Handbook of Corporate University Development Geoff Peters, 2017-11-28 From the moment the first corporate university CU was created and the term was coined the central metaphor of university has proved a double edged sword The emphasis on university has been a driving force in moving companies beyond a restricted and siloed approach to training to a central vision for learning within the organization On the other hand there have been failures and many corporate universities have struggled to bring a business rigour to learning or to align their development with the key business and financial drivers of the organization Handbook of Corporate University Development draws on experience from around the world to provide anyone responsible for strategy and learning at senior levels in government education and business with a picture of current best practice The Handbook is not a prescriptive how to rather an exploration of key issues such as Who owns a corporate university initiative How is the funding managed How is the CU aligned with business strategy How do CU directors and project managers deploy resources How do they deal with suppliers How do they report and measure CU performance What are the processes and technologies needed to provide and support different forms of learning How can you blend different media How do you assess what learning has taken place What are the future prospects and potential for corporate universities It is time for the corporate university to demonstrate how business rigour handled deftly and with strong and perceptive leadership can revolutionize learning both inside and outside the organization Handbook of Corporate University

It has a novel orientation and its primary aim is to let practitioners and students know the latest and best trends in organizational behaviour. This book prescribes methods to manage employees and suggests that the management takes responsibility for everything that might adversely affect an employee's capacity to work creatively and intelligently irrespective of the place inside the organization or outside it. The focus of the book is on holistic development of the individual, peeping into the human mind. It shows how organizations can tap the passions and fears of their employees to make them more creative and productive. The book prescribes a democratic and inclusive management style. Every point in the objectives has corresponding text and is supplemented by a case. Going through this book will be a personally fulfilling experience and maybe it succeeds to make the readers better human beings, better teachers, better friends and may be even better managers. It proposes the eight Cs of trust which can define the culture of organizations: contracts, covenants, competences, character, conscience, conviction, courage and change. The book makes the clear link between personal decision making and global outcomes and demonstrates how positive decision making can lead to change inside organizations and
