New Media Old Media A History And Theory Reader:

New Media, Old Media Wendy Hui Kyong Chun, Thomas Keenan, 2006 In this history of new media technologies leading media and cultural theorists examine new media against the background of traditional media such as film photography and print in order to evaluate the multiple claims made about the benefits and freedom of digital media New Media, Old Media Old Media New Media, 2016-02-05 New Media Old Media is a comprehensive anthology of original and classic essays that explore the tensions of old and new in digital culture Leading international media scholars and cultural theorists interrogate new media like the Internet digital video and MP3s against the backdrop of earlier media such as television film photography and print The essays provide new benchmarks for evaluating all those claims political social ethical made about the digital age Committed to historical research and to theoretical innovation they suggest that in the light of digital programmability seemingly forgotten moments in the history of the media we glibly call old can be rediscovered and transformed The many topics explored in provocative volume include websites webcams the rise and fall of dotcom mania Internet journalism the open source movement and computer viruses New Media Old Media is a foundational text for general readers students and scholars of new media across the disciplines It is essential reading for anyone interested in understanding the cultural impact of new media New Media, Old Media Wendy Hui Kyong Chun, Anna Watkins Fisher, Thomas Keenan, 2016 In this history of new media technologies leading media and cultural theorists examine new media against the background of traditional media such as film photography and print in order to evaluate the multiple claims made today about the benefits and freedom of digital media International Handbook of Internet Research Jeremy Hunsinger, Lisbeth Klastrup, Matthew Allen, 2010-06-17 Internet research spans many disciplines From the computer or information sciences through engineering and to social sciences humanities and the arts almost all of our disciplines have made contributions to internet research whether in the effort to understand the effect of the internet on their area of study or to investigate the social and political changes related to the internet or to design and develop software and hardware for the network The possibility and extent of contributions of internet research vary across disciplines as do the purposes methods and outcomes Even the epistemological underpinnings differ widely The internet then does not have a discipline of study for itself It is a field for research Baym 2005 an open environment that simultaneously supports many approaches and techniques not otherwise commensurable with each other There are of course some inhibitions that limit explorations in this field research ethics disciplinary conventions local and national norms customs laws borders and so on Yet these limits on the internet as a field for research have not prevented the rapid expansion and exploration of the internet After nearly two decades of research and scholarship the limits are a positive contribution providing bases for discussion and interrogation of the contexts of our research making internet research better for all These limits challenges that constrain the theoretically limitless space for internet research create boundaries that give definition to the field and provide us with a particular

topography that enables research and investigation

Media, Technology, and Literature in the Nineteenth Century

Margaret Linley, 2016-04-29 Operating at the intersection where new technology meets literature this collection discovers the relationship among image sound and touch in the long nineteenth century The chapters speak to the special mixed media properties of literature while exploring the important interconnections of science technology and art at the historical moment when media was being theorized debated and scrutinized Each chapter focuses on a specific visual acoustic or haptic dimension of media while also calling attention to the relationships among the three Famous works such as Wordsworth's I wandered lonely as a cloud and Shelley's Frankenstein are discussed alongside a range of lesser known literary scientific and pornographic writings Topics include the development of a print culture for the visually impaired the relationship between photography and narrative the kaleidoscope and modern urban experience Christmas gift books poetry painting and music as remediated forms the interface among the piano telegraph and typewriter Ernst Heinrich Weber's model of rationalized tactility and how the shift from visual to auditory telegraphic instruments amplified anxieties about the place of women in nineteenth century information networks Full of surprising insights and connections the collection offers new impetus for stimulating historical conversations and debates about nineteenth century media while also contributing fresh perspectives on new media and re mediation today

Only at Comic-Con

Erin Hanna, 2020 Only at Comic Con examines the relationship between exclusivity and the proliferation of media industry promotion at the San Diego Comic Con from the convention's founding in 1970 to its current status as a destination for hundreds of thousands of pop culture fans and a hub of Hollywood hype and buzz

Visions of Electric Media Ivy Roberts, 2025-10-01 Visions of Electric Media is an historical examination into the early history of television as it was understood during the Victorian and Machine ages How did the television that we use today develop into a functional technology What did Victorians expect it to become How did the vision of television change once viewers could actually see pictures on a screen We will journey through the history of television from the first indications of live communications in technology and culture in the late nineteenth century to the development of electronic televisual systems in the early twentieth century Along the way we will investigate the philosophy folklore engineering practices and satires that went into making television a useful medium

Expanding media histories

Sune Bechmann Pedersen, Marie Cronqvist, Ulrika Holgersson, 2024-01-31 Contemporary media history is a rapidly growing field that extends far beyond traditional studies of technology or institutions such as radio film and television This volume expands the scope further still to analyze ephemeral mundane phenomena long overlooked by media historiography In eight original essays the volume demonstrates the strengths of a broad concept of the media The first part centers on media systems and media events with studies of spiritist'sances Gallup polls the mediated persona of Kaiser Wilhelm II and the burial of a Swedish elder statesman in 1915 The second part focuses on media materialities and infrastructure such as art replicas ring binders tourist guidebooks and media technology in the IKEA home Aimed at students and academics alike Expanding Media

Histories offers new empirical research which engages critically with key concepts in media history today *Architecture and the Image at the Turn of the 21st Century* Sanja Rodeš, 2024-06-28 This book examines architecture image and media relationships as productive for architecture and architectural discourses By arguing that the relationships between architecture and media cannot be dismissed via linear criticism of architecture and media or image these relations are instead seen as a part of a sphere a mediasphere of complex relationships In lieu of anything like a consensus on the contemporary condition of architecture referring to the late twentieth and the twenty first centuries the starting point of this book is that the relationships between architecture media and images continue to multiply owing to continuous technological advancements Contemporary architecture considered in this book is related to the selected circumstances of high visibility where architectural images are propelled into visibility and conflated with non architectural images This takes architecture outside of architectural only discourse and into the public realm By granting higher visibility to both the architectural images and architecture in the public realm architecture can also be influenced by the various perceptions of the general public and can enter public consciousness via non architectural media With increased visibility architecture s far reaching presence calls for more structured analysis of its nature and potential As the analysed architecture in this book is associated with the discourses outside of architecture some of which relate to terrorism natural disaster and branding and consumption the limits of contemporary architectural discipline are questioned and extended This book is written for academics and students in architectural history theory and criticism particularly those interested in visual and media studies **The Builders**

Association Shannon Jackson, Marianne Weems, 2015-10-23 A lavishly illustrated history and critical appraisal of The Builders Association an award winning intermedia performance company with detailed accounts of its major productions This book begins with the building of a house and the building of a company while building the house It expands to look at the ideas found in various rooms some of which expanded into virtual space while they still were grounded in the lives of the artists in the house from the preface by Marianne Weems The Builders Association an award winning intermedia performance company founded in 1994 develops its work in extended collaborations with artists and designers working through performance video architecture sound and text to integrate live performance with other media Its work is not only cross media but cross genre fiction and nonfiction unorthodox retellings of classic tales and multimedia stagings of contemporary events This book offers a generously illustrated history and critical appraisal of The Builders Association written by Shannon Jackson a leading theater scholar and Marianne Weems the founder and artistic director of the company It also includes critical meditations from such artists and scholars as Elizabeth Diller Pico Iyer Saskia Sassen Kate Valk and many others Technological wizardry in the theater has a long history going back to the deus ex machina of ancient Greek drama The Builders Association makes its technological dependence visible putting backstage technologies center stage and presenting architectural assemblies of screens and bodies Jackson and Weems explore a series of major productions from

MASTER BUILDER Ibsen by way of Gordon Matta Clark to SUPERVISION an exploration of dataveillance to HOUSE DIVIDED the foreclosure crisis juxtaposed with the Joads of Steinbeck s The Grapes of Wrath Each work is described through a series of steps including R D Operating Systems Storyboard and Rehearsal Assembly The Builders Association not only traces the evolution of an intermedial aesthetic practice but also tells a story about how a group makes the risky decision to make art in the first place

From Voice to Influence Danielle Allen,Jennifer S. Light,2015-06-19 How have online protests like the recent outrage over the Komen Foundation s decision to defund Planned Parenthood changed the nature of political action How do Facebook and other popular social media platforms shape the conversation around current political issues The ways in which we gather information about current events and communicate it with others have been transformed by the rapid rise of digital media The political is no longer confined to the institutional and electoral arenas and that has profound implications for how we understand citizenship and political participation With From Voice to Influence Danielle Allen and Jennifer S Light have brought together a stellar group of political and social theorists social scientists and media analysts to explore this transformation Threading through the contributions is the notion of egalitarian participatory democracy and among the topics discussed are immigration rights activism the participatory potential of hip hop culture and the porous boundary between public and private space on social media The opportunities presented for political efficacy through digital media to people who otherwise might not be easily heard also raise a host of questions about how to define good participation Does the ease with which one can now participate in online petitions or conversations about current events seduce some away from serious civic activities into slacktivism Drawing on a diverse body of theory from Hannah Arendt to Anthony Appiah From Voice to Influence offers a range of distinctive visions for a political ethics to guide citizens in a digitally connected world

The Routledge Companion to Media Studies and Digital Humanities Jentery Sayers,2018-05-01 Although media studies and digital humanities are established fields their overlaps have not been examined in depth This comprehensive collection fills that gap giving readers a critical guide to understanding the array of methodologies and projects operating at the intersections of media culture and practice Topics include access praxis social justice design interaction interfaces mediation materiality remediation data memory making programming and hacking

Hamas and the Media Wael Abdelal,2016-06-10 The Islamic resistance movement Hamas is arguably one of the most important Palestinian organizations in recent decades Since Hamas establishment it has extensively utilized media as a means of mobilization for its political and ideological agendas and its tactics have undergone a remarkable evolution from graffiti art to satellite broadcasting This book presents the first systematic and historical contextualization of the development of Hamas media strategy It determines three key phases in Hamas development and explores the complex and important relationship at work between its politics and use of media Assessing four elements of the Hamas media strategy the media message discourse the media objectives the infrastructure and the target audience this book tracks how Hamas

grew its media infrastructure and looks at how the idea of resistance has permeated the media discourse Determining both tactical and strategic objectives and detailing the various layers to the target audience it offers the first in depth academic study of the Hamas media strategy This book s exploration of the key role the media plays in the Palestinian issue makes it a timely and relevant contribution to the study of the Israeli Palestinian Conflict and a valuable resource for students scholars and policymakers working in Middle Eastern studies

Digital Memory and the Archive Wolfgang Ernst,2012-12-20 In the popular imagination archives are remote largely obsolete institutions either antiquated inevitably dusty libraries or sinister repositories of personal secrets maintained by police states Yet the archive is now a ubiquitous feature of digital life Rather than being deleted e mails and other computer files are archived Media software and cloud storage allow for the instantaneous cataloging and preservation of data from music photographs and videos to personal information gathered by social media sites In this digital landscape the archival oriented media theories of Wolfgang Ernst are particularly relevant *Digital Memory and the Archive* the first English language collection of the German media theorist s work brings together essays that present Ernst s controversial materialist approach to media theory and history His insights are central to the emerging field of media archaeology which uncovers the role of specific technologies and mechanisms rather than content in shaping contemporary culture and society Ernst s interrelated ideas on the archive machine time and microtemporality and the new regimes of memory offer a new perspective on both current digital culture and the infrastructure of media historical knowledge For Ernst different forms of media systems from library catalogs to sound recordings have influenced the content and understanding of the archive and other institutions of memory At the same time digital archiving has become a contested site that is highly resistant to curation thus complicating the creation and preservation of cultural memory and history

Circulating Fear Lindsay Nelson,2021-10-11 *Circulating Fear* Japanese Horror Fractured Realities and New Media explores the changing role of screens new media objects and social media in Japanese horror films from the 2010s to present day Lindsay Nelson places these films and their paratexts in the context of changes in the new media landscape that have occurred since J horror s peak in the early 2000s in particular the rise of social media and the ease of user remediation through platforms like YouTube and Niconico This book demonstrates how Japanese horror film narratives have shifted their focus from old media video cassettes TV and cell phones to new media social media online video sharing and smart phones In these films media devices and new media objects exist both inside and outside the frame they are central to the films narratives but they are also the means through which the films are consumed and disseminated Across a multitude of screens platforms devices and perspectives Nelson argues contemporary Japanese horror films are circulated as an ever shifting series of images and fragments creating a sense of fractured reality in the films narratives and the media landscape that surrounds them Scholars of film studies horror studies media studies and Japanese studies will find this book particularly useful

Identity Technologies Anna Poletti,Julie Rak,2014-01-31 *Identity Technologies* is a substantial contribution to the

fields of autobiography studies digital studies and new media studies exploring the many new modes of self expression and self fashioning that have arisen in conjunction with Web 2.0 social networking and the increasing saturation of wireless communication devices in everyday life This volume explores the various ways that individuals construct their identities on the Internet and offers historical perspectives on ways that technologies intersect with identity creation Bringing together scholarship about the construction of the self by new and established authors from the fields of digital media and autobiography studies Identity Technologies presents new case studies and fresh theoretical questions emphasizing the methodological challenges inherent in scholarly attempts to account for and analyze the rise of identity technologies The collection also includes an interview with Lauren Berlant on her use of blogs as research and writing tools *Media Archaeology and Intermedial Performance* Nele Wynants, 2018-12-30 This book develops media archaeological approaches to theatre and intermediality As an age old art form theatre has always embraced new media To create theatrical effects and optical illusions theatre makers were ready to integrate state of the art technics and technologies and by doing so they playfully explored and popularized scientific knowledge on mechanics optics and sound for live audiences This book highlights this obvious but often overlooked relation between media developments and the history of intermedial theater By considering the interplay between present intermedial performances and their archaeological traces the authors assembled here revisit old and often forgotten media approaches and theatre technologies This archaeology is understood less as the discovery of a forgotten past than as the establishment of an active relationship between past and present Rather than treating archaeological remains as representative tokens of a fragmented past that need to be preserved the authors stress the return of the past in the present but in a different performative guise Media Events in a Global Age Nick Couldry, Andreas Hepp, Friedrich Krotz, 2009-10-16 This volume assembles an estimable range of critical analyses of one of the most important mediated artifacts of the modern world the media event The authors challenge the construct extend its usefulness expand its theoretical basis and application and examine media events in a far larger and richer context than ever before Students of global media today are well served by this superb collection of essays David Morgan Duke University USA A welcome and worthy successor to Dayan and Katz's path breaking study that expands and enriches the discourse on global media events Daya Thussu University of Westminster UK This is an excellent collection that will enable new kinds of argument about and hopefully research into the spectacular functions of the contemporary media Graeme Turner University of Queensland Australia We live in an age where the media is intensely global and profoundly changed by digitalization Not only do many media events have audiences who access them online but additionally digital media flows are generating new ways in which media events can emerge In times of increasingly differentiated media technologies and fragmented media landscapes the eventization of the media is increasingly important for the marketing and everyday appreciation of popular media texts The events covered include Celebrity Big Brother 9 11 the Iraq war and World Youth Day 2005 to give readers an

understanding of the major debates in this increasingly high profile area of media and cultural research **Media Capital**
Aurora Wallace,2012-10-23 Nineteenth century press barons in New York City helped to invent the skyscraper Early newspaper buildings in the country s media capital were designed to communicate both commercial and civic ideals provide public space and prescribe discourse and speak to class and mass in equal measure Wallace illustrates how the media have continued to use the city as a space in which to inscribe and assert their power She considers how architecture contributed to the power of the press the nature of the reading public the commercialization of media and corporate branding in the media industry Museum Media Michelle Henning,2020-11-19 MUSEUM MEDIA Edited by Michelle Henning Museum Media explores the contemporary uses of diverse media in museum contexts and discusses how technology is reinventing the museum It considers how technological changes from photography and television through to digital mobile media have given rise to new habits forms of attention and behaviors It explores how research methods can be used to understand people s relationships with media technologies and display techniques in museum contexts as well as the new opportunities media offer for museums to engage with their visitors Entries written by leading experts examine the transformation of history and memory by new media the ways in which exhibitions mediate visitor experience how designers and curators can establish new kinds of relationships with visitors the expansion of the museum beyond its walls and its insertion into a wider commercial and corporate landscape Focusing on formal theoretical and technical aspects of exhibition practice this in depth volume explores questions of temporality attachment to objects atmospheric and immersive exhibition design the reinvention of the exhibition medium and much more
