**Solutions** Allen Salowe, Leon Lessinger, 2002-05-14

This easy-to-read book integrates research and performance-based concepts in order to demystify and debunk the conventional wisdom about education. For many years, education has been beset by myths, myths that it can't be fixed with new concepts that it takes specialists to diagnose what's wrong, that research doesn't reflect the real world, that the lessons of business cannot be generalized to education. This book takes on these misunderstandings and shows precisely what educators may do in order to overcome them. Educators will find Salowe and Lessinger's advice to be a rational, sober, and research-based approach to an often-debated topic.

**Reading Sacred Scripture** Stephen Westerholm, Martin Westerholm, 2016

A rich display of the Christian tradition's reading of Scripture. Though well-known and oft-repeated, the advice to read the Bible like any other book fails to acknowledge that different books call for different kinds of reading. The voice of Scripture summons readers to hear and respond to its words as divine address. Not everyone chooses to read the Bible on those terms, but in *Reading Sacred Scripture*, Stephen and Martin Westerholm, father and son, invite their readers to engage seriously with a dozen major Bible interpreters ranging from the second century to the twentieth who have been attentive to Scripture's voice. After expertly setting forth pertinent background context in two initial chapters, the Westerholms devote a separate chapter to each interpreter, exploring how these key Christian thinkers each understood Scripture and how it should be read. Though differing widely in their approaches to the text and its interpretation, these twelve select interpreters all insisted that the Bible is like no other book and should be read accordingly.

*Exploring Student Response to Contemporary Picturebooks* Sylvia Pantaleo, 2009-10-14

Despite being a source of continuing interest to educational scholars, research into the literary understanding of elementary school students has emphasized written materials over multimodal mediums such as picturebooks. Focusing on students in Grades one and five, this book describes children's interpretations of and responses to a variety of contemporary picturebooks, specifically those books that employ radical change characteristics and metafictional devices. In dealing with picturebooks, Sylvia Pantaleo seeks to show the ways in which literature teaches artistic codes and conventions, critical thinking skills, visual literacy skills, and interpretative strategies. Aside from investigating specific picturebooks, Pantaleo discusses the broader implications of reading, viewing, and creating print and digital texts in schools. These exercises, she argues, reflect the changing nature of communication and representation in the world of elementary school students. Incorporating postmodernism, social constructivism, and other theoretical frameworks, Pantaleo contextualizes her research and examines ways in which literature highlights broader social

and cultural characteristics An extensively researched look at the pedagogical value of literature in the classroom this book introduces new dimensions to discussions of contemporary picturebooks in elementary education and the social nature of intertextuality
