## Nhbc Guide 2015:

**Designed to Perform** Tom Dollard, 2019-07-25 This book is an illustrated practical design guide to delivering better energy performance in all types of new build homes. It takes the form of an annotated details book with photos taken from live construction sites with the content based around diagrams, drawings and photos by the author which demonstrates valuable best practice knowledge and advice. Chapter 1 is an introduction to the performance gap and the quality of design and construction in new build homes explaining the typical construction sequence of homebuilding and highlights common issues that designers need to engage with. Chapters 2-7 look at each construction fabric in turn including a series of detailed drawings, diagrams and photos illustrating the key elements of good design. Chapter 8 contains a checklist of all performance gap issues that designers need to look for. This book will provide valuable guidance to architects and designers on how to improve their detailing at construction stage and therefore the overall quality of design and performance of new homes.

Materials for Architects and Builders Arthur Lyons, 2019-08-28 Materials for Architects and Builders provides a clear and concise introduction to the broad range of materials used within the construction industry and covers the essential details of their manufacture, key physical properties, specification and uses. Understanding the basics of materials is a crucial part of undergraduate and diploma construction or architecture related courses and this established textbook helps the reader to do just that with the help of colour photographs and clear diagrams throughout. This new sixth edition has been completely revised and updated to include the latest developments in materials research, new images, appropriate technologies and relevant legislation. The ecological effects of building construction and lifetime use remain an important focus and this new edition includes a wide range of energy saving building components. *Show Me the Bodies* Peter Apps, 2022-11-10

WINNER OF THE ORWELL PRIZE FOR POLITICAL WRITING 2023 Never before in years of reviewing books about buildings has one brought me to tears. This one did. Rowan Moore Observer Book of the Week. On 14 June 2017 a 24 storey block of flats went up in flames. The fire climbed up cladding as flammable as solid petrol. Fire doors failed to self close. No alarm rang out to warn sleeping residents. As smoke seeped into their homes all were told to stay put. Many did and they died. It was a tragedy decades in the making. Peter Apps meticulously exposes how a steady stream of deregulation, corporate greed and institutional indifference caused a tragedy 72 people did not need to die as the Grenfell Tower Inquiry makes clear. Here is the story of a grieving community forsaken by our government, a community still waiting for justice. **The Grenfell Tower Fire** Tony

Sullivan,2025-04-28 Examines the systemic failures and deregulation that led to the Grenfell Tower fire tragedy from a firefighter s perspective In the early hours of 14th June 2017 a fire began in a kitchen on the fourth floor of a twenty four storey block of flats in West London A fire that should have been contained within the original compartment ripped up the outside of the building within minutes Procedures and systems that had worked for decades failed resulting in the loss of seventy two lives Yet this was not the first time a breakdown of compartmentation had caused a loss of life Just eight years earlier a fire at Lakanal House in South London had claimed the lives of six people How then could this happen again Nor

was it just one failure as panels inadequate fire stopping construction of the windows failure of fire doors and the smoke ventilation system all contributed to the rapid fire spread This book gives a firefighter s perspective of the deregulation that caused the tragedy and describes what firefighters were confronted with that June night in 2017 It places that deregulation chronologically alongside a career that spanned three decades including nine years in the training department of the London Fire Brigade It proposes the causes are far deeper and wider than many think A systemic deterioration of standards in testing of materials building control maintenance inspections fire safety and enforcement
