## Nice Frankenstein Four Lost Souls:

*The Turn to Gruesomeness in American Horror Films, 1931-1936* Jon Towlson, 2016-09-12 Critics have traditionally characterized classic horror by its use of shadow and suggestion Yet the graphic nature of early 1930s films only came to light in the home video DVD era Along with gangster movies and sex pictures horror films drew audiences during the Great Depression with sensational content Exploiting a loophole in the Hays Code which made no provision for on screen gruesomeness studios produced remarkably explicit films that were recut when the Code was more rigidly enforced from 1934 This led to a modern misperception that classic horror was intended to be safe and reassuring to audiences The author examines the 1931 to 1936 happy ending horror in relation to industry practices and censorship Early works like *Murders in the Rue Morgue* 1932 and *The Raven* 1935 may be more akin to *The Texas Chain Saw Massacre* 1974 and *Hostel* 2005 than many critics believe

Okuda, Mark Yurkiw, 2016-02-09 By the last 1950s studios saw television as a convenient dumping ground for thousands of films that had been gathering dust in their vaults Distributors grouped them by genre and Chicago's tradition of TV horror movie shows was born From giant grasshoppers to Dracula epics Okuda and Yurkiw take a comprehensive look at these programs with career profiles of the horror hosts a look at the politics behind the shows and broadcast histories as well as guides to many of the films themselves The 1931-1940: American Film Institute Catalog of Motion Pictures Produced in the United States American Film Institute, 1993 The entire field of film historians awaits the AFI volumes with eagerness Eileen Bowser Museum of Modern Art Film Department Comments on previous volumes The source of last resort for finding socially valuable films that received such scant attention that they seem lost until discovered in the AFI Catalog Thomas Cripps Endlessly absorbing as an excursion into cultural history and national memory Arthur Schlesinger Jr Merchants of Menace Richard Nowell, 2014-04-10 Anglophone horror films are typically approached as the inevitable by products of psychological and social demons haunting filmmakers and their homelands in short as if they were our collective nightmares These reflectionist approaches have led horror films routinely and reductively to be framed as mouthpieces for misogynistic sadists lurking in the shadows of the exploitation sector as defiant expressions of resistance enacted by noble progressives or as platforms for the politically reactionary evils of the biggest scariest monster of all Hollywood The industry logic strategies and practices that heavily determine horror film content the nature of horror film production promotion and dissemination as well as the responses to these activities have therefore been either side stepped completely or reduced unhelpfully to the profit making motives underwriting all capitalist endeavours Consequently even though horror has been a key component of media output for almost a century the genre's industrial character remains under explored and poorly understood EDITOR

Marshall Leicester, 2024-06-27 Using the Hollywood studio system 1931-1960 as a historical center this book performs close readings of classic horror films such as *Frankenstein* and *Cat People* while asking the following three questions What about this movie is weird What does this movie think ought to scare you If there weren't monsters in this movie what would be wrong with these people's lives These questions guide readers toward the uniqueness of horror films in relation to the way they are classified and the feeling of horror that they

offer The horror genre is a collection of culturally shared elements words images or themes used to signify or evoke horror because they have been used that way before Instead of treating movies as examples of the horror genre through how they evoke feelings from viewers this book locates the meaning of horror within individual films and shows how movies make their own genealogies and complicate their own scares in an evolution of the genre It argues that classic horror movies are forms of reception of and resistance to the ideas of horror that were current in their historical period Working historically the author traces movies interactions with their precursors and co conspirators to show how they are the agents of historical changes in the genre and in what we take to be horror
