Transnational Interconnections of Nature Studies and the Environmental Humanities Sophia Emmanouilidou, Sezgin Toska, 2020-02-24 How is ecotthinking articulated in varied research fields? What are the conjunctions and concurrences of academic endeavors in the attempt to curb environmental destruction? This collection of essays offers a multifaceted exploration of the basic tenets of environmentalism proposed by academic curricula across the world. Ecodestruction, the wilderness, rampant pollution, tourism, developments, sustainability, educational interventions and the plurivocal turn to ecotheoretical textual analysis are some of the critical perspectives and scientific findings investigated here. The book introduces a multilateral understanding of environmental consciousness and suggests that the study of nature should not be compartmentalized into separate fields of analyses but aim for the interconnections between disciplines, given that the physical cosmos is an unambiguous and finite host of humanity's endeavours. The volume appeals to academics, researchers and professionals with a particular interest in the current environmental crisis, offers solid insights into the ways human societies construe nature and hopefully will embark on the protection of the ecosphere.
