Gibson, 2012 Leading scholars present critical accounts of every aspect of the field including work in animal behaviour anatomy genetics and neurology the prehistory of language the development of our uniquely linguistic species and language creation transmission and change *The Quest for Symbolic Communication in Non-Human Animals* Ulrike Griebel, D. Kimbrough Oller, Irene M. Pepperberg, 2024-06-13 Human language is unique among animals We assume that complex cognitive capacities in general and language in particular evolved gradually and thus are manifest in different kinds and or degrees in other animals demonstrating social communication This assumption is supported by the fact that we can train social species from very different groups of animals e g great apes dolphins dogs parrots to understand and in several cases even use abstract symbols for communication with humans and conspecifics Even simple grammatical rules for sequences of 2 3 symbols can be trained to be understood by several species e g great apes dogs dolphins Even though human language training in these species takes considerable time and effort it convinces us that cognitive foundations for language are present in other species and given the relevant selection pressures symbolic communication could evolve in other species **The Origins of Self** Martin P. J. Edwardes, 2019-07-22 The Origins of Self explores the role that selfhood plays in defining human society and each human individual in that society It considers the genetic and cultural origins of self the role that self plays in socialisation and language and the types of self we generate in our individual journeys to and through adulthood Edwardes argues that other awareness is a relatively early evolutionary development present throughout the primate clade and perhaps beyond but self awareness is a product of the sharing of social models something only humans appear to do The self of which we are aware is not something innate within us it is a model of our self produced as a response to the models of us offered to us by other people Edwardes proposes that human construction of selfhood involves seven different types of self All but one of them are internally generated models and the only non model the actual self is completely hidden from conscious awareness We rely on others to tell us about our self and even to let us know we are a self *In Search of Self* J. Wentzel van Huyssteen, Erik P. Wiebe, 2011-04-29 Includes bibliographical references and indexes Form and Object Tristan Garcia, 2014-03-17 What is a thing What is an object Tristan Garcia decisively overturns 100 years of Heideggerian orthodoxy about the supposedly derivative nature of objects to put forward a new theory of ontology that gives us deep insights into the world and our place in it Next of Kin Roger Fouts, Stephen Mills, 1998-09 In the tradition of When Elephants Weep comes the captivating story of the man who has made
