critical care practitioners and features coverage of the physiological effects of mechanical ventilation on different cross sections of the population. Additionally, user-friendly features promote critical thinking and clinical application such as key points, AARC clinical practice guidelines, critical care concepts, and updated learning objectives. UNIQUE Ventilator Associated Pneumonia chapter presents in-depth comprehensive coverage on this very challenging issue. Critical Care Concepts present short questions that challenge you to apply knowledge learned to difficult concepts. Brief patient case studies list pertinent assessment data and pose a critical thinking question to test your content comprehension. Key Points draw attention to pivotal concepts and highlight important information as topics are addressed. Intended for classroom or small group discussions. Clinical Scenarios offer a more comprehensive patient scenario that covers patient presentation, assessment data, and treatment options. Logical sequencing of chapters builds on previously learned concepts. Comprehensive Learning Objectives provide a clear, concise listing of what you need to learn in the chapter. Bulleted end of chapter summaries help assess comprehension and guide study efforts. Excerpts of Clinical Practice Guidelines developed by the American Association for Respiratory Care (AARC) are presented in a convenient reader-friendly format. Chapter outlines provide a big picture of the chapter content. NBRC style end of chapter review questions reinforce the very difficult concept of mechanical ventilation with practice that focuses on certification exam success. Glossary of mechanical ventilation terminology provides definitions for highlighted key terms in each chapter. UPDATED: Revised content throughout reflects the latest standards of respiratory care.

Equipment for Respiratory Care Teresa A. Volsko, Robert L. Chatburn, Mohamad F. El-Khatib, 2020-11-24. Caring for the Ventilator Dependent Child Laura M. Sterni, John L. Carroll, 2016-07-12. This book is an important new resource for clinicians caring for ventilator-dependent children who often have complex health care needs. They are supported by advanced technology and are at high risk of serious complications. Despite the complicated health care needs of children who rely on chronic respiratory support, there are few guidelines and little evidence available to guide the clinicians who care for these patients. This book covers the many aspects involved in the care of these complex children with input from experts in the fields of pediatric pulmonology, intensive care, ethics, respiratory therapy, and nursing. In-depth chapters provide an introduction to the use of chronic invasive and non-invasive ventilation in children and describe and review what is known about methods of delivering ventilator support care of the chronically ventilated patient in the community, use of chronic ventilator support in patients with disorders commonly leading to respiratory failure, and outcomes for patients and their caregivers. This book is intended to be useful not only for pediatric pulmonologists but also for intensivists, cardiologists, physical medicine/rehabilitation specialists, nurses, respiratory therapists, and the primary care physicians involved in the complexities of managing care for this unique group of special needs children.
