Seixas, 2017-02-01 The history of twentieth century Spanish nationalism is a complex one placing a set of famously distinctive regional identities against a backdrop of religious conflict separatist tensions and the autocratic rule of Francisco Franco And despite the undeniably political character of that story cultural history can also provide essential insights into the subject Metaphors of Spain brings together leading historians to examine Spanish nationalism through its diverse and complementary cultural artifacts from formal representations such as the flag to music bullfighting and other more diffuse examples Together they describe not a Spanish national essence but a nationalism that is constantly evolving and accommodates multiple interpretations

Regeneration through Sport Andrew McFarland, 2022-12-01 This book examines how and why sport in general and

football in particular entered the country and developed successfully between 1890 and the 1920s while placing that growth within the context of Spain's larger historical experience. The introduction of sport in the late 19th century permanently changed the day to day lives of thousands of Spaniards. Initially the country's growing urban middle classes embraced the new activity as they built community identities and were introduced to it through economic and educational connections to foreigners. To justify this these proponents argued that the adoption of physical education and sport would physically regenerate the nation. In response well rounded sporting communities grew developed medical arguments and even debated the activity's appropriateness for different groups like women. As sport spread it produced the first football clubs around the turn of the century. Subsequently in the 1910s and early 1920s football established the structural institutions like stadiums stars regulatory bodies and a press that enabled its rapid expansion as a mass consumer activity in the late 1920s. *Regeneration through Sport* looks at how this process embedded the sport within the national culture and established itself as a politically neutral activity before the Spanish Second Republic allowing it to become almost ubiquitous today. This book will appeal to researchers students and scholars alike who are interested in the history of sport Spain and European history.

America, History and Life, 2006 Article abstracts and citations of reviews and dissertations covering the United States and Canada. *The Product of Our Souls* David Gilbert, 2015-05-18. In 1912 James Reese Europe made history by conducting his 125 member Clef Club Orchestra at Carnegie Hall. The first concert by an African American ensemble at the esteemed venue was more than just a concert it was a political act of desegregation a defiant challenge to the status quo in American music. In this book David Gilbert explores how Europe and other African American performers at the height of Jim Crow transformed their racial difference into the mass market commodity known as black music. Gilbert shows how Europe and others used the rhythmic sounds of ragtime blues and jazz to construct new representations of black identity challenging many of the nation's preconceived ideas about race culture and modernity and setting off a musical craze in the process. Gilbert sheds new light on the little known era of African American music and culture between the heyday of minstrelsy and the Harlem Renaissance. He demonstrates how black performers played a pioneering role in establishing New York City as the center of American popular music from Tin Pan Alley to Broadway and shows how African Americans shaped American mass culture in their own image.

Musicophilia in Mumbai Tejaswini Niranjana, 2020-02-28. In *Musicophilia in Mumbai* Tejaswini Niranjana traces the place of Hindustani classical music in Mumbai throughout the long twentieth century as the city moved from being a seat of British colonial power to a vibrant postcolonial metropolis. Drawing on historical archives newspapers oral histories and interviews with musicians critics students and instrument makers as well as her own personal experiences as a student of Hindustani classical music Niranjana shows how the widespread love of music throughout the city created a culture of collective listening that brought together people of diverse social and linguistic backgrounds. This culture produced modern subjects Niranjana calls musicophiliacs whose subjectivity was grounded in a social rather than an

individualistic context By attending concerts learning instruments and performing at home and in various urban environments musicophiliacs embodied forms of modernity that were distinct from those found in the West In tracing the relationship between musical practices and the formation of the social subject Niranjana opens up new ways to think about urbanity subjectivity culture and multiple modernities
