

5. Pass the inner cable through the 1/8" (20mm) outer casing through the end with the plastic cap.

■ Cassette joint side

6. After checking that the end of the outer casing is sitting securely in the cable adjustment bolt of the Revs-shift lever, attach the inner cable fixing bolt unit to the inner cable.

7. Bring the cable around to the cassette joint pulley, hold so that the inner cable fixing nut is facing to the outside (toward the fork end), and then slide the flat part of the inner cable fixing washer into the gap in the pulley.

8. Turn the cable 60° counterclockwise and attach it to the hook.

9. Attach the inner cable to the pulley as shown in the illustration, pass the inner cable through the slit in the cassette joint bracket, and then insert the end of the outer casing securely into the outer casing holder.

If it is easier to insert the outer casing into the outer casing holder first, do so. Then insert a 2mm Allen key or a #14 spoke into the hole in the cassette joint pulley and turn the pulley so that the inner cable fixing bolt unit fits into the gap in the pulley.

Note: Check that the inner cable is correctly seated inside the pulley guide.

10. Secure the cable to the frame with the outer casing bands.

Adjusting the cassette joint

1. Set the Revs-shift lever to II. Check to be sure that the yellow setting lines on the cassette joint bracket and pulley are aligned at this time.

The yellow setting lines on the cassette joint are located in two places. Use the one that is easiest to see.

When bicycle is standing up

Should be straight

When bicycle is upside down

Should be straight

If the yellow setting lines are not aligned, turn the cable adjustment bolt of the shifting lever to align the setting lines. After this, move the shifting lever once more from II to I and then back to II, and then re-check to be sure that the yellow setting lines are aligned.

2. After adjusting the cassette joint, cut off the excess length of inner cable and then install the inner end cap.

General Safety Information

⚠ CAUTION

To avoid serious injuries: Be sure to shift the lever one gear at a time, and reduce the force being applied to the pedals during shifting. If you try to force operation of the shifting lever while the pedals are being turned strongly, your feet may come off the pedals and the bicycle may topple over, which could result in serious injury.

Thomas Rötzer, 2019-10-23 Numerous studies indicate an accelerated growth of forest trees induced by ongoing climate change Similar trends were recently found for urban trees in major cities worldwide Studies frequently report about substantial effects of climate change and the urban heat island effect UHI on plant growth The combined effects of

increasing temperatures changing precipitation patterns and extended growing season lengths in addition to increasing nitrogen deposition and higher CO₂ concentrations can increase but also reduce plant growth Closely related to this the multiple functions and services provided by urban trees may be modified Urban trees generate numerous ecosystem services including carbon storage mitigation of the heat island effect reduction of rainwater runoff pollutant filtering recreation effects shading and cooling The quantity of the ecosystem services is often closely associated with the species structure age and size of the tree as well as with a tree's vitality Therefore greening cities and particularly planting trees seems to be an effective option to mitigate climate change and the UHI The focus of this Special Issue is to underline the importance of trees as part of the urban green areas for major cities in all climate zones Empirical as well as modeling studies of urban tree growth and their services and disservices in cities worldwide are included Articles about the dynamics structures and functions of urban trees as well as the influence of climate and climate change on urban tree growth urban species composition carbon storage and biodiversity are also discussed

Britain's War At Sea, 1914-1918 Greg Kennedy, 2016-04-20 In Britain memory of the First World War remains dominated by the trench warfare of the Western Front Yet in 1914 when the country declared war the overwhelming expectation was that Britain's efforts would be primarily focussed on the sea As such this volume is a welcome corrective to what is arguably an historical neglect of the naval aspect of the Great War As well as reassessing Britain's war at sea between 1914 and 1918 underlining the oft neglected contribution of the blockade of the Central Powers to the ending of the war the book also offers a case study in ideas about military planning for the next war Questions about how next wars are thought about planned for and conceptualised and then how reality actually influences that thinking have long been and remain key concerns for

governments and military strategists The essays in this volume show what realities there are to think about and how significant or not the change from pre war to war was This is important not only for historians trying to understand events in the past but also has lessons for contemporary strategic thinkers who are responsible for planning and preparing for possible future conflict Britain s pre war naval planning provides a perfect example of just how complex and uncertain that process is Building upon and advancing recent scholarship concerning the role of the navy in the First World War this collection brings to full light the dominance of the maritime environment for Britain in that war and the lessons that has for historians and military planners
