Nice Book Enterprise Software Sourcing Performance Premises:

Enterprise Software Sourcing Performance Marko Nöhren, 2015-11-02 This book opens the black box of software sourcing by explaining how dynamic software alignment is established and how it impacts business performance outcomes. By investigating how software sourcing modes are related to value generation in the post implementation phase it shows researchers and managers the impact logic of on demand on premises and in house software on dynamic fit and process level performance outcomes in a client organization. It describes dynamic IT alignment as the key to success in a fast moving digital world with software as a service on the rise and highlights the fact that today companies can choose between developing software in house make or sourcing packaged systems in an on premises buy or an on demand lease mode. This book is the first to explicitly compare these sourcing arrangements with each other in terms of alignment and business performance.

Enterprise Information Systems of the Future Geert Poels, 2013-01-31 This book constitutes the proceedings of the 6th International IFIP Working Conference on Research and Practical Issues of Enterprise Information Systems CONFENIS 2012 held in Ghent Belgium during September 19-21 2012. The theme of the conference was enterprise information systems of the future evolving toward more performance through transparency and agility mirroring the trend toward more open and more flexible systems. In all 53 contributions were submitted and after a rigorous review process 10 full papers and 15 short papers were selected for publication in this book. These 25 papers present a well balanced mix between the traditional social sciences and the novel design science paradigms in enterprise information systems research and they also include practitioner oriented and practice driven contributions. The topics covered fall into three categories: information management in businesses e.g. enterprise modeling or business process management; information systems from a management perspective e.g. service innovation, business intelligence or decision support systems; and ERP offerings and implementations e.g. software as a service or ERP case studies.
