**Slavery in the British Empire and Its Legacy in the Modern World** Stephen Cushion, 2025-06-05 Reveals that the institution of slavery was anchored in the same exploitative capitalist system which remains in place today Slavery in the British Empire and its Legacy in the Modern World by Stephen Cushion situates the crime of enslavement within the business practices that place profit before people The institution of slavery entailed a unique combination of exploitation and expropriation anchored in patterns of conspicuous consumption by the wealthy and intertwined with the textile food agriculture construction transportation infrastructure and insurance industries It was floated by the same banking and commodity trading systems that still remain today The exploitation of enslaved labor stimulated capitalist expansion during and after the bloody reign of the British Empire at the cost of war inter imperialist rivalry Indigenous genocide and the murderous suppression of the rights of the enslaved And as Cushion argues many of the direst problems still facing the world from horrific economic inequality to rampant environmental decline have their origins in the institution of slavery Correcting these wrongs will cost money Perversely there is no shortage of funds in the coffers of the institutions which perpetrated them Neither Anglo governments nor businesses have properly addressed their role Ultimately Slavery in the British Empire and its Legacy in the Modern World goes beyond cataloguing past wrongs to engaging with the legacies of slavery spotlighting above all the defiant response of those it wronged as they call for reparations and more [New Frontiers of Slavery](#) Dale W. Tomich, 2016-02-03 Essays challenging conventional understandings of the slave economy of the nineteenth century The essays presented in New Frontiers of Slavery represent new analytical and interpretive approaches to the crisis of Atlantic slavery during the nineteenth century By treating slavery within the framework of the modern world economy they call attention to new zones of slave production that were formed as part of processes of global economic and political restructuring Chapters by a group of international historians economists and sociologists examine both the global dynamics of the new slavery and various aspects of economy society and master slave relations in the new zones They emphasize the ways in which certain slave regimes particularly in Cuba and Brazil were formed as specific local responses to global processes industrialization urbanization market integration the formation of national states and the emergence of liberal ideologies and institutions These essays thus challenge conventional understandings of slavery which often regard it as incompatible with modernity **Writing the History of Slavery** David Stefan Doddington, Enrico Dal Lago, 2022-01-13 Exploring the major historiographical theoretical and methodological approaches that have shaped studies on slavery this addition to the Writing History series highlights the varied ways that historians have approached the fluid and complex systems of human bondage domination and exploitation that have developed in societies across the world The first part examines more recent attempts to place slavery in a global context touching on contexts such as religion empire and capitalism In its second part the book looks closely at the key themes and methods that emerge as historians reckon with the

dynamics of historical slavery These range from politics economics and quantitative analyses to race and gender to psychohistory history from below and many more Throughout examples of slavery and its impact are considered across time and place in Ancient Greece and Rome Medieval Europe colonial Asia Africa and the Americas and trades throughout the Atlantic and Indian Oceans Also taken into account are thinkers from Antiquity to the 20th century and the impact their ideas have had on the subject and the debates that follow This book is essential reading for students and scholars at all levels who are interested in not only the history of slavery but in how that history has come to be written and how its debates have been framed across civilizations *The Palgrave Handbook of Global Slavery throughout History* Damian A. **Nietzsche's Political Economy** Dmitri G. Safronov, 2023-08-21

Safronov's Nietzsche's Political Economy is a pioneering appraisal of Nietzsche's critique of industrial culture and its unfolding crisis. The author contends that Nietzsche remains unique in conceptualizing the upheavals of modern political economy in terms of the crisis of its governing values. Nietzsche scrutinises the norms which not only preside over the unfathomable build up in debt, the proliferation of meaningless impersonal slavery and the rise of increasingly repressive social control systems but inevitably set these precarious tendencies of modern political economy on a collision course liable to culminate in an unprecedented human and environmental catastrophe. Safronov explores the core themes of Nietzsche's political economy: debt, slavery and the division of labour with reference to the influential views of Adam Smith and Karl Marx as well as against the backdrop of the Long Depression 1873-1896, the first truly international crisis of industrial capitalism during which most of Nietzsche's work was completed. In Nietzsche's assessment, modern political economy is predicated on the valuations that diminish humankind's prospects and harm the planet's future by consistently enfeebling the present as long as there is profit to be made from it. Nietzsche's critical insight which challenges the most fundamental tenet of modern economics and finance is that in order to build a stronger and intrinsically more valuable future in lieu of simply speculating on it as though the liberal Promised Land could descend upon us like the manna from heaven at the wave of an invisible hand of the market, it is necessary to walk from the future we dare to envisage resolutely back to the present we inhabit to determine what demands achieving such a vision would impose upon us instead of embellishing the here and now by cynically discounting the future to the net value of the present while disparaging, disowning and rewriting the past to unburden ourselves of its troubling legacy as we continue to frivolously squander its capital to the alluring tunes of the sirens who in the marketplace sing to us of the future. The enabling mechanism for changing our valuing perspectives, Nietzsche tells us, lies dormant in us and it must be unlocked before it is too late.

*Slavery in the Circuit of Sugar, Second Edition*

Dale W. Tomich, 2016-02-22. Traces the historical development of slave labor and plantation agriculture in nineteenth century Martinique. A classic text long out of print, *Slavery in the Circuit of Sugar* traces the historical development of slave labor and plantation agriculture in Martinique during the period immediately preceding slave emancipation in 1848. Interpreting these events against the broader background of the world economy, Dale W. Tomich analyzes the importance of topics such as British hegemony in the nineteenth century, related developments of the French economy and competition from European beet sugar producers. He shows how slaves' adaptation and resistance to changing working conditions transformed the plantation labor regime and the very character of slavery itself. Based on archival sources in France and Martinique, *Slavery in the Circuit of Sugar* offers a vivid reconstruction of the complex and contradictory interrelations among the world market, the material processes of sugar production and the social relations of slavery. In this second edition, Tomich includes a new introduction in which he offers an explicit discussion of the methodological and theoretical issues entailed in developing and

extending the world systems perspective and clarifies the importance of the approach for the study of particular histories

American Mirror Roberto Saba, 2024-12-17 How slave emancipation transformed capitalism in the United States and Brazil In the nineteenth century the United States and Brazil were the largest slave societies in the Western world The former enslaved approximately four million people the latter nearly two million Slavery was integral to the production of agricultural commodities for the global market and governing elites feared the system's demise would ruin their countries Yet when slavery ended in the United States and Brazil in 1865 and 1888 respectively what resulted was immediate and continuous economic progress In American Mirror Roberto Saba investigates how American and Brazilian reformers worked together to ensure that slave emancipation would advance the interests of capital Saba explores the methods through which antislavery reformers fostered capitalist development in a transnational context From the 1850s to the 1880s this coalition of Americans and Brazilians which included diplomats engineers entrepreneurs journalists merchants missionaries planters politicians scientists and students among others consolidated wage labor as the dominant production system in their countries These reformers were not romantic humanitarians but cosmopolitan modernizers who worked together to promote labor saving machinery new transportation technology scientific management and technical education They successfully used such innovations to improve production and increase trade Challenging commonly held ideas about slavery and its demise in the Western Hemisphere American Mirror illustrates the crucial role of slave emancipation in the making of capitalism

**The Politics of the Second Slavery** Dale W. Tomich, 2016-12-30 The creation of new frontiers of slave commodity production and the expansion and intensification of slavery in Brazil Cuba and the southern United States were an integral part of the expansion of the world economy during the nineteenth century Beginning from this vantage point The Politics of the Second Slavery brings together a group of international scholars to reinterpret pro and antislavery politics both globally and nationally as part of the forces that were restructuring Atlantic slavery Individual chapters shed new light on the decolonization and nationalization of slavery in the Americas the politics of proslavery elites both within particular countries and across the Atlantic region the abolition of the international slave trade and slave resistance

**Global Agricultural Workers from the 17th to the 21st Century**, 2022-12-19 Agricultural workers have long been underrepresented in labour history This volume aims to change this by bringing together a collection of studies on the largest group of the global work force The contributions cover the period from the early modern to the present a period when the emergence and consolidation of capitalism has transformed rural areas all over the globe Three questions have guided the approach and the structure of this volume First how and why have peasant families managed to survive under conditions of advancing commercialisation and industrialisation Second why have coercive labour relations been so persistent in the agricultural sector and third what was the role of states in the recruitment of agricultural workers Contributors are Elise van Nederveen Meerkerk Josef Ehmer Katherine Jellison Juan Carmona James Simpson Sophie Elpers Debojyoti Das Lozaan Khumbah Karl

**Rethinking Atlantic Empire** Scott Eastman, Stephen Jacobson, 2021-06-11 In recent years the historiography of nineteenth century Spain and Latin America has been invigorated by interdisciplinary engagement with scholars working on topics such as empire slavery abolition race identity and captivity No scholar better exemplified these developments than Christopher Schmidt Nowara a specialist on Spain and its Caribbean colonies in Cuba and Puerto Rico A brilliant career was cut short in 2015 when he died at the age of 48 Rethinking Atlantic

Empire takes Schmidt Nowara's work as a point of departure charting scholarly paths that move past reductive national narratives and embrace transnational approaches to the entangled empires of the Atlantic world **Wisconsin Magazine of History** Milo Milton Quaife, Joseph Schafer, Edward Porter Alexander, 1961 **The Second American Revolution** Gregory P. Downs, 2019-10-10 Much of the confusion about a central event in United States history begins with the name the Civil War. In reality the Civil War was not merely civil meaning national and not merely a war but instead an international conflict of ideas as well as armies. Its implications transformed the U.S. Constitution and reshaped a world order as political and economic systems grounded in slavery and empire clashed with the democratic process of republican forms of government. And it spilled over national boundaries tying the United States together with Cuba, Spain, Mexico, Britain, and France in a struggle over the future of slavery and of republics. Here Gregory P. Downs argues that we can see the Civil War anew by understanding it as a revolution. More than a fight to preserve the Union and end slavery, the conflict refashioned a nation in part by remaking its Constitution. More than a struggle of brother against brother, it entailed remaking an Atlantic world that centered in surprising ways on Cuba and Spain. Downs introduces a range of actors not often considered as central to the conflict but clearly engaged in broader questions and acts they regarded as revolutionary. This expansive canvas allows Downs to describe a broad and world-shaking war with implications far greater than often recognized **A History of All Nations** Samuel Griswold Goodrich, 1855 **The Frontier in American History** Frederick Jackson Turner, 1921 **A History of All Nations, from the Earlier Periods to the Present Time**, 1851 **History of All Nations ...** Samuel Griswold Goodrich, 1854
