeholders to hold data collectors accountable Just as the Universal Declaration of Human Rights laid the global groundwork for human rights We the Data gives us a foundation upon which we claim human rights in the age of data

Reference and Information

Sources and Services for Children and Young Adults Lesley S.J. Farmer, 2022-09-01 Reference and information services are more important than ever for today's young people. By analyzing key features of reference and information services to young people in school and public library environments including the research behind the trends and issues librarians can make sure that those services are appropriately responsive to children and teens. Based on standards and evidence-based practice, this book helps you to optimize those resources and services by providing guidance in assessing youth communities, determining youth's information needs and information behaviors, developing and maintaining age-appropriate reference collections, starting with the book's core list of print and online resources, optimizing physical and virtual access to reference and information sources, interacting with youth and facilitating their reference and information literacy skills, curating and producing reference and information products, dealing with relevant legal and ethical issues, and planning effective library reference and information services for youth. Chapter sidebar examples provide food for thought.

Cases on Research Support Services in Academic Libraries Fernández-Marcial, Viviana, González-Solar, Llarina, 2020-08-28 Academic libraries have traditionally had two key functions: to support teaching and to support research. In an evolving and competitive university environment along with the emergence of various technologies and substantial changes in scientific communication, university management has reached a turning point. Academic libraries are facing a paradigm shift in the role they need to play to achieve the research objectives of universities. Research support services in academic libraries have evolved as a response to these changes. They are heterogeneous, adapt to their university culture, adopt different points of view, take different approaches in their organizational structures, and include a diverse catalog of activities. Having an overview of different experiences will allow libraries to adopt best practices, redefine services, and even establish new management and collaboration models. *Cases on Research Support Services in Academic Libraries* is a critical scholarly resource that uses case studies to systematize the experiences of research support services in academic libraries for the support of higher education faculty. The cases focus on such items as the role of technology and its impact, as well as how these services help to improve the excellence of universities. Featuring a wide range of topics such as library services, data management, and open science, this book is ideal for librarians, academicians, professionals, researchers, and students.

Open Access and the Future of Scholarly Communication Kevin L. Smith, Katherine A. Dickson, 2016-12-08 This volume, the second of two in the series *Creating the 21st Century Academic Library*, that deals with the topic of open access in academic libraries, focuses on the implementation of open access in academic libraries. Chapters on the legalities and practicalities of open access in academic libraries address the issues associated with copyright licensing and intellectual property and include support for courses that require open access distribution of student work. The topic of library services in support of open access is explored, including the library's role in providing open educational resources and as an ally and driver of their adoption, for example, by helping defray author fees that are required for open access articles. A detailed look at open access

in the context of undergraduate research is provided and considers how librarians can engage undergraduates in conversations about open access. Chapters consider ways to engage undergraduate students in the use, understanding, evaluation, and creation of open access resources. Issues that are of concern to graduate students are also given some attention, and central to these are the development of Electronic Thesis and Dissertation (ETD) programs. A chapter examines the library's role in balancing greater access to graduate student work with the consequences of openness, such as concerns about book contracts and sales, plagiarism, and changes in scholarly research and production. The book concludes with issues surrounding open data and library services in critical data librarianship, including advocacy, preservation, and instruction. It is hoped that this volume and the series in general will be a valuable and exciting addition to the discussions and planning surrounding the future directions, services, and careers in the 21st-century academic library.

Practical Steps to Digital Research Deborah B. Stanley, 2018-07-11. This hands-on approach to teaching digital research skills breaks down each research skill into simple, targeted steps that enable students to research more deeply and to accomplish real-world tasks. Today's rapidly diversifying digital world provides easy access to information, making it increasingly important that students know how to conduct research online. In this book, you'll learn how to transition your instruction of the research process from a print context to a digital one and to expand your own knowledge of how to best assist students at all stages of their research. Using six well-defined steps that she developed in her 26 years of experience as a school librarian, Deb Stanley provides practical strategies for each of the six steps of the research process, accompanied by easily used and replicated lessons and handouts that are applicable and adaptable to all grade levels K-12. Step-by-step instruction, links to Common Core state standards, and ideas to help students succeed at each stage of the research process make this title a must-have for any school librarian.
