Peacekeepers and Conquerors Samuel J. Watson,2013-04-23 In Jackson s Sword Samuel Watson showed how the U S Army officer corps played a crucial role in stabilizing the frontiers of a rapidly expanding nation In this sequel volume he chronicles how the corps responsibilities and leadership along the young nation s borders continued to grow In the process he shows officers reflected an increasing commitment to professionalism insulation from partisanship and deference to civilian authority all tempered in the forge of frustrating politically complex operations and diplomacy along the nation s frontiers Watson now focuses on the quarter century between the Army s reduction in force in 1821 and the Mexican War He examines a broad swath of military activity beginning with campaigns against southeastern Indians notably the dispossession of the Creeks remaining in Georgia and Alabama from 1825 to 1834 the expropriation of the Cherokee between 1836 and 1838 and the Second Seminole War He also explores peacekeeping on the Canadian border which exploded in rebellion against British rule at the end of 1837 prompting British officials to applaud the U S Army for calming tensions and demonstrating its government s support for the international state system He then follows the gradual extension of U S sovereignty in the Southwest through military operations west of the Missouri River and along the Louisiana Texas border from 1821 to 1838 and through dragoon expeditions onto the central and southern Plains between 1834 and 1845 Throughout his account Watson shows how military professionalism did not develop independent of civilian society nor was it simply a matter of growing expertise in the art of conventional warfare Indeed the government trusted career army officers to serve as federal international and interethnic mediators national law enforcers and de facto intercultural and international peacekeepers He also explores officers attitudes toward Britain Oregon Texas and Mexico to assess their values and priorities on the eve of the first conventional war the United States had fought in more than three decades Watson s detailed study delves deeply into sources that reveal what officers actually thought wrote and did in the frontier and border regions By examining the range of operations over the course of this quarter century he shows that the processes of peacekeeping coercive diplomacy and conquest were intricately and inextricably woven together

From Sea Charts to Satellite Images David Buisseret, 1990-06-22 The authors write authoritatively and crisply. How to use maps in teaching is spelled out carefully, but the authors also manage to sketch in the background of American mapping so the book is both a manual and a history. Commentaries are sprinkled with stimulating new ideas, for instance on how to use bird's-eye views and country atlases in the classroom, and there are didactic discussions on maps showing the walking city and the impact of the street car. An extraordinarily wide range of maps is depicted, which makes for good browsing, pondering, and close study. This is a very good, highly attractive, and worthwhile book; it will have great impact on the use of old and new maps in teaching. As well, this is a tantalizing survey of mapping the United States and will whet the appetites of students and encourage them to learn more about maps and their origins. Visions of the Land Michael A. Bryson, 2002-06-29 The work

of John Charles Fremont Richard Byrd Charlotte Perkins Gilman John Wesley Powell Susan Cooper Rachel Carson and Loren Eiseley represents a widely divergent body of writing Yet despite their range of genres including exploration narratives technical reports natural histories scientific autobiographies fictional utopias nature writing and popular scientific literature these seven authors produced strikingly connected representations of nature and the practice of science in America from about 1840 to 1970 Michael A Bryson provides a thoughtful examination of the authors their work and the ways in which science and nature unite them *Visions of the Land* explores how our environmental attitudes have influenced and been shaped by various scientific perspectives from the time of western expansion and geographic exploration in the mid nineteenth century to the start of the contemporary environmental movement in the twentieth century Bryson offers a literary critical analysis of how writers of different backgrounds scientific training and geographic experiences represented nature through various kinds of natural science from natural history to cartography to resource management to ecology and evolution and in the process explored the possibilities and limits of science itself *Visions of the Land* examines the varied sometimes conflicting but always fascinating ways in which we have defined the relations among science nature language and the human community Ultimately it is an extended meditation on the capacity of using science to live well within nature

Prologue, 1991 *After Lewis and Clark* Robert M. Utley, 2004-01-01 In 1807 a year after Lewis and Clark returned from the shores of the Pacific groups of trappers and hunters began to drift West to tap the rich stocks of beaver and to trade with the Native nations Colorful and eccentric bold and adventurous mountain men such as John Colter George Drouillard Hugh Glass Andrew Henry and Kit Carson found individual freedom and financial reward in pursuit of pelts Their knowledge of the country and its inhabitants served the first mapmakers the army and the streams of emigrants moving West in ever greater numbers The mountain men laid the foundations for their own displacement as they led the nation on a westward course that ultimately spread the American lands from sea to sea **A Life Wild and Perilous** Robert M. Utley, 2015-09-15 This richly documented book is the definitive study of the decisive role mountain men played in the exploration and expansion of the Western frontier Jay P Dolan The New York Times Book Review Early in the nineteenth century the mountain men emerged as a small but distinctive group whose knowledge and experience of the trans Mississippi West extended the national consciousness to continental dimensions Though Lewis and Clark blazed a narrow corridor of geographical reality the West remained largely terra incognita until trappers and traders such as Jim Bridger Kit Carson Tom Fitzpatrick and Jedediah Smith opened paths through the snow choked mountain wilderness These and other Mountain Men opened the way west to Fremont and played a major role in the pivotal years of 1845 1848 when Texas was annexed the Oregon question was decided and the Mexican War ended with the Southwest and California in American hands thus making the Pacific Ocean America's western boundary
