primary school to secondary school and university level Regarding physics content the book presents teaching proposals highlighting conceptual aspects and exemplary methodologies of interpretation in physics such as the physics of fluids and quantum mechanics It also includes research contributions on different methods and proposals for implementing practical activities reflecting on the role of the laboratory in learning the discipline and providing examples of integrating experimental and cognitive skills The book also addresses the role of affective variables such as physics identity self efficacy and attitudes toward physics in the learning process Additionally studies on teachers professional development are presented which can inform the design of proposals for educational paths and methods within a framework of close collaboration between schools and physics departments

**Light as Experience and Imagination from Paleolithic to Roman Times** David S. Herrstrom, 2017-09-26 This book is an interdisciplinary synthesis and interpretation about the experience of light as revealed in a wide range of art and literature from Paleolithic to Roman times Humanistic in spirit and in its handling of facts it marshals a substantial body of scholarship to develop an explication of light as a central even dramatic reality of human existence and experience in diverse cultural settings David S Herrstrom underscores our intimacy with light not only its constant presence in our life but its insinuating character Focusing on our encounters with light and ways of making sense of these this book is concerned with the personal and cultural impact of light exploring our resistance to and acceptance of light Its approach is unique The book's true subject is the individual's relationship with light rather than the investigation of light's essential nature It tells the story of light seducing individuals down through the ages Consequently it is not concerned with the progress of scientific inquiries into the physical properties and behavior of light optical science but rather with subjective reactions to it as reflected in art Paleolithic through Roman architecture Egyptian Grecian Roman mythology and religion Paleolithic Egyptian and literature e.g. Akhenaten Plato Aeschylus Lucretius John the Evangelist Plotinus and Augustine This book celebrates the complexity of our relation to light's character No individual experience of light is truer than any other none improves on any previous experience of light's tidal pull on us And the wondrous variety of these encounters has yielded a richly layered tapestry of human experience By its broad scope and interdisciplinary approach this pioneering book is without precedent

**The Emergence** Howard A. Cooper, 2018-01-22 Did you know that you are of great importance to the universe You are part of a mosaic of life and you have meaning This is not intended to make you feel good or bad It is a fact of third dimensional reality and beyond You are an ingredient in the flow of history but the reasons why can seem a mystery Only you hold the key to your existence What is the meaning of life What is your ultimate destination We liken the journey of life to walking the path of a labyrinth The initial step of the journey is to simply realize what exists in the world today the second is to realize the parts we play The third step highlights issues that interfere with our potential and provides tools to set us free The fourth reflects a vision of the future that is totally dependent on our willingness to step beyond our current world conditions and level of consciousness As we travel through this lifelong labyrinth of third dimensional reality we must keep in mind that there are many paths but only one journey This path that you now walk is the key to the great mystery of existence your existence Finding purpose is a logical goal and in part that is necessary but there is a greater mystery to solve on your journey Are you ready to find the answers *Light as Experience and Imagination from*

*Medieval to Modern Times* David S. Herrstrom, 2022-11-21 In *Light as Experience and Imagination from Medieval to Modern Times* David S. Herrstrom synthesizes and interprets the experience of light as revealed in a wide range of art and literature from medieval to modern times. The true subject of the book is making sense of the individual's relationship with light rather than the investigation of light's essential nature while telling the story of light seducing individuals from the Middle Ages to our modern times. Consequently it is not concerned with the progress of scientific inquiries into the physical properties and behavior of light optical science but rather with subjective reactions as reflected in art architecture and literature. Instead of its evolution this book celebrates the complexity of our relation to light's character. No individual experience of light being truer than any other.

Light Science Thomas D. Rossing, Christopher J. Chiaverina, 2020-01-03 Intended for students in the visual arts and for others with an interest in art but with no prior knowledge of physics this book presents the science behind what and how we see. The approach emphasises phenomena rather than mathematical theories and the joy of discovery rather than the drudgery of derivations. The text includes numerous problems and suggestions for simple experiments and also considers such questions as why the sky is blue how mirrors and prisms affect the colour of light how compact disks work and what visual illusions can tell us about the nature of perception. It goes on to discuss such topics as the optics of the eye and camera the different sources of light photography and holography colour in printing and painting as well as computer imaging and processing.

**Abuela Ayahuasca** Christian Funder, 2025-05-06 Examina c mo la ayahuasca afecta el cerebro desde una perspectiva neurocientífica y la manera en que sus efectos sobre la conciencia se relacionan con antiguos textos esotéricos. Comparte entrevistas con personas que han experimentado los poderosos efectos de la ayahuasca como m dico espiritual y su propio viaje desde la depresi n suicida hasta la paz del alma. Investiga c mo se entrelazan la ayahuasca y las antiguas pr cticas del chamanismo del Amazonas. Elaborada a partir de una combinaci n de dos plantas las hojas de *Psychotria viridis* y la liana *Banisteriopsis caapi* la ayahuasca ha sido utilizada durante milenios por tribus indógenas del Alto Amazonas para la sanaci n y la exploraci n espiritual. Los chamanes de la Amazonia peruana llaman al esp ritu vegetal que habita esta liana Abuela Ayahuasca. Al explorar la historia tradici n uso cham nico efectos psicoactivos y estudios científcos actuales Christian Funder demuestra que la Abuela Ayahuasca es una sanadora profunda una maestra sabia y una gu a transformadora. Desde una perspectiva neurocientífica el autor presenta investigaciones recientes de los efectos del DMT uno de los componentes psicoactivos de la ayahuasca as como estudios de resonancia magn tica funcional de la actividad cerebral durante estados alterados. Funder explora estos hallazgos en relaci n con las ense anzas sobre los estados unificados de conciencia en antiguos textos esotéricos y con la teor a de Aldous Huxley sobre los psicod licos que inhiben el mecanismo de la v lvula reguladora del cerebro. Funder comparte entrevistas con personas que han experimentado los poderosos efectos de la ayahuasca como m dico espiritual y narra su propio viaje de sanaci n desde la depresi n suicida hasta la paz interna. Tambi n explora la relaci n de la ayahuasca con el chamanismo indógena amaz nico incluyendo una mirada al interior de la tribu

shipibo y los cantos curativos conocidos como caros Al ofrecer una imagen holística de la ayahuasca desde la ciencia hasta el espíritu el autor muestra que esta venerada infusión alucinógena tiene un inmenso potencial terapéutico y podría ser la conexión chamánica perdida hace mucho tiempo con la mente sagrada de Gaia      [A History of Light and Colour Measurement](#) Sean F. scientific fact is not the existence of the physical universe but our awareness of that universe Not even the most advanced physics physiology or psychology however can explain even the most elementary qualities of our sensory awareness of that universe qualities such as redness for example Qualia used to be defined as sensory qualities such as colour and tone But what if awareness is not an empty receptacle for sensory impressions but has its own intrinsic sensual qualities of the sort we experience as the inwardly sensed shape and substantiality of our bodies the sensed lightness or darkness colour or tone of our moods or a sensed feeling of warmth or coolness closeness or distance to another human being What if such sensual qualities of awareness are intrinsically meaningful being the felt essence of meaning or sense is not energetic quanta but qualia in this sense sensed and sensual qualities of awareness that are the basic stuff of which the universe is composed It argues that qualia are not simply qualities of our own human awareness but fundamental units of awareness Atoms molecules and cells are recognised as the physical form taken by field patterns of atomic molecular and cellular awareness composed of such units The soul is understood as an ever changing gestalt of such units each of which possess characteristics of both unit and field particle and wave allowing the soul qualities of our own awareness to mix and merge with those of all other beings      *Apostle To The Dimensions* Mark J Molinoff, 2025-05-01 Apostle to the Dimensions is a bold fusion of visionary science fiction and deep Christian spirituality tracing the extraordinary journey of Lila a gifted eighteen year old with a love for mathematics and a heart devoted to God When a school project on the Fibonacci Sequence reveals a divine pattern woven into creation Lila is thrust into a destiny she never expected Much like the Apostle Paul traveled across

continents to spread the gospel Lila is called on an inter dimensional mission one that will take her to breathtaking and perilous worlds beyond imagining Each realm holds new challenges and unfamiliar beings but also lost souls who have fallen into spiritual darkness Guided by scripture prayer and the quiet prompting of the Holy Spirit Lila comes to see that her gift wasn't random it was a key divinely planted to help reignite faith across the cosmos As she confronts challenges questions her purpose and faces the high cost of obedience Lila discovers that true faith doesn't retreat from the unknown it embraces it Rich with cosmic wonder and grounded in biblical truth Apostle to the Dimensions is a spiritually uplifting adventure for readers who believe that God's glory transcends galaxies and reaches into every searching heart **The Physics Book**
