The New World Order Gordana Yovanovich, 2003 In The New World Order contributors discuss an alternative value system to that of the market led corporate global agenda This system does not directly challenge corporate globalization but operates in parallel with it creating new possibilities The authors expose the threats posed by the New World Order and propose a more positive way of dealing with the future BACK COVER      Wiki vs NWO (New World Order) Grant Elder, 2014-11-05 Most people shun the word conspiracy The media has made it seem like all conspiracies are theories and that anyone who discusses them is a tinfoil hat Yet anyone who has studied history or business knows that conspiracies are a part of the human experience Once we realize this the question arises what conspiracies are occurring in our time that are significant What perceptions of the world do we hold that are incorrect Western civilization although technologically advanced beyond the days of a Flat Earth or geocentric universe is blind to its own corruptions Our governing practices were established over a century ago and have evolved very little If we could apply the success we've had in science technology and understanding the human condition to the way we govern our society what would our world look like Beforewarned The journey starts off frightfully dark and many people do not have the emotional fortitude to face the real demons But if you make the journey it is very rewarding to realize that we have at our disposal the means to create a remarkable world for the next generation if we so choose This book blends business management strategies leveraged by technology to address the inherent problems in governments Presented in a clear step by step manner that provides readers with a unique and fresh look at alternatives to our present system      *Pivot Cities in the Rise and Fall of Civilizations* Ahmet Davutoğlu, 2021-09-30 Based on the author's long experience in academic life and the public realm especially in foreign policy this book argues that a single categoric classification of cities is inadequate and that cities have had different and varied impacts and positions throughout the history of civilization The author examines how the formation transformation destruction or reestablishment of many civilizational cities reveals a clearer picture of the cornerstones of the course of human history These cities which play a decisive and pivotal role in the direction of the flow of history as well as providing us with a compass to guide our efforts to understand and interpret this flow are conceptualized by the author as civilizations pivot cities This innovative book explores the role of great cities in political historical change presenting an alternative view of these pivot cities from a culturalist perspective Within this framework the role played by pivot cities in the history of civilization may be considered under seven distinct headings pioneering cities which founded civilizations cities which were founded by civilizations cities which were transplanted during the formation of civilizations ghost cities which lost their importance through shifts in political power and civilizational transformation lost cities which were destroyed by civilizations cities on lines of geocultural geoeconomic interaction and cities which combine transform or are transformed by different civilizations The author's concept of pivot cities explores the interplay between vital cities and civilizations which bears on

the future of globalization at a time of instability as projected continuing de Westernization becomes a theme in studies of global history This book provides highly productive discussions relevant to the literature on city civilization relationships and the historicity of pivot cities Its clear language rich content deep and original perspective interdisciplinary approach and rich bibliography will ensure that it appeals to students and scholars in a variety of disciplines including cultural studies political science comparative urban studies anthropology history and civilizational studies *Knowledge and Information Technology Management: Human and Social Perspectives* Gunasekaran, Angappa,Khalil, Omar E.
