Ann Cassell, Uma Hiremath, 2023-01-17 From the ongoing flood of misinformation to the swift changes occasioned by the pandemic, a myriad of factors is spurring our profession to rethink reference services. Luckily, this classic text is back in a newly overhauled edition that thoughtfully addresses the evolving reference landscape. Designed to complement every introductory library reference course, Cassell and Hiremath's book also serves as the perfect resource to guide current practitioners in their day-to-day work. It teaches failsafe methods for identifying important materials by matching specific types of questions to the best available sources regardless of format. Guided by a national advisory board of educators and experts, this thoroughly updated text presents chapters covering fundamental concepts, major reference sources, and special topics while also offering fresh insights on timely issues including a basic template for the skills required and expectations demanded of the reference librarian, the pandemic's effect on reference services, and how the ingenuity employed by libraries in providing remote and virtual reference is here to stay. A new chapter dedicated to health information with a special focus on health equity and information sources, selecting and evaluating reference materials with strategies for keeping up to date, a heightened emphasis on techniques for evaluating sources for misinformation, and ways to give library users the tools to discern facts vs. fake facts, reference as programming, readers' advisory services, developmentally appropriate material for children and young adults, and information literacy evidence-based guidance on handling microaggressions in reference interactions featuring discussions of cultural humility and competence alongside recommended resources on implicit bias, managing, assessing, and improving reference services, and the future of information and reference services, encapsulating existing models, materials, and services to project possible evolutions in the dynamic world of reference. *Literary*

Excerpt from the Book For most people what's inside the body is a great mystery Haven't you found that to be so Most people entertain vague ideas about where organs are located what they do and how they work But for those of us who study human gross anatomy it's different For those of us who have the splendid opportunity to explore the body for ourselves to actually see for ourselves the beauty and grace inside the human body and to learn its secrets in order to better serve our patients it's a compelling once in a lifetime revelation Ours is a uniquely privileged study and that study would be impossible except for the unrequitable thoughtfulness of people we've never met who had the charity to give to us what was their most intimate home for seventy eighty ninety years We begin that study as strangers strangers to the human body and strangers to each other and we invariably finish as good friends to both I'm happy you haven't missed this rare opportunity And someday when you're really old twenty thirty forty years after you graduate when you've achieved your goals and you are a practicing healthcare professional you will have occasion to get a whiff of formaldehyde and that will cause you to remember You'll remember the Anatomy Lab the names of your lab partners and instructors and your donor body And you'll reflect on what is called the music of the Anatomy Laboratory the sound of learning the sound of discovery the sound of students teaching other students all throughout the room And you will recall that lovely aroma in the lab And here's the thing when you remember you will smile I promise you will
