New Self, New World Philip Shepherd, 2011-05-31 In the tradition of Quantum Healing and Guns Germs and Steel Philip Shepherd's *New Self New World* makes an intellectual inquiry into how we might restore freedom creativity and a sense of presence in the moment by rejecting several fundamental myths about being human *New Self New World* challenges the primary story of what it means to be human the random and materialistic lifestyle that author Philip Shepherd calls our shattered reality This reality encourages us to live in our heads self absorbed in our own anxieties Drawing on diverse sources and inspiration *New Self New World* reveals that our state of head consciousness falsely teaches us to see the body as something we possess and to try to take care of it without ever really learning how to inhabit it Shepherd articulates his vision of a world in which each of us enjoys a direct unmediated experience of being alive He petitions against the futile pursuit of the known self and instead reveals the simple grace of just being present In compelling prose Shepherd asks us to surrender to the reality of what is that enables us to reunite with our own being Each chapter is accompanied by exercises meant to bring Shepherd's vision into daily life what the author calls a practice that facilitates the voluntary sabotage of long standing patterns *New Self New World* is at once a philosophical primer a spiritual handbook and a roaming inquiry into human history

Diversity and Self-Determination in International Law Karen Knop, 2002-04-18 The emergence of new states and independence movements after the Cold War has intensified the long standing disagreement among international lawyers over the right of self determination especially the right of secession Knop shifts the discussion from the articulation of the right to its interpretation She argues that the practice of interpretation involves and illuminates a problem of diversity raised by the exclusion of many of the groups that self determination most affects Distinguishing different types of exclusion and the relationships between them reveals the deep structures biases and stakes in the decisions and scholarship on self determination Knop's analysis also reveals that the leading cases have grappled with these embedded inequalities Challenges by colonies ethnic nations indigenous peoples women and others to the gender and cultural biases of international law emerge as integral to the interpretation of self determination historically as do attempts by judges and other institutional interpreters to meet these challenges

*Mobilizing Regions, Mobilizing Europe* Sebastian M. Buettner, 2013-10-23 Regional development strategies are becoming

more similar all around Europe even though regional differences are more pronounced than ever and many European regions have become more autonomous actors This thesis of a peculiar standardized diversification of sub national space in the modern European Union is the point of departure of this book Based upon the analytical premises of Stanford School Sociological Institutionalism Sebastian M B ttner studies regional mobilization in contemporary Europe from a new and innovative perspective He highlights the importance of scientific expertise and global scientific models in contemporary regional development practice and exemplifies their significance with the example of region building in Poland in the course of EU integration This new wave of regional mobilization is not just conceived as an effect of local national or European politics but as an expression of a larger conceptual shift in governing society and space This well researched and clearly argued book not only provides fresh insights into region building and regionalization in contemporary European space but also contributes to the new sociology of Europeanization It will be an illuminating read for scholars and students in Sociology European and EU studies International Relations Cultural Studies Geography Regional Science Polish Studies and related subject areas

**Raising Resilient Children with a Borderline or Narcissistic Parent** Margalis Fjelstad, Jean McBride, 2020-11-03 Being partnered with a narcissist or borderline personality can be hard enough but learning how to shield children from the fallout is paramount Here the authors show readers how to manage parenting when a narcissistic or borderline partner is part of the equation Life in a narcissistic family system is at best challenging and too often filled with chaos isolation emotional outbursts and rigid controlling behaviors It is too often devoid of peace and emotional safety In the worst outcomes children in these families grow up with low self worth issues with trust and belonging and a lack of self compassion They are at significant risk of carrying the cycle forward and having poor adult relationships This book offers a way to intervene and disrupt the cycle of negative outcomes for children Written by two family therapists who bring a combined total of sixty years of clinical practice with individuals and families the book pulls no punches giving clear headed advice easy to follow actions to help children and an abundance of teaching examples Instead of the doom and gloom scenarios often presented about life with a narcissist or borderline this book provides a much more positive outlook and most importantly it offers hope and a path to an entirely different outcome for the family members Supported by current research in neuroscience mindfulness and parenting information the book focuses on teaching resilience and self compassion to raise emotionally healthy children even in a narcissistic family system It starts by helping parents get a clear understanding of what they face with a narcissistic or borderline partner There is no room here for denial but there are also many options to explore It explains how and why the narcissistic family system functions so poorly for raising healthy children and pinpoints the deficits while providing information on how to intervene more effectively for the benefit of the children Using their years of experience the authors present ideas for staying together as well as knowing when to leave the relationship and how best to do that Emphasis throughout the book is on supporting and strengthening the reader with encouragement concrete ideas

Self-Determination after Kosovo Annemarie Peen Rodt, Stefan Wolff, 2017-10-02. Kosovo embodies a key moment in the international practice of dealing with secessionist self-determination conflicts. For the first time outside of the colonial context and excepting Bangladesh in 1971, an entity's declaration of independence has been widely albeit not universally recognised. As such, the case of Kosovo has sharpened the focus and intensified the debate on the issue of self-determination conflicts and how they are managed by the international community. This volume contributes to this debate by examining Kosovo in historical and contemporary comparative perspective and by reflecting on the legal, ethical, and political implications of its successful declaration of independence. This book was originally published as a special issue of *Europe Asia Studies*. The Aesthetics of Self-Harm Zoe Alderton, 2018-05-11. The Aesthetics of Self-Harm presents a new approach to understanding parasuicidal behaviour based upon an examination of online communities that promote performances of self-harm in the pursuit of an idealised beauty. The book considers how online communities provide a significant level of support for self-harmers and focuses on relevant case studies to establish a new model for the comprehension of the online supportive community. To do so, Alderton explores discussions of self-harm and disordered eating on social networks. She examines aesthetic trends that contextualise harmful behavior and help people to perform feelings of sadness and vulnerability online. Alderton argues that the traditional understanding of self-violence through medical discourse is important but that it misses vital elements of human group activity and the motivating forces of visual imagery. Covering psychiatry and psychology, rhetoric and sociology, this book provides essential reading for psychologists, sociologists, and anthropologists exploring group dynamics and ritual, and rhetoricians who are concerned with the communicative powers of images. It should also be of great interest to medical professionals dealing with self-harming patients. Self-control Mary Brunton, 1839. Self-Compassion for Parents Susan M. Pollak, 2019-07-30.
