or disabled Under what conditions is it granted or withheld and by whom We regard the public sphere as the nodal point for the discourses of business politics and media and this basic assumption is also reflected in the structure of the volume Each of these three macro topics comprises chapters by international scholars from a variety of disciplines and research traditions who each combine up to date overviews of the relevant literature with their own cutting edge research into aspects of different public spheres such as corporate promotional communication political rhetoric or genre features of electronic mass media The broad scope of the volume is perhaps best reflected in a comprehensive discussion of communication technologies ranging from conventional spoken and written formats such as company brochures political speeches and TV shows to emerging ones like customer chat forums political blogs and text messaging Due to the books wide scope its interdisciplinary approach and its clear structure we are sure that whether you work in communication and media studies linguistics political science sociology or marketing you will find this handbook an invaluable guide offering state of the art literature reviews and exciting new research in your field and adjacent areas
