Mindich, 1998-11-01 A superb history of journalism's most respected tenet objectivity and the challenges of achieving it in today's world Christian Science Monitor If American journalism were a religion as it has been called then its supreme deity would be objectivity The high priests of the profession worship the concept while the iconoclasts of advocacy journalism new journalism and cyberjournalism consider objectivity a golden calf Meanwhile a groundswell of tabloids and talk shows and the increasing infringement of market concerns make a renewed discussion of the validity possibility and aim of objectivity a crucial pursuit Despite its position as the orbital sun of journalistic ethics objectivity until now has had no historian David T Z Mindich reaches back to the nineteenth century to recover the lost history and meaning of this central tenet of American journalism His book draws on high profile cases showing the degree to which journalism and its evolving commitment to objectivity altered and in some cases limited the public's understanding of events and issues Mindich devotes each chapter to a particular component of this ethic detachment nonpartisanship the inverted pyramid style facticity and balance Through this combination of history and cultural criticism he provides a profound meditation on the structure promise and limits of objectivity in the age of digital media There is a growing unhappiness about the direction of news coverage Readers and viewers want objectivity back The first step toward doing that is to understand where objective journalism came from in the first place **Just the Facts** is a good place to begin The Washington Monthly **News and Sexuality** Laura

*President Trump and the News Media* Jim A. Kuypers, 2020-06-17 In President Trump

and the News Media Moral Foundations Framing and the Nature of Press Bias in America political communication researcher Jim A Kuypers takes readers on a rhetorical framing tour de force this time incorporating elements of Moral Foundations Theory to investigate the ideological underpinnings of press reports Using a rhetorical version of framing analysis Kuypers analyzes four major speeches by President Trump and compares them with the reporting on those speeches by the mainstream news media The moral foundations of both Trump and the news media are examined to assess their respective moral ideological underpinnings The results turn framing theory on its head by demonstrating how frames do not give rise to moral assessments as previously thought but rather the presence of moral foundations provide moral substance to frames as they are developed and found throughout news coverage The results reveal how journalists inject bias consciously and unconsciously into hard news stories and that their moral foundations act to privilege liberal concerns and denigrate conservative concerns Kuypers conveys how news media framing acted to treat President Trump not as a source of news but as a political opponent while at the same time helping the political opposition of the President By evaluating journalistic practices through the lens of their own published ethical standards Kuypers argues that contemporary journalistic practices are damaging the American Republic and makes the case for immediate incorporation of viewpoint diversity within news organizations Scholars of communications journalism and political science will find this book particularly interesting
