John Hersey got into Hiroshima and managed to report the truth to the world. When the magazine published Hiroshima in August 1946, it became an instant global sensation and inspired pervasive horror about the hellish new threat that America had unleashed. Since 1945, no nuclear weapons have ever been deployed in war, partly because Hersey alerted the world to their true devastating impact. This knowledge has remained among the greatest deterrents to using them since the end of World War II. Released on the anniversary of the Hiroshima bombing, *Fallout* is an engrossing detective story as well as an important piece of hidden history that shows how one heroic scoop saved and can still save the world. **Suffering Made Real** M. Susan Lindee, 1994. In 1946, an American scientific agency, the Atomic Bomb Casualty Commission (ABCC), was established in Japan to study the long-term biomedical effects of radiation on the survivors. Over the next twenty-nine years, American scientists and physicians, with funding from the Atomic Energy Commission, published hundreds of papers documenting the effects of radiation on aging, life span, fertility, and disease. In 1975, the agency was renamed and reorganized to permit greater Japanese input.
