**Postphenomenology and Media** Stacey O'Neal Irwin, Galit Wellner, Yoni Van Den Eede, 2017-06-23 Postphenomenology and Media Essays on Human Media World Relations sheds light on how new digital media are shaping humans and their world It does so by using the postphenomenological framework to comprehensively study human media relations making use of conceptual instruments such as the transparency opacity distinction embodiment

multistability variational analysis and cultural hermeneutics This collection outlines central issues of media and mediation theory that can be explored postphenomenologically and showcases research at the cutting edge of philosophy of media and technology The contributors together enlarge the range of thinking about human media world relations in contemporary society reflecting the interdisciplinary range of this school of thought and explore sometimes self reflexively and sometimes critically the provocative landscape of postphenomenology and media

**Global Issues and Ethical Considerations in Human Enhancement Technologies** Thompson, Steven John, 2014-04-30 With rapid advancements in human enhancement technologies society struggles with many issues such as definition effects participation regulation and control Current and future initiatives in these technologies may not be in the participants best interests therefore it is imperative for research on humanitarian considerations to be available to those affiliated with this field Global Issues and Ethical Considerations in Human Enhancement Technologies compiles prestigious research and provides a well rounded composite of the field s role in emerging technologies Addressing both present and future concerns this publication serves as a valuable reference work for researchers students professionals and practitioners involved in computer science and the humanities as well as many engaged in a humanities approach to metasystems new artificial life and robotics

**Techno-Scientific Practices** Federica Russo, 2022-10-03 In scholarly debates as well as in everyday parlance we tend to pull science and technology apart science gives us theory and technology applies it In practice however science and technologies are highly intertwined In Techno Scientific Practices An Informational Approach Federica Russo looks at the practice of science and elucidates the role of technologies and instruments in the process of knowledge production In this exercise it becomes evident that technologies cannot be analyzed on their own but always in relation to epistemic agents Thus Techno Scientific Practices emphasizes the importance of analyzing the process of knowledge production in techno scientific contexts in which there is a triad of relations to look at us the instruments and the world The book thus builds bridges between the philosophy of science philosophy of technology and science and technology studies in an unprecedented way

**Identify and Sort** Ansorge Josef Teboho, 2016 The advent of information technology ushered in new forms of political power Machines play crucial roles in how states see understand and act and scrutiny of these processes lies at the heart of Identify and Sort It frames debates about IT in world politics explaining how industrial sorting systems employed by political actors are renegotiating the social contract between individuals and the state Ansorge takes the reader on a global expedition that tracks the historical antecedents of digital power from Aztec and Inca rituals to medieval filing systems to a grandiose 1930s design for a German registry to the databases used in US presidential campaigns and how IT is deployed in war and post conflict reconstruction Databases are also deployed virtually to record and act upon people who have no publicly visible identification or group consciousness modern wars and election campaigns are fought on this individualised terrain The uneven distribution of these technical capacities engenders inequality of access while rights discourses and legal frameworks forged in an era of mass

group discrimination subjugation and public resistance lag behind these micro targeting practices Rich in examples and ideas Identify and Sort develops an analytical model and vocabulary to explain the functions and limits of digital power in world politics

**Moralizing Technology** Peter-Paul Verbeek, 2024-05-31 Technology permeates nearly every aspect of our daily lives Cars enable us to travel long distances mobile phones help us to communicate and medical devices make it possible to detect and cure diseases But these aids to existence are not simply neutral instruments they give shape to what we do and how we experience the world And because technology plays such an active role in shaping our daily actions and decisions it is crucial Peter Paul Verbeek argues that we consider the moral dimension of technology Moralizing Technology offers exactly that an in depth study of the ethical dilemmas and moral issues surrounding the interaction of humans and technology Drawing from Heidegger and Foucault as well as from philosophers of technology such as Don Ihde and Bruno Latour Peter Paul Verbeek locates morality not just in the human users of technology but in the interaction between us and our machines Verbeek cites concrete examples including some from his own life and compellingly argues for the morality of things Rich and multifaceted and sure to be controversial Moralizing Technology will force us all to consider the virtue of new inventions and to rethink the rightness of the products we use every day

*The Digital Humanities and the Digital Modern* James Smithies, 2017-08-28 This book provides new critical and methodological approaches to digital humanities intended to guide technical development as well as critical analysis Informed by the history of technology and culture and new perspectives on modernity Smithies grounds his claims in the engineered nature of computing devices and their complex entanglement with our communities our scholarly traditions and our sense of self The distorting mentalit of the digital modern informs our attitudes to computers and computationally intensive research leading scholars to reject articulations of meaning that admit the interdependence of humans and the complex socio technological systems we are embedded in By framing digital humanities with the digital modern researchers can rebuild our relationship to technical development and seek perspectives that unite practical and critical activity This requires close attention to the cyber

infrastructures that inform our research the software intensive methods that are producing new knowledge and the ethical issues implicit in the production of digital humanities tools and methods The book will be of interest to anyone interested in the intersection of technology with humanities research and the future of digital humanities

**Rethinking Machine Ethics in the Age of Ubiquitous Technology** White, Jeffrey, Searle, Rick, 2015-05-31 As the utilization of intelligent machines spreads to numerous realms the discourse of machine ethics has also developed and expanded Concerns over machine intelligence and the role of automata in everyday life must be addressed before artificial intelligence and robotic technologies may be fully integrated into human society Rethinking Machine Ethics in the Age of Ubiquitous Technology blends forward looking constructive and interdisciplinary visions of ethical ideals aims and applications of machine technology This visionary reference work incorporates ethical conversations in the fields of technology computer science robotics and the medical industry creating a vibrant dialogue between philosophical ideals and the applied sciences With its broad scope of relevant topics this book serves as an excellent tool for policymakers academicians researchers advanced level students technology developers and government officials This timely publication features thoroughly researched articles on the topics of artificial moral agency cyber warfare transhumanism organic neural nets human worker replacement automaticity and global governance security and surveillance military drones and more

**Doing Good with Technologies:** Katinka Waelbers, 2011-06-27 20th century technologies like cars the Internet and the contraceptive pill have altered our actions changed our perceptions and influenced our moral ideas for better and worse Upcoming technologies are bound to fulfill their own unique social roles How can we advance this social role so that it will support the good life and limit undesired changes This book explores whether we can take a forward looking responsibility to optimize the social roles of technologies In doing so the book discusses three issues first it aims to understand the social role of technologies second it explores what it means to accept responsibility for this social role and third it searches for some forward looking tools that help us to see how new technologies may influence human behavior In a rather unique approach this book combines the influential sociological research of Bruno Latour on the social impacts of technologies with the contemporary Aristotelianism of Alasdair MacIntyre

**Superintelligence** Nick Bostrom, 2014 This profoundly ambitious and original book picks its way carefully through a vast tract of forbiddingly difficult intellectual terrain

**Heidegger and Politics** Alexander S. Duff, 2015-11-19 In this fresh interpretation of Heidegger Alexander S. Duff explains Heidegger's perplexing and highly varied political influence Heidegger and Politics argues that Heidegger's political import is forecast by fundamental ambiguities about the status of politics in his thought Duff explores how in Being and Time as well as earlier and later works Heidegger analyzes everyday human existence as both irretrievably banal but also supplying our only tenuous path to the deepest questions about human life Heidegger thus points to two irreconcilable attitudes toward politics either a total and purifying revolution must usher in an authentic communal existence or else we must await a future deliverance from the present

dispensation of Being Neither attitude is conducive to moderate politics and so Heidegger's influence tends towards extremism of one form or another modified only by explicit departures from his thought     Jacques Ellul and the Technological Society in the 21st Century Helena M. Jerónimo, José Luís García, Carl Mitcham, 2013-07-08 This volume rethinks the work of Jacques Ellul 1912-1994 on the centenary of his birth by presenting an overview of the current debates based on Ellul's insights As one of the most significant twentieth century thinkers about technology Ellul was among the first thinkers to realize the importance of topics such as globalization terrorism communication technologies and ecology and study them from a technological perspective The book is divided into three sections The first discusses Ellul's diagnosis of modern society and addresses the reception of his work on the technological society the notion of efficiency the process of symbolization de symbolization and ecology The second analyzes communicational and cultural problems as well as threats and trends in early twenty first century societies Many of the issues Ellul saw as crucial such as energy propaganda applied life sciences and communication continue to be so In fact they have grown exponentially on a global scale producing new forms of risk Essays in the final section examine the duality of reason and revelation They pursue an understanding of Ellul in terms of the depth of experience and the traditions of human knowledge which is to say on the one hand the experience of the human being as contained in the rationalist sociological and philosophical traditions On the other hand there are the transcendent roots of human existence as well as revealed knowledge in the mystical and religious traditions The meeting of these two traditions enables us to look at Ellul's work as a whole but above all it opens up a space for examining religious life in the technological society
